

ISDC-Military round table

- General update round the table
- "SD for training and excercises"

Norwegian update

- 4 major areas of work
 - Dynamic systems analysis
 - Conceptualization, problem formulation and facilitation
 - Development and use of training models
 - Dynamic decision research
- 2 major research sites
 - FFI (Norwegian Defence Research Establishment)
 - Norwegian Defence Leadership Institute (Research spinoff of FFI)

”SD for training and excercises”

- Two core principles in Norway
 - Training should improve on people’s *(combat) dynamic intuition*
 - Great need for simple training tools to support above principle using the principle *minimalistic decision training*
- A dozen models currently being used in operational and grad school settings, mostly at col+ levels, spanning combat, logistics, C4I and other areas
