College Will Be Scene Of Annual Exploration

Freshmen! Would you like to peer and poke into all the dark, mysterious corners of the College buildings? Would you like to crawl through ventilators and over beams or watch the faculty males perform Herculean feats of strength?

If you would, the annual mascot hunt will give you the opportunity. It is a tradition of State college that once a year the buildings undergo a thorough inspection by the freshmen looking for the mascot which the sophomores have hidden.

Class of '37, your chance will come from midnight on Sunday to midnight on the following Saturday of the first full week in May. All hunting outside College hours must be supervised by Myskonia, senior honorary society.

BEST WISHES—1936!

The class of 1936 makes its debut into State college society tonight when it conducts its first annual dance in the Aurania club. It also turns the spring spotlight upon the inauguration of the social activities of this season. May the sophomores, supported by the whole-hearted cooperation of all members of the other classes, make this their night—one to be looked back upon as a most successful beginning to a most successful social background for their remaining two years at State college.

This will be the second year that the banner rush rules have been in effect at the annual Sophomore Soiree, and we trust that this year the lack of competitive spirit will add as much, if not more, to the success of the first "real" social function that the class has conducted as it did last year. Our best wishes are yours!

COMMITTEE ORGANIZES

In the last issue of the News an editorial concerning the status of the activities office was printed. This editorial was criticized by some as being too harsh, but we felt then, and we feel now, even more strongly, that the contents of this editorial were justified. Monday morning when we entered the activities office we were confronted by such a brilliant array of colors and animated jocularities that we at first thought we were behind the times and had joined the Easter Parade a week late.

The Committee of Control is now definitely organized, and we feel certain that it will soon have conditions in the office so well controlled that the scene will be transformed from one of social lounging to one of actual business efficiency. Now that the committee is ready for action, it will need the whole-hearted support of every member of each activity having a desk in the office. With such support and with persistence toward the aim of making the activities office active—but active in the sense of college business affairs and not private social gatherings, the office will indeed become an asset to the lower corridor of Draper hall and to the College.

Books

By R. E. W.

The Flowering Thorn by Margery Sharp. G. P. Putnam's Sons, New York. 311 pages, \$2.50.

It may seem strange that a modern young woman of Lesley Frewen's type should suddenly decide to adopt a son of only four and one-half years and move to a cottage in a small English town leaving behind her all of her society friends and much-loved activities. Yet, in a most realistic and very fascinating manner, Margery Sharp weaves a story about the character of Lesley Frewen which displays her gradual but definite change from the seemingly more superficial city life and friends to the more substantial and sincere life of the country and its colloquial mannerisms.

The story carries a quiet but pleasing humor throughout—shadowing the more serious plot concerning the true devotion of a real love which has been masked by exterior fascinations but which finally breaks through to encircle the entire life. The book is well written and will interest the most critical of readers.

The company is conducting a contest which should prove of great interest and direct appeal to all women of the College. The contest, as explained by the company is as follows: "A prize of fifty dollars in cash will be awarded to the woman submitting the best letter (not more than 250 words) describing her personal reaction to *The Flowering Thorn*. The letter must be in the publishers' hand on or before June 1, 1934. To the women submitting the ten next best letters, the publishers will give the choice of any one of the Putnam Spring publications. Letters should be addressed to **The Flowering Thorn Contest Editor, G. P. Putnam's Sons, 2 West 45th Street, New York City.**"

The Story of a Country Boy, by Dawn Powell. Farrar and Rinehart, New York. 303 pages, \$2.50.

By mere chance, it was Chris Benett who accepted old Mr. Westley's offer to work in the foundry at a very small salary. He had no excuse to offer Westley as did his friend, so the job fell to him. Chris worked hard at the foundry and finally was promoted to a position in the city. He and his country-girl wife, Joy, found themselves in an atmosphere quite unfamiliar, but they quickly adjusted themselves to their new environment. Joy became absorbed with bridge parties and society while Chris met other women who attracted him greatly.

Fortune played her hand and the self-made man found himself confronted by defeat. However, as such a man usually does, Chris rose from his unfortunate condition and returned to the farm. Miss Powell leaves the thought with the reader that Chris and Joy are not really happy and that perhaps they do not actually regret so much as they may appear to on the surface.

Miss Powell's plot is a familiar one but well developed and characterized by a humor which adds to the appeal of the story without destroying the seriousness of the more trying situations. She portrays the effect of the depression upon a self-made character such as that of Chris, how it has revealed to many of them the fact that they really are not geni, but only human beings subject to the lot of the average person.

Cleopatra by Gaston Delayen. Translated from French by Farrell Symons. E. P. Dutton & Co., New York. 280 pages, \$3.75.

Love and an ability to use it deftly in obtaining power for oneself can accomplish many ends. Cleopatra lacked no ability in the fine arts of using her love as power, and in this book Gaston Delayen tells the story of her life. The story follows history rather closely. In an exceptionally interesting manner, it develops the way in which this woman intermingled social desires with political cleverness to bring power to Egypt.

"Anthony and Cleopatra had each desired that strange marriage for personal motives—Cleopatra, in order to aggrandize her realm and crush more easily the opposition to her government at home; Anthony, in order to obtain what he needed for his expedition against the Parthians." Another quotation reveals the human element in Cleopatra's life: "Nevertheless, whatever may have been her conception of love, though she had made of it a sport or a means to an end, and though she were a queen and Cleopatra, she was, after all, only a human being."

This book would be of especial interest to students of history and Latin.

Robert E. Lee, a biography, by Robert W. Winston. William Morrow & Co., New York. 428 pages, \$4.00.

To be beloved by one's friends is a natural expectation, but to be a leader beloved by both friends and members of the opposition is an indication of a truly noble and dynamic personality. Such was the character of General Robert E. Lee. Robert Winston asks: "What manner of man could Lee have been to provoke such admiration? How did he succeed in winning the love of his very enemies? The answer must be that the General was a good sportsman; he fought hard but fought clean and when he surrendered, he surrendered." Judge Winston writes the story of the life of Lee as he has found it from many documents hitherto unpublished, from anecdotes, and from incidents related to him by aged soldiers. The book contains many illustrations which are in themselves of great value to any true lover of books and of history.

Any student of American history should welcome the opportunity to place a copy of this book in his library and to know the incidents of Lee's life from his days at West Point through the trying years of the Civil War to the end of his life, as Judge Winston tells them.

Dr. Thompson Reveals Interesting Facts

About Members of Senior Honor Society

(Editor's Note—The following article was written for the STATE COLLEGE NEWS by Dr. Harold W. Thompson, professor of English and faculty member of Signum Laudis, senior honorary scholastic society.)

At the recent dinner of Signum Laudis at Rainbow's End, when the second dozen members of the class of 1934 were welcomed, Dr. Harold W. Thompson, professor of English, followed the custom of years by giving statistics and facts about the honorary society and its members.

This year twenty-four members in all were elected from a class of three hundred. Six more could have been taken in to make up the first tenth of the class, if there had been those available whose standings were above the required minimum average of 2.00. This is by no means the first time, however, that the first tenth of the class has failed to meet the very high requirements. In the first group of twelve, elected in the autumn, the highest average and the highest in the history of the society was Evelyn Wells' mark of 2.87; the others ranged down to 2.18. The range of the second group was from 2.33 to 2.01.

Dr. Thompson speculated upon the effect of our increasingly high entrance requirements. This year the lowest average for any freshman entering the A. B. course was a Regents' record of 86.5. All but four candidates entering for the commerce course had an average of 85 or higher, and the four exceptions stood at 84. The College refused 265 freshmen with Regents' averages of 70 to 84, and accepted no less than 126 freshmen with a Regents' average of 90 or above. Two of the seniors who just received the award of Signum Laudis did not have four years ago a Regents' average high enough to enter with the present freshman class.

For the first time in the history of the society, an English department, the largest in College, led in number of members. Of the 24 members of the society, 7 have English as a major subject and 10 as either a major or minor subject. French follows with a total of 7 majors and minors, Latin and mathematics having 6 each in total. In previous years, history and mathematics have been the leaders in practically every tabulation.

Dr. Thompson complimented some of the new members highly on the variety and worth of their selections; Edith DeHollander, for instance, has elected, in addition to her courses in English and library science (her major and minor) an excellent variety of courses

DEAN MORELAND HAS RESIDENTIAL INSPECTION TOUR

Miss Helen H. Moreland, dean of women, and Mrs. Bertha E. Brimmer, '00, executive secretary of the alumni association, both members of the housing committee for College students, began Tuesday a tour of inspection of houses applying for positions on the approved list for College student residence. This inspection will not, at the present time, include sorority or group houses, Miss Moreland said.

A report of the conditions found at each house will be presented to the housing committee which will then compile a list from those houses which most nearly meet the College standards. The committee includes the following members: Miss Moreland, chairman, Mrs. Brimmer, Miss Edith O. Wallace, assistant professor of Latin; Dr. Elizabeth H. Morris, assistant professor of education; Dr. Caroline C. Crossdale and Dr. Marie E. Green, College physicians; and Dr. Minnie B. Scotland, assistant professor of biology.

In the new 1934-1935 Annual Catalogue, under the section concerning general information and residence, is the following statement: "No student will be considered regularly enrolled and in good standing unless he resides in a house which is on the approved list or unless he possesses the written approval of the Dean of Women."

The approved list will be available for students by July first, Miss Moreland added.

Who said depression? The New York State Department of Regents has paid \$14,500 to state collegians this year in scholarships. Of this \$9,550 was received this week.

- Seniors 67
- Juniors 77
- Sophomores 69

Last semester there were two more scholarships distributed here than there were this semester, Miss Van Denburgh, registrar said.

Biology Club Members Will Visit New York

Biology club will conduct its annual trip to New York city on Sunday, according to Gertrude Rosenberg, '34, president. The party will leave Albany at 7:05 in the morning.

The points of interest the club members will visit include: Bronx Zoo, Central Park, Museum of Natural History, the Metropolitan Museum of Art, and Radio City. However, upon arrival in New York, the party will divide into two groups for sight-seeing. Dr. Minnie B. Scotland, assistant professor of biology, will lead the excursion. Changes ranging from the addition of a single course to an almost complete revision of a departmental schedule are listed in the new annual catalogue for the year 1934-35 that will soon be available. New requirements for freshmen and for Master of Arts and Master of Science in Education degrees are also among the revisions.

The Biological Science department, formerly the biology department, is now composed of nineteen courses compared to eight for previous years. Commencing next year, typewriting will not carry College credit. The Earth Sciences department, composed of the former departments of geology, meteorology, geography, and astronomy, will offer general geology and descriptive astronomy next year.

Readings in literature, a two hour course for one semester, will be required of all freshmen. It is a general course intended to keep them interested in good reading and accustomed to reading for pleasure in hours of leisure. Several of the present courses will be dropped, and a two hour, one semester class of advanced studies in Renaissance literature added.

Miss Perine Announces Retirement of Organist

Miss Eunice A. Perine calls the attention of the music lovers of the College to the retirement of Charles Widor from the post of official organist of the church of Saint-Sulpice, in Paris. Mr. Widor, besides being a world-famous organist, is also a composer.

In the February 18, 1927, issue of the News, Miss Perine describes the Christmas day service at Saint-Sulpice. In this story Miss Perine states: "Sometimes the music was so low that it was like sensing rather than hearing the sound, and then it would rise and swell, echoing through the lofty arches, flooding through the great spaces, and gathering us all into the rapture of its triumphant harmony that with its final strains told the old, old story."

COLLEGE TO PICK COUNCIL NOMINEES FOR NEXT YEAR

(Continued from Page 1, Column 1)

Balloting for student association officers will be conducted in the student assembly next Friday (April 27). Ranked today. The program will also include the annual rivalry debate between teams representing the freshman and sophomore classes.

The debate will argue the question "Resolved: That the human race is slowly becoming a race of lunatics." The sophomores will present the affirmative point of view, while the freshmen will defend the negative side. The class winning the debate will be awarded two and one-half points toward the interclass rivalry cup. At present the sophomores are leading in rivalry with eight and one-half points to their credit. Robert Benedict, Lillian Shapiro and Erwin Slinger will represent the class of 1937, with John Murphy and Harry Gumaer as managers of the team, which was chosen by Donald C. Bryant, instructor in English.

Edward Kramer, Evan Pritchard, and Aubrey Kalbaugh are representatives of 1936. Frank Hardmeyer will act as manager, and Dr. Harold W. Thompson, professor of English, will coach the team which Dr. Thompson and Miss Caroline Lester, instructor in mathematics, chose.

An interclass debate between freshmen and sophomores was an annual event for several years, but last year it was not conducted. The last debate was in 1932, between the class of 1935 and the class of 1934, when the latter was victorious.

ARE YOU A NEWSPAPER CRACKLER?

How are YOUR nerves? TRY THIS TEST

Take two long lead pencils with very blunt points. Grasp one pencil in each hand, with the tips of the fingers. Extend both arms straight out from your sides, then bring the arms slowly together in front of you with the pencils pointing toward each other. See if you can bring the points together—the first time without stopping—no first time how slowly—but keep moving all the time, striking the points together, tip on. Average score: hitting on third try.

Orison MacPherson (Camel smoker), well-known illustrator, completed the test the first time.

Impatience? No. It's jangled nerves

Are you the kind of wide-awake, "on-your-toes" person who hates to be kept waiting? Then you should be doubly careful about jangled nerves.

If you find yourself nervously crackling your newspaper—drumming your fingers on the table—jumping at unexpected noises—then watch your nerves.

Get enough sleep—fresh air—recreation. And make Camels your smoke.

For you can smoke as many Camels as you want. Their costlier tobaccos never jangle your nerves.

— what it means — to store

70 million dollars worth of tobacco

— 4½ miles of warehouses

Everything that Science knows about is used in making Chesterfields.

One thing we do is to buy mild, ripe tobaccos and then lock up these tobaccos in modern storage warehouses to age and mellow like rare wines.

It takes about 3 years to age the tobaccos for your Chesterfield, for Time does something

to tobacco that neither man nor machine can do.

It means something to keep 70 million dollars worth of tobacco in storage. It means just this:

We do everything possible to make Chesterfield the cigarette that's milder, the cigarette that tastes better.

the cigarette that's Milder
the cigarette that TASTES BETTER
