UNION REPRESENTATIVES BRIEFED ON EMPLOYMENT IN SUBSECTIONS-IG&M DEPT.

Good news on employment situation comes to us by way of our Union representatives in the Large Generator & Motor Department.

Last Friday, Ass't. Business Agent Christman, Board Members Wager, DeMarco and Koral and Trustee DeCresce met with the Superintendent of the A.C. Sub-Section, formerly known as the MAC Department.

The meeting was held for the purpose of evaluating the employment status in certain sub-sections of the Department and to gain an insight of the employment outlook for the first quarter of next year.

Our representatives were informed that the UHI Large Induction Motor load has increased 10% since their last meeting with management 3 months ago. This has meant an increase of approximately 40 direct labor employees.

The steady increase of orders and jobs in the A.C. Sub-Section has been brought about in large measure by drastically reducing the work cycle in the manufacturing of UHI Motors which enables the sales staff in the Department to accept both foreign and domestic orders requiring prompt delivery.

The upsurge in business has caused some excessive overtime in the past 4 or 5 weeks; however, this condition is presently being remedied by increasing the number of employees.

The Atomic Motors Sub-Section has doubled its work force since January of this year and is employing a few more people at the present time.

Meanwhile, the work load in the Medium Induction Motors Dept. will remain stable for the balance of this year and the first quarter of next year.

If and when similar reports covering the employment situation in other departments of G.E. are received, the results will be published in the Local 301 News.
