STATE UNIVERSITY OF NEW YORK AT ALBANY

October 26, 1970

HOMECOMING QUEEN Linda Marshall (right) and **Freshman Princess** Angela Sloboda bestow regal smiles on their subjects during the Homecoming Parade on Oct. 17. The queen and princess were elected by student vote.

Enthusiasm, Strong Turnouts Mark Homecoming as a Success

From both the alumni and the undergraduate points of view, Homecoming Weekend was judged a success. Homecoming Chairman Charles Gibbs expressed satisfaction with participation in events which saw 200 at the Champagne Formal dinner-dance on Friday night, 2,800 at the Saturday night concert, and an unprecedented crowd of 7,000 at the

Pre-Registration Starts Wednesday

Pre-registration for Spring 1971 will begin Wednesday in the U Lounge of the Colonial Quadrangle. Thomas C. Burnette, university registrar, has announced two major changes that will be incorporated for the first time in pre-registration. The changes include a new two card packet and a mandatory request form for the Fall 1971 session.

The stream-lined packet has been designed to eliminate student work and reduce the time needed to complete the pre-registration process. The two cards in the new packet are a revised program card and the registration permit. Many of the previous forms have been reproduced on the one brown striped program card. The program card now contains a power of attorney statement, selective service information, and the program of the student. This one card will be used by the computer center to supply various offices with necessary data on all students.

In addition to filling out the one card, each student will be required to submit a preference sheet for courses desired in the fall. The registrar will then work with the various departments to schedule courses according to student demand.

The alpha-rotating system will continue to operate as in the past. Under this system every student who remains at the university for eight semesters is guaranteed an equal chance of obtaining class cards.

All student packets are to be turned in immediately following pre-registration.

Saturday afternoon football game with Siena College. The Beer Cheer and Pizza Party were also well attended.

Although alumni participation was less impressive statistically—60-70 at the alumni wine and cheese reception on Friday night, 45-50 at the Sunday morning breakfast with the president—Alumni Director David Jenks was greatly encouraged by the enthusiasm and interest of the alumni who did attend.

Linda Marshall ruled as Homecoming Queen for the weekend, with Angela Sloboda as Freshman Princess and Catherine Poluzzi and Robin Sagon as their court.

Four Greek groups and two residence halls shared honors as winners of float contests in the Homecoming Parade. The best Greek entry was won by Sigma Tau Beta. Livingston and Hamilton Halls were judged the best non-Greek entry. Best theme prize was taken by Kappa Delta and Gamma Delta Chi, and Psi Gamma captured the prize for the most imaginative float.

Dorms to Close for Thanksgiving; Some Housing Available in Sayles

The Office of Residences has announced that all residence facilities, with one exception, will be closed for Thanksgiving recess Wednesday, Nov. 25, at 7 p.m. through Sunday, Nov. 29, at noon. Students remaining will live in Sayles Hall where they will be assigned to unoccupied rooms.

Special arrangements are being made to accommodate students participating in university-related programs during the recess. The exceptions to normal policy are being considered by the director of residences. They include programs such as athletic teams, international students, student teachers, and food service employees.

Other students who have special, although individual, problems which require their remaining in Albany for the recess may request to live in residence by

Security Director Named, Combines Youth, Experience

James R. Williams, 29, has been named to the new post of director of campus security. The announcement was made by President Benezet last Wednesday at the campus forum and Mr. Williams is expected to begin his duties December 3.

Mr. Williams, the unanimous choice of the search committee chaired by Robert Stierer, was the youngest candidate for the job. The committee found him "sensitive to the human problems of people and to the problems of our campus," and was impressed by his "sense of humor, administrative experience, innovative approach to campus security, and ... broad experience with people."

The new security director presently is associate director of the Indianapolis, Indiana, Human Rights Commission with responsibility in the areas of housing, police, and community relations. He previously was senior parole officer with the Indiana Department of Corrections, where he engaged in intensive counseling with male parolees.

Mr. Williams also has served as a case-worker with the Marion County Department of Public Welfare. He is a 1963 graduate of the U.S. Merchant Marine Academy at Kings Point, N. Y., and a candidate for an M.A. in history and political science at Butler University. He has

Fund Drive Extended

The United Fund Joint Appeal campaign has been extended through October 30 with the goal of the university community set at \$32,000. As of October 19, 545 professional people had responded with pledges totaling \$20,762. This figure represents only 20% of the employees who were initially contacted.

Students are also involved in giving their fair share to the appeal. Last night the film, "My Little Chickadee," starring W. C. Fields and Mae West was shown with proceeds going to the fund.

seeing their present residence hall director. The individual requests must be made by Nov. 4. Residence hall directors will determine the legitimacy of each request.

Detailed procedures will have to be complied with by the recess residents.

Bomb Threats Disrupt Weekend Activities

An estimated 2,000 persons were evacuated from the Campus Center early Sunday morning, Oct. 18, when a small explosion caused damage to a toilet bowl in the first floor men's room. Investigators reported that a firecracker device had been used. A university spokesman said he thought the incident was a prank.

Later the same morning, at 3:30, the security office received a call from an unidentified male with word that a bomb would go off in an hour at the Alumni Quadrangle. All five buildings were evacu-

attended seminars in group therapy and drug abuse.

The Indianapolis native is a member of several professional organizations, including the National Council on Crime and Delinquency; the Center for the Study of Democratic Institutions; and PACE, Inc., a United Fund agency advocating correctional reform, of which he is a member of the board of directors. He also is a lieutenant in the U.S. Naval Reserve.

Senate Approves Promotion Bills

Faculty members may appear before groups considering their promotion or continuing appointment under a bill passed last Monday by the Senate. The bill changes provisions in the Guidelines Concerning Promotions in Rank and Continuing Appointments to enable a faculty member to appear before a department, school, or college committee considering him for promotion or continuing appointment, or before the Council on Promotions and Continuing Appointments. Appearances are at the option of the faculty member and would occur prior to any action by the committee or council.

Another bill passed by the Senate has eliminated a length of service requirement for promotion to associate professor or professor. Previously an individual was expected to serve four years as an assistant professor or five years as an associate professor before being considered for promotion to the next highest rank.

Senate defeated a bill which would have set up a special committee to recommend appropriate roles for students and faculty during demonstrations and confrontations on campus. Senators felt that each situation presented different problems and that there should be no attempt to prescribe responses to them.

Discussion on a bill to change the membership of the Council on Student Affairs ended when the call for a quorum could not be met and the meeting had to be adjourned. The bill seeks to increase council membership to 19. Included would be the vice president for student affairs, nine faculty members, six undergraduates, and three graduate students. Three of the faculty and five of the students would be Senators.

ated in the chilly weather and a fruitless search was conducted.

Some 15 hours later another call was received at the security office from someone with a youthful male voice who declared that there was a bomb at the Campus Center. The building, with few persons in it at the time, was evacuated.

The bomb threats were the fifth and sixth of the current semester. Earlier there were similar experiences at Stuyvesant Tower, the library, and the lecture room complex.

School of Business Adopts New Structure, Curriculum

SUNYA's School of Business, under the leadership of Dean W. Warren Haynes, has adopted several structural and curricular changes for the 1970-71 year in a continuing transition and redirection of its goals. In addition, 10 new faculty members have been added this year to the growing school.

Two years ago the School of Business accepted a plan to change its program from one which had concentrated on training teachers to one which now is practitioner-oriented in management, preparing students for professional careers in business. Since a primary thrust is toward long-term development, rather than short-term vocational training, a master's program is given high priority. The Master of Business Administration degree program began this fall.

The master's program consists of three components. The first semester, organized on a modular plan, has the objective of providing concepts required by later courses. The second semester stresses decision-making and realistic, complex problem situations faced by management. The second year includes required courses in business policy and behavioral analysis, plus an elective laboratory-type course of major dimensions taught by a faculty team, and several other electives. The program is highly innovative.

The most important structural change in the school is the elimination of the traditional departmental system, which has been replaced by an organization built around programs, rather than departments. In addition to the dean and his immediate staff, there are directors of the following organizational units: undergraduate programs, first semester M.B.A. faculty, second semester M.B.A. faculty, accounting program faculty, and second

Summer Session Dates

The calendar for Summer Sessions 1971 has been announced by David Martin, director of the sessions. The pre-session will begin June 7, the regular session commences June 29.

The pre-session is a three week period concluding on June 25 with final examinations. The regular session includes two three-week segments. Registration for the first session is June 28, registration for the second session is July 22. The summer program concludes on August 12.

year M.B.A. program faculty. There also are coordinators for such areas as marketing, quantitative methods, finance, organizational behavior, and business law.

The undergraduate program also has undergone changes, although major emphasis now is on development of the graduate program. This year, a pre-professional program has gone into effect, permitting students to earn both the B.S. and M.B.A. within five years. Beginning next fall, an experimental program with stress on student-directed activities and involvement in the outside community or foreign countries will be initiated for undergraduates.

Dean Haynes and his faculty, in looking to the future, will be guided by several principles in developing the School of Business. General managerial competence will take precedence over specialization in the academic program, although the need for in-depth education in certain specialties will be recognized. The M.B.A. program will receive highest priority in planning and will be developed preceding introduction of a doctoral program. Guidelines for admission to the school now stress acceptance of students who foresee for themselves a career in management and who bring the necessary aptitudes and attitudes for such professional commitment.

Funds for Research, Fellowships Received Recently by SUNYA

Grants totaling \$792,347 for research and programs have been received recently by SUNYA. Of that amount, \$267,347 in total funding was received in September.

National Defense Graduate Fellowships from the U. S. Office of Education total \$190,800. Twenty-six are continuing grants and 10 are new.

Charles Edwards, biology, is the project director for the study of the physiology of muscle function with the aid of a \$41,247 grant from the National Institute of Neurological Diseases and Stroke of the U. S. Public Health Service.

James Tedeschi, psychology, has received a two-year grant of \$35,300 from the National Science Foundation for his project, "Studies of Coercion and Inducement: The Uses of, and Responses to, Threats and Promises."

Announcement was made in Sep-

Kenneth Buhrmaster

New Officers Named For AAUP Chapter

SUNYA's chapter of the American Association of University Professors has chosen Webb S. Fiser, political science, as president-elect. Other new officers are Marion Motisher, library, treasurer; Vincent Aceto, library science, representative to the SUNY AAUP council; and Robert Donovan, English, Howard Howes, guidance and personnel services, and Virgil Zimmerman, GSPA, members of the executive committee. The chapter's current president is Charles Edwards, biology. Harold Morick, philosophy, is secretary.

A debate on restructuring the university was featured at the chapter's annual meeting on Oct. 8. A 12-point program recently proposed by the New University Conference was the basis for discussion.

tember by the NSF of a \$525,000 award to the Department of Biological Sciences for science development. The awards are aimed at improving the quality of research and education at the graduate level.

Robert D. Allen, department chairman, will use the funds for research and graduate programs. The department will add faculty and supporting personnel, support graduate students, and purchase equipment and supplies. SUNYA will emphasize development in cell biology, biophysics, biochemistry, developmental biology, ecology, and neurobiology.

Earlier in the year, the Board of Regents, approved proposals for "Cooperative Academic Efforts in Community Problems", in consortium with Hudson Valley Community College, RPI, Union College, College of St. Rose, and Siena College, in collaboration with SUNY, \$43,020; and "Program in Humanistic Education for the State of New York", in consortium with the state's two-year colleges, \$25,000.

Child Drama Program Receives County Grant

The child drama program within the Department of Theatre has received a grant from the Albany County Youth Bureau headed by Albany Mayor Erastus Corning, 3rd in support of the regular Saturday morning workshops for children conducted each semester in the Performing Arts Center.

During the 1970 summer session, the Youth Bureau underwrote a portion of the special child drama program, "Youth Theatre Workshop", which was offered to the Albany community with special emphasis on the children from Albany's inner city.

The child drama activity at SUNYA has been underway since the spring of 1968. The grant is the first to have been received from municipal funds.

Council Member Sees Reassessment, Change As Firm Commitments

Kenneth E. Buhrmaster has been a member of the University Council for the past two years. He also represents New York State on the Education Commission of the States to which he was appointed by Governor Rockefeller in 1966.

In a statement made for the *Tower Tribune*, Mr. Buhrmaster said, "Social and scientific process has never changed as rapidly as during the last decade. New methods of teaching, new understanding of learning must be researched. I am proud to be associated with SUNY at Albany for I believe the administration and staff are dedicated to helping each student realize his full potential."

He continued, "Your council is committed to support reassessment of our present policies and programs. We must not accept status quo in higher education; however, change must be for improvement and not for change alone. I hope SUNY at Albany will turn out men and women who are capable of thinking for themselves and willing to stand up for their beliefs."

A lifelong resident of Scotia, Mr. Buhrmaster was born in 1915. He was educated in the public schools of Scotia and graduated from Syracuse University where he was president of the Men's Student Senate, a commodore of the crew, and active in honorary and social fraternities.

Long active in educational matters, Mr. Buhrmaster, now first vice president of the National School Boards Association, in 1966 received the Alfred E. Smith Award for outstanding service in education in New York State from the New York State Teachers Association. For six years he was chairman of the New York State Education Conference Board, a body of ten educational organizations which works cooperatively for the enactment of educational legislation in the state.

The council member is president of the J. H. Buhrmaster Company, Inc., fuel and heating equipment suppliers, and is prominent in banking circles.

Concert Schedule

Fifteen musical programs have been scheduled by SUNYA's music department between today and the end of the semester. With two exceptions, the concerts will be held in the Performing Arts Center at 8:30 p.m. The University-Community Symphony Orchestra Concert on Nov. 22 will begin at 7:30 p.m. in the PAC Main Theater. The "Keyboard Masters" series performed by Findlay Cockrell will be heard over radio WAMC-FM Mondays and Thursdays through Dec. 14 at 1 p.m. and 7 p.m.

Tonight's concert is a program of Beethoven violin sonatas. Other Beethoven programs in the series include music for winds and piano on Nov. 3, variations for strings and piano on Nov. 16, violin sonatas on Dec. 3, and string trios on Dec. 16. Performers will include both members of the faculty and guest artists.

A flute recital by Irvin Gilman is scheduled for Nov. 6. Jean-Charles Francois, percussionist, will perform on Nov. 13. The University Concert Band will give two concerts on Nov. 18 and Nov. 21, and the Annual Fall Choral Festival will be held on Dec. 10-11.

Admission will be charged for four of the programs. They are the Creative Associates on Oct. 30, Intermedia '70 on Nov. 6, 7, 8, the Metropolitan Opera Studio Ensemble on Nov. 14, and the Bach Aria Group on Dec. 5.

MEMBERS OF THE NEWLY-ORGANIZED Student Advisory Council for the School of Education were honored at a reception in the school's faculty lounge. Shown, from the left, are Edward Early, Dean Randolph Gardner, chairman Dolores Koretz, John Green, and secretary Sherry Egan.

ASRC, Lake George Institute Linked in Research Efforts

The Atmospheric Sciences Research Center at SUNYA is identified closely with the Lake George Institute of History, Art and Science which opened this summer. On June 30 in Lake George Village Governor Rockefeller dedicated the institute at the restored Warren County Court House. The dedication crowned a concerted effort, led by the Lake George Historical Association, to prevent demolition of the 1845 court house which had been abandoned in 1963.

Beneficial public use of the facilities was necessary to the salvage effort and ASRC provided the impetus by requesting temporary use of the County Clerk's building located in front of the court house. A field center was set up there for the study of the atmosphere and limnology (study of fresh water lakes) on Lake George and other Adirondack lakes.

During the summers of 1965-68, ASRC conducted its work in the clerk's building, while the legal battles for restoration of the court house continued. In September 1968 the Town of Lake George purchased the court house building complex from Warren County and began demolition of the clerk's building. Restoration of the court house followed, through the cooperation of the Town of Lake George, the New York State Historic Trust, and the Lake George Historical Association.

The theme of the institute is a dynamic one: to involve scientists, historians, artists, and others in practical activities which will improve the environment of the Lake George-Adirondack region. It will serve as a center for scientific research and seminars dedicated to quality environment, as well as displaying graphically the history and natural resources of the Warren County area.

Ronald T. Stewart, ASRC research associate, is acting director of the institute and supervises the Lake George Research Center, a major component of the institute. Among other facilities are an historical library, to which area historical associations will be invited to contribute and which will be open to scholars of the Adirondacks; the original courtroom, which will be used for lectures, collections, and displays; an historic photographers' library; and an art gallery. One of the institute's projects is to show what man has done to the region through the display of late 19th Century photographs of the Lake George area from the Stoddard and Thatcher collections. Current photographs of the same sites will be displayed along side for comparison. Mr. Stewart believes the public will be shocked by the changes.

The Research Center is located on two stories in the back of the building, in what once was the jail. Under the direction of Paul Schaefer, a trustee of the Lake George Historical Association and brother of Vincent J. Schaefer, director of ASRC, the rooms have been completely renovated. In addition to SUNYA faculty and students, the laboratory is used by Siena, Union, RPI, Skidmore, Adirondack Community College, and others in a cooperative effort.

Mr. Stewart and Jon T. Scott, associate professor of atmospheric sciences, SUNYA, began ASRC-supported research on the phenomenon called Langmuir circulation in 1965. The Office of Water Resources Research, U.S. Department of the Interior, funded the study the next four years. The phenomenon of wind currents driving warm water down in "streaks"

first was noted in the ocean by Nobel-winning chemist Dr. Irving Langmuir in 1928. Ordinarily, warm water remains on the surface. Mr. Stewart has developed a theory to explain the unusual circulation and his hypothesis has not been disproven to date.

Among other projects, ASRC currently is conducting research on the beneficial uses of thermal waste from power plants. A major conference on the subject, sponsored by the New York State Department of Environmental Conservation, was held September 17 and 18 in Albany. It was the first state-sponsored conference of its kind in the United States.

Recently, National Science Foundation, through its International Biological Program (IBP), undertook sponsorship of a series of projects involving physical, chemical, and biological research. More than 30 countries are participating in IBP, studying the earth's ecological systems. There are some 18 such projects underway at Lake George, involving a number of institutions.

Among the physical studies being conducted by ASRC and the SUNYA department of atmospheric sciences are those in climatology, limnology, solar radiation, dispersion, temperatures, currents, and mixing. Additionally, Donald C. McNaught and Raymond G. Stross, of the SUNYA department of biological sciences, are conducting IBP projects in biological study; and RPI and the Department of Environmental Conservation are engaged in chemical analysis research.

Faculty and students from SUNYA and Adirondack Community College maintain the Research Center laboratory, which is used by the various groups working on research projects. Besides the scientific apparatus and instruments, the laboratory has small machine and electrical shops to facilitate maintenance work on the equipment.

Mr. Stewart spends considerable time at the institute, but credits the students with doing most of the work. "The institute is a great opportunity for students to receive field work experience, while escaping the confines and formality of the classroom," he explains.

In 1791 in a letter to his daughter, Thomas Jefferson described Lake George as "without comparison, the most beautiful water I ever saw. . ." The Institute of History, Art and Science is working to make that statement a reality 180 years later.

RONALD STEWART, acting director of the institute, examines data from one of the many scientific instruments used by the institute's Research Center.

WARREN COUNTY'S COURT HOUSE, saved from the threat of demolition, now houses the Lake George Institute of History, Art and Science which was dedicated in June. Several area colleges use its facilities.

Five Top Educators Fill Vacancies On SUNY's Central Office Staff

The State University Board of Trustees has appointed five leading educators from across the state and nation to fill executive level vacancies on the Central Staff at Albany.

Peter F. Regan III, 46, acting president of the State University at Buffalo last year, will be vice chancellor for academic programs. He will be responsible for initiating new and special types of academic programs to meet emerging educational needs. Programs will cover a wide spectrum, ranging from urban colleges to health education. Dr. Regan also will direct an extensive review of existing curricula.

A graduate of Cornell University Medical College, Dr. Regan has published numerous articles and two books on education and psychiatry. He is a fellow of the American Psychiatric Association and the American College of Psychiatrists and a diplomate of the American Board of Psychiatry and Neurology.

Oscar E. Lanford, 55, on leave from the presidency of the College of Fre-

donia, becomes vice chancellor for campus development. He will have the responsibility for an overall facilities program relating campus physical development to academic program projections.

Dr. Lanford was president of the College of Fredonia since July 1, 1961. He also will continue his responsibilities as director of the Chancellor's Panel on University Purposes.

Dr. Murray H. Block, 46, president of Borough of Manhattan Community College for the past five years, becomes deputy for the chancellor for campus relations. In his post in Albany, he will have responsibility for maintaining open communications between the campus presidents and the chancellor regarding university-wide matters, and seek ways to involve the presidents and other campus groups in overall policy and planning.

Dr. Block was dean of New York City Community College from 1960-62 and acting president from 1962-65.

Gordan A. Christenson, 38, assistant to the president, University of Oklahoma, will be university dean for experimental and extension programs. He will be responsible for the university's program in continuing education and development of new methods to further extend opportunity beyond the campus.

At Oklahoma Dr. Christenson's duties included responsibility for university policy, academic innovation and long range planning. He also held faculty status as associate professor of law.

Edgar R. Thomas, 48, professor of physiology and associate dean of faculties at the University of Missouri at Columbia, becomes university dean for international education. He will administer the university's efforts in international education and its study abroad programs.

Previously, Dr. Thomas had served in the State University's Indonesian Project. From 1963 to 1965 he was visiting professor of biology and consultant in science education and in 1965-66 was associate coordinator of the project.

SA Moves Toward Housing With Bid on Mohawk Land

Central Council has passed a bill appropriating up to \$2,000 to be used in securing an option on land adjacent to the Mohawk Campus. According to Michael Lampert, vice president of Student Association, the land is being considered as a site for new student housing. The land being sought encompasses about 65 acres, and Mr. Lampert indicated that there may be other tracts of land in the area which would also be available to Student Association.

Noting both the current shortage of private and university housing and the uncertain prospects of construction to meet future housing needs, Mr. Lampert expressed the hope that Student Association could provide from 1,000 to 4,000 units of housing. If all legal and financial arrangements go smoothly, some units might be ready as early as one and a half years from now.

The plan is not merely to provide more housing, however. It is to build "an integrated, ecologically-balanced community," Mr. Lampert explained. Such a community would function in harmony

Corporations Studied

Walter Goldstein, professor of international relations, will conduct a study of the role of multinational corporations in the economic and technological growth of Western Europe in a new project sponsored by the Twentieth Century Fund.

Most multinational corporations are American in origin, according to Professor Goldstein, and when evaluated together have a net worth exceeding the gross national product of either Great Britain or France.

In his study Dr. Goldstein will deal with institutional reforms, evaluating proposals and making recommendations. He will also be involved with the question of whether reforms can correct abuses and dispel national anxieties.

Other issues in the study will be the extent to which executives, staffs, and board members are composed of foreign nationals and the threat to natural resources created by the corporations.

Items will be repeated only once every four issues and must be resubmitted each time.

with its surroundings and seek to eliminate problems of pollution and destruction of the environment.

If Student Association is successful in obtaining an option on the land, tests will begin to determine if the site is suitable for the type of housing planned. Observing that "the opportunity presented itself" for the land near the Mohawk, Mr. Lampert said that Student Association is also interested in other Capital District areas.

BERNIE BOGGS (25) slices through the Siena defense during Albany's 25-24 Homecoming victory. Boggs led all runners with 159 yards gained and also scored 11 points on a touchdown, field goal, and two extra points.

Annual Cross-Country Invitational To Feature C.W. Post's Stonitsch

The fourth annual Cross-Country Invitational will begin at noon Saturday. Last fall, some 230 runners from 23 colleges and universities competed in three divisions.

This year, 15-20 teams are expected to enter the varsity race and 10-12 each in the junior college and freshman/junior varsity divisions. Defending varsity champion Boston State will not compete due to a previous commitment. The favorite is C.W. Post, which finished second a year ago and is paced by All-American Ron Stonitsch.

Paterson State of New Jersey and Syracuse University figure to give Post the toughest competition, followed by Albany, Colgate, Trenton (N.J.) State, and Springfield.

Stonitsch, the NCAA College Division champion, holds the five-mile Albany course record of 24:57 and has won the varsity division the past two years. He also won the freshman event three years ago and his time stood as the 3.5-mile course mark until broken last year by Bruce Fischer of Syracuse. Fischer will challenge Stonitsch in the

Machine Breakdowns

To obtain reimbursements for monies lost in vending machines or to report a malfunction of a machine contact the person listed below according to location of machine. The contact persons are Sandra Stratton, 7-7600, (podium); Hillary Lubin, 7-8881, (State Quad); Halina Michnicki, 7-8601, (Colonial Quad); Sally Palmer, 7-7900, (Dutch Quad); Maxine Peacock, 7-3989, (Indian Quad); Betsy Wagner, 2-7671, (Brubacher); Mary McGloine, 2-7506, (Alden); and Anne Safranko, 2-8027, (Waterbury).

'Round the Campus

The highest national award in the field of landscaping excellence has been given for outstanding landscaping at SUNYA to the State University Construction Fund at a ceremony held in Washington. Making the presentation for the American Association of Nurserymen was Secretary of the Interior Walter Hickel. . . Richard Russell heads the newly-organized student Vets Club which will hold its next meeting Thursday noon in BA 12. . . Edward Gorn, Canadian Vice-Consul, Canadian Consulate General, New York City, recently visited the campus where he participated in a symposium on Canada today sponsored by the history department. . . Alton Farnsworth, executive director of the Capital Area School Development Association, with headquarters at SUNYA, has received the unusual honor of having the new middle school at Guiderland named for him. Mr. Farnsworth, in addition to his CASDA duties, lectures in educational administration in the School of Education. . . For the convenience of the university community, Stuyvesant Plaza runs a free bus Monday and Friday nights and all day Saturdays from the campus to the shopping center. . . Bill Byrnes, Administration 349, has information for faculty and professional staff about life insurance at low

rates offered by the Teachers Insurance and Annuity Association. Other types of coverage also are available at rates lower than those offered by major companies. . . 5300, a personal telephone service for students with problems, has opened on a 24-hour basis. . . The Music Council will present Creative Associates, under the direction of Lukas Foss, Friday evening at 8:30 at the PAC. . . Notifications about special parking permits are in the mail. . . An effort to get out the vote will be made Thursday and Friday when interested students will distribute information along Central Avenue. Also publicized will be the Student Mobilization Committee march to the Capitol on Saturday.

Faculty Notes

JOHN MORGAN, financial aids, spoke on the Law Enforcement Education Assistance Program and the Nursing Loan and Scholarship Program available to college students at a Financial Aids Conference at Saratoga College in July.

JAMES TEDESCHI, psychology, is the author of a chapter, "Threats and Promises," in *The Structure of Conflict*, edited by Paul Swingle and published by Academic Press.

WALTER ZENNER, anthropology, has written an article, "Joking and Ethnic Stereotyping," which appeared in the April 1970 issue of the *Anthropological Quarterly*.
