Jarka M. Burian, professor of speech and dramatic art at State University of New York at Albany and producer-director of Arena Summer Theater at the university, will deliver the Annual Faculty Lecture Tuesday evening, October 18, in the Dutch Quadrangle dining room at the uptown campus. The lecture is co-sponsored by the university and by the university's chapter of the American Association of University Professors.

Professor Burian, who has been with Arena Theater since 1959, will speak on "Europe 1965: Theater West and Theater East." He did research on arena theater when he was a graduate student and his study of the subject was published. While in Czechoslovakia in 1965 on a State Department grant Professor Burian gave a series of lectures on American drama and American theater at the University and Theater Academy. He also was guest director of a production of "The Glass Menagerie" at a state repertory theater.

During the past summer Professor Burian was in Czechoslovakia where he presented a paper about arena theater at the invitation of the International Scenographic Symposium. The six-day meeting, sponsored by the Scenographic Institute in Prague, was attended by some 200 persons from 23 countries.

The public is invited to the lecture which will be followed by a reception.

College seniors preparing to teach school may take the National Teacher Examination at State University of New York at Albany on Saturday, March 18, 1967, under the supervision of Dr. Norman Greenfeld, associate professor of psychology at the university. The test will be given in the Social Sciences building in room 261.

Date of the examination to be given on the Albany campus was announced by Educational Testing Service, a nonprofit, educational organization which prepares and administers the testing program.

A bulletin of information containing a list of test centers, and information about the examinations, as well as a registration form, may be obtained from college placement officers, school personnel departments, or directly from National Teacher Examinations, Box 911, Educational Testing Service, Princeton, N. J. , 08540.

Results of the NTE are used by many large school districts as one of several factors in the selection of new teachers and by several states for certification or licensing of teachers. Some colleges also require all seniors preparing to teach to take the examinations.

The 50th anniversary of the founding of a student press at State University of New York at Albany was noted this week with the appearance of a special 12-page issue of the Albany Student Press, a bi-weekly publication at the university.

An 8-page insert featured mast heads of the current newspaper's predecessors, representative articles, advertisements, and photographs published over a half century.

The original publication, State College News, was an early journal established through the efforts of the class of 1918 under the editorship of Alfred E. Dedicke which first appeared on October 4, 1916, for five cents a copy. Forty-seven years later, on February 8, 1963, the name was changed to State University News. Then, a year later, on February 14, 1964, the publication appeared under its present name, the Albany Student Press. It was during the original publication's first year that a student tax was levied enabling the publication to be printed on firm financial footing. The paper began to be published bi-weekly in the spring of 1964.

An article in the special insert reads in part, "In 1964 the present title was adopted. A response to confusion over the paper's source of authority, the title Albany Student Press is meant to demonstrate that the paper is a student publication. Supported, staffed, and managed solely by students, the paper represents and serves the interests of the student body. It reflects the University, but it can never represent the institution in any official way".

The cross country runners of the State University at Albany suffered their worst dual meet loss in four years Saturday, falling to a powerful Holy Cross contingent, 18-43.

Jim Quinn of Cross took individual honors with a time of 22:20 over the 4.3 mile course. Junior co-captain Joe Keating of Glens Falls had the best Albany showing, as he finished third at 22:59. The State harriers now sport a 1-1 record this season in dual meets and face a difficult task Wednesday when they engage in a double dual meet with R.P.I. and Siena at Troy.

One of the few bright spots in an otherwise lacklustre performance at Holy Cross was the improvement of the other co-captain, Bob Mulvey, a junior from Geneseo. Usually the No. 5 runner for the Great Danes, Mulvey ran second behind Keating and came in seventh overall.

Mike Attwell, a Herkimer sophomore, is generally the No. 2 man for coach Bob Munsey's forces, but an injury slowed him down considerably Saturday and he doesn't figure to see any action this week.

Munsey views the R.P.I. encounter with apprehension and cautions that the Danes will need a strong effort to defeat the well-balanced Engineer squad. The meet is scheduled for 4:00 on the Trojans' course.

Saturday will find the State club heading north for a 1:30 meet with Plattsburgh and the going should be much easier in that one after an exceedingly difficult schedule thus far.

The Albany frosh, also heavy losers to Holy Cross, will be in action at R.P.I. at 3:30 Wednesday.

STATE UNIVERSITY OF NEW YORK AT ALBANY

135 WESTERN AVENUE, ALBANY, NEW YORK 12203

A Homecoming game with Potsdam at 2:00 Saturday highlights this week's soccer action for the State University at Albany team, which broke into the win column for the first time with a 4-1 victory over Brooklyn College last weekend.

Coach Joe Garcia's booters snapped a three-game losing streak as Maurice Tsododo scored twice and the State defense played its best game of the campaign to stop Brooklyn.

Tsododo, a senior from Rhodesia and last year's high scorer, is on top in the 1966 point race, too, having tallied four goals thus far.

Yutula Sililo, a soph from Zambia, and Craig Springer, a Levittown soph, accounted for the other two goals in Saturday's triumph. Garcia praised the whole squad for playing its best game of the year and indicated that the Danes played a better game than the final score suggested in a 7-2 loss earlier in the week to undefeated New Paltz.

Looking ahead to this week's contests, Albany faces two tough foes in Oneonta, who it plays away 4:00 Wednesday, and Potsdam.

The Danes will need superior efforts to stay with these clubs, as Oneonta sports 11 lettermen from last year's 6-6 club and has looked strong in winning three of four games so far this season; while Potsdam was undefeated last year and has nearly everyone returning.

A large crowd is expected for the Homecoming game Saturday and a strongly partisan gathering could provide the impetus for an Albany upset.

The State frosh also have a pair of games slated this week.

Over 320 men and women have taken advantage of the comparatively new program in general studies at State University of New York at Albany which offers advanced education to residents of the capital area. The enrollment is triple that of a year ago when the program, which provides educational opportunities for qualified men and women beyond normal college age or for those unable to attend college full-time during the day, began.

Mrs. Jean Boggs, assistant to Dr. Irving A. Verschoor, Dean of General Studies, reports that 136 of the new enrollees are men and 184 are women with half of the total number under the age of 25. The remaining half ranges from 26 to 61 with a sizeable number over 45 years of age.

Three-fourths of the students are undergraduates whose previous schooling varies from a high school education to two or three years of college work. Included in the group are business and nursing school graduates. A large percentage of all the undergraduates hopes to gain a baccalaureate degree in time. Among the fourth who already hold degrees, including one person with a doctorate in education, many are preparing to go on for further degrees. A third of the students were in the general studies program last year.

The most popular courses are freshman English composition, introductory philosophy, general chemistry, statistics, calculus, introduction to psychology, and computer science. Most all students expressed interest in taking at least one course in the social sciences and enrollment is largest in history, economics and government.

- more -

Dr. Verschoor, who has been on the faculty of the university since 1961, formerly was Dean of School of Library Science. In his new post he directs a rapidly expanding program in general studies established to provide the opportunity either to continue or to begin collegiate study or to study on a non-credit basis.

Dr. Verschoor also is concerned with the University of the Air program, the Rensselaerville Institute on Man and Science, now affiliated with SUNYA, and a broadened program of continuing education for adults. Projected scope of the latter includes courses to assist people in their respective positions, to broaden cultural horizons and to serve in community undertakings. Summer seminars and weekend institutes are planned.

Dean Verschoor holds degrees from Fordham, New York, and Columbia universities and from the Royal College of Science, Toronto. Before joining the faculty at SUNYA he was director of the State Education Department's library extension service.

Dr. Martin Levey, science historian at State University of New York at Albany, will give a series of four public lectures on ancient science at the university commencing Wednesday evening, October 26.

Dr. Levey, winner of the 1965 Dexter Award of the American Chemical Society, came to the university this year from Rockefeller University in New York. He is the author of some 11 books and innumerable articles covering his research in physics, mathematics, pharmacology, mineralogy, botany, zoology and medicine. His volume, "Chemistry and Chemical Technology in Ancient Mesopotamia", is the only one of its kind on the subject. Dr. Levey reads 30 languages and speaks 15 tongues.

The scheduled lectures are as follows: "The Dawn of Chemistry in Ancient Babylonia", October 26; "Medicine and Ancient Egypt", November 2; "Early Arabic Pharmacology", November 9; and "Hebrew Science and Middle Ages", November 16. The lectures to be given in room 248 in the biology building on the university's uptown campus will begin at 7 p. m.

Dr. Levey will bring to the series, being offered as a community service, an unusual combination of viewpoints--those of an archeological chemist and historian of science as well as those of a student of ancient cuneiform languages and of Near Eastern tongues which followed the latter.

The Albany professor earned his bachelor's degree in chemistry at Temple in 1934 and went on to graduate study in physics, physical chemistry,

Three members of the Art Department at State University of New York at Albany are exhibiting works in a number of shows throughout the country. A one-man painting show which opened at Cornell University on October 10 features the work of Edward P. Cowley, chairman of the department.

Associate professor William H. Wilson exhibits a group of paintings, sculpture, and drawings at Hudson Valley Community College this month. Most of the works in the exhibition were executed in Mexico during the past year. Mr. Wilson worked there during a sabbatical leave and through a summer grant from the Research Foundation of the State University of New York. Another painting from the Mexican series is a prize-winner in the current Berkshire Art Association Exhibition at Pittsfield, Mass. Mr. Wilson preceded the current exhibits of his Mexican work with a one-man show at Antonio Souza gallery in Mexico City.

A painting entitled "Bierce and the Witch" by assistant professor Thom O'Connor also has received an award at Pittsfield.

Mr. O'Connor, who is both painter and printmaker, is one of five artists participating in a New York exhibition called "Prints and Poetry" at Associated American Artists. He has collaborated with the poet Arthur Plotnik on a folio of prints entitled "Cabalists and Wizards".

Dr. Florian A. Muckenthaler, assistant professor of biology at State University of New York at Albany, has received a \$21,000 award from the National Science Foundation for the support of research to be conducted under his direction at the university.

The grant, entitled "Cytoplasmic Synthesis of DNA During Oogenesis and Early Embryonic Development in *Drosophila Melanogaster*", will be used in a study of unusual heredity-determining material in the later stages of egg development in the female fruit fly and of the fate of the material during the early hours of life in the embryo. Research will continue over a two-year period.

Dr. Muckenthaler, who lives at 228 Western avenue, Albany, received his undergraduate degree from Spring Hill College, Mobile, Ala., and his doctoral degree from the Catholic University of America, Washington, D. C. He was a NSF predoctoral fellow at the latter institution for three years. Later he was a Public Health Service Postdoctoral Fellow in Cell Biology at Johns Hopkins University, Baltimore, Md.

The Albany university professor is a member of the American Association for the Advancement of Science, American Institute of Biological Sciences, American Society for Cell Biology, and Sigma Xi.

A proposal to establish a School of Nursing offering science degrees in nursing education at State University of New York at Albany was approved today by State University's board of trustees. The program is designed to prepare candidates for teaching positions in schools of nursing and for supervisory and administrative positions in medical service centers.

Studies will be carried out in medical-surgical, maternity-child care, psychiatric and public health. According to university officials, the program may lead to further degrees in addition to those of degrees at the bachelor's and master's levels.

The Hudson Valley League for Nursing conducted studies which revealed the need for such a publicly supported program in the northeastern area of the state. Of the 21 institutions in New York State offering a BA program in nursing, only two are in the State University's system, one at Plattsburgh and one at Buffalo. Students enrolled in four-year programs at area private colleges reportedly include few from the immediate vicinity.

Tentative plans call for a degree program of 120 to 135 semester hours, one-half of which will be in general liberal studies and the balance in nursing. All work, including that in supporting clinical facilities, would be under the supervision of university faculty. Area clinical facilities would be used to

From: STATE UNIVERSITY OF NEW YORK AT ALBANY

Page 2

provide necessary practical experience but basic course work would be conducted at the Albany university's uptown campus, including provisions for instruction and demonstration in hospital room techniques. The university already offers a baccalaureate program in medical technology in cooperation with Albany Medical College.

Spokesmen said that personnel would be added to the university staff by February 1967 to prepare for the first class of 40 students in September of 1967. A like number is expected to be added regularly during the undergraduate program over a period of years with appropriate staff additions planned to keep pace with growth.

STATE BOOTERS EVEN SEASON MARK

The soccer team of State University at Albany has recorded three straight victories to even its record at 3-3 with four games remaining on the 1966 schedule.

The Great Danes defeated Oneonta, 3-2, and Potsdam, 2-0, last week and have allowed only three goals in the last three games.

Senior Maurice Tsododo of Rhodesia scored all three goals against Oneonta and one against Potsdam to give him a total of eight for the season. Yutula Silio of Zambia accounted for the other tally in the Potsdam contest.

Coach Joe Garcia singled out Tony Glaser, a junior halfback from Elmont; goalie Jerry Leggieri, a Hudson junior; Tim Jursak, a Utica junior fullback; and Dick Szymanski, a senior halfback from Wayland, for their outstanding play last week.

The Potsdam encounter was played before a Homecoming crowd of more than 2,500 at the new University Field. It was one of the largest gatherings in Albany soccer history. The visitors arrived with a 4-0-1 mark and rated the role of favorites, but the Danes were "sky high" for the game and pulled an upset of sizeable proportions. The defense, especially, turned in a fine effort in blanking the invaders.

Joe La Reau, a junior from Albany who had been alternating with Leggieri in the nets, has developed a cyst on his instep and may be through for the season. Otherwise, the squad faces the rest of the season with understandable optimism, having matured greatly since the beginning of the year.

ALBANY HARRIERS REBOUND

The State University at Albany cross-country team captured a pair of meets last week to successfully rebound from its worst loss in four years at the hands of Holy Cross two weeks ago.

The Bob Munsey-coached harriers surprised a capable RPI club, 22-33 Wednesday and soundly defeated Plattsburgh 18-43, in a Saturday road contest. The twin wins left State with a 3-1 mark this season and a phenomenal 35-4 record over the past four and one-half years.

In the RPI meet, Albany runners nailed down the second through fifth places as co-captains Joe Keating of Glens Falls and Bob Mulvey of Geneseo, Don Beevers of Cobleskill and Paul Breslin of Binghamton helped give State its largest victory margin over the Engineers in the four meets between the neighboring institutions.

The fifth Albany runner, Grant Downs, passed five RPI men in the last mile and one-half for a seventh place finish.

The Plattsburgh event saw Albany runners sweep the first three positions with Keating winning in 24:21.8 followed by Mulvey and Beevers.

The Great Danes will be in action twice this week, hosting New Paltz Tuesday at 3 p.m. and participating in a four-team meet at Van Cortland Park, New York City with St. Francis of Brooklyn, Adelphi and Rider Saturday.

The Albany frosh, 24-33 victors at RPI, will run at Cobleskill A&T Thursday. Jim Keating, brother of the varsity co-captain, set a frosh course record at RPI Wednesday as State runners captured the first three places.

Max Fisch, professor of philosophy at the University of Illinois, will lecture on Charles Sanders Peirce Wednesday evening, Oct. 26, at State University of New York at Albany. His talk, entitled "The Wasp and the Bottle", will be given in the lower lounge of Brubacher Hall beginning at 8 o'clock.

Mr. Fisch, one of the most knowledgeable scholars in the field of American philosophy, has been working on the Peirce papers at Harvard in preparation of a two-volume biography and assessment of one of the major philosophers in Western cultural history. Peirce, through his influence on William James and Henry James, affected both psychology and American literature. He was directly involved with astronomy and the Dudley Observatory at Albany, through his publishing and his father and, through his pupil, John Dewey, Peirce affected American education. In short, the philosopher was close to the whole spectrum of American intellectual life at the turn of the century.

Sponsors of the lecture, for which there will be no admission charge, are Dudley Observatory and the departments of comparative literature, history, philosophy, and foundations of education at SUNYA. Berkley Peabody, professor of comparative literature at the university, is chairman of the program.

Dr. Glyn. Morris, noted innovator in the field of guidance, will give the key note address at a conference of the Capital District and Personnel Guidance Association at State University of New York at Albany on Wednesday, October 26.

The conference on "Understanding Human Relations and Its Importance to Guidance Programs" has been planned by the Capital Area School Development Association in cooperation with the personnel and guidance groups. Dr. Morris, co-author with Dr. Ruth Strang of several books on school guidance, received international recognition at the time of his development of the Pine Mountain school project. He now is district assistant superintendent at Lyons Falls and the originator of a number of experimental programs with guidance overtones in Lewis County.

The conference, to be held at Brubacher Hall, opens with registration at 9:30 a. m. followed by Dr. Morris's address beginning at 10 o'clock. Group sessions are scheduled from 10:30 until noon. Following lunch, group reports will be given at a general session and Dr. Morris will sum up the findings.

International visitors at State University of New York at Albany within the next two weeks will include educational administrators from Australia and from England.

Visiting the School of Education at the university, through the invitation of Dr. Kenneth Frasure, associate dean of the school, will be W. B. Russell, deputy director of the education department, Melbourne, Victoria Province; Norman F. Dufty, principal of commerce and administration at Perth Technical College, Perth, Western Australia; and B. S. Braithwaite, chief education officer, East Sussex County Council, Lewes, Sussex, England.

The visitors are among those attending the Conference of International Administration and Inter-Visitation sponsored by the University Council for Educational Administration with the support of the W. K. Kellogg Foundation. Opening session of the two-week conference was held recently at the University of Michigan at Ann Arbor with Dr. Frasure, chairman-elect of the National Conference of Educational Administrators, in attendance. Participating are representatives of English-speaking nations interested in educational administration. They include Australia, Canada, England, New Zealand, Scotland, and the United States.

Mr. Russell will arrive in Albany Wednesday (Oct. 19) on his tour of selected universities. Mr. Dufty and Mr. Braithwaite begin their visit in Albany on October 29.

The conference will conclude with report sessions to be held at Edmonton in Canada.

Three faculty members from State University of New York at Albany will be among program participants at the Conference on Higher Education to be held in Syracuse November 3-5 by the New York State Teachers Association.

Dr. C. Luther Andrews, chairman of SUNYA's physics department, will be host at the session on "Role of the Faculty in Decision Making", on November 4. That evening Dr. O. William Perlmutter, dean of College of Arts and Sciences, will be a member of the reaction panel for the session on "The Education and Re-education of College Faculty".

At another session Friday evening Dr. David G. Barry, assistant to the president for regional scientific and industrial development at SUNYA, will be among the panelists reacting to a discussion of "Inter-institutional Cooperative Programs".

The conference is an outgrowth of six regional conferences held last year and devoted to a discussion of Regents Statewide Plan for the Expansion and Development of Higher Education, 1964, a publication of the State Education Department focusing attention on major issues in higher education and recommendations for the future.

STATE UNIVERSITY THEATRE
PRODUCTION OF LYSISTRATA

Aristophanes' LYSISTRATA, the season's first production by the State University Theatre, State University of New York at Albany, should still deliver its message with impact to modern audiences, according to the director, Paul Bruce Pettit. Now in rehearsal for performances at Page Hall from Wednesday, November 2 through Saturday, November 5, LYSISTRATA's anti-war sentiments are particularly topical in view of modern events.

While the play is a comedy and is done in a farcical, burlesque manner, the audience should not go away, says the director, merely feeling it has seen a funny play. Aristophanes used comedy in the play merely as a vehicle for presenting serious matter. The work's real importance, continues Mr. Pettit, lies in the view that war is absurd in light of man's ability to compromise. Secondly, the author also treats the subject of women's equality, but this becomes an "archaic aspect" of the play when performed today.

The director feels that LYSISTRATA's antiquity, and moving the play from its original amphitheatre setting to a proscenium stage, causes no problems for a modern production. In fact the distance in time and space frees the production unit in both design and interpretation. For example, while classical motifs such as

From: THE UNIVERSITY OF NEW YORK AT ALBANY

Page 2 -- Theatre Production

statues will be used in the State University Theatre's production, they will be radically adjusted to fit modern staging methods. Even costumes will be updated almost to the point of being avant-garde.

Tickets for LYSISTRATA at \$1.50 will go on sale approximately ten days before performance. Seats may be reserved by phoning 457-8592, or by writing: State University Theatres, Business Office, 1223 Western Avenue, Albany, N. Y. 12203.

Dr. Roger A. Hunt, assistant professor of biology at State University of New York at Albany, has received a research grant from the university's Atmospheric Science Research Center for a study concerned with possible skeletal changes under outer space conditions.

Dr. Hunt, who joined the faculty in 1964 has been pursuing the problem of skeletal response to low pressure environments directly related to space-oriented conditions. His current project is entitled, "An Investigation of Fluorescent Microscopy of Epiphyseal Bone Remodeling Changes As Part of the Adaptive Response of the Rat to Prolonged Exposure to Reduced Barometric Pressure."

The Albany professor, an alumnus of SUNYA, received his doctoral degree from Pennsylvania State University.

A program of electronic music compositions will be presented Thursday evening, November 17, by Alvin Lucier, of Brandeis University, and Joel Chadabe, of State University of New York at Albany, at Page Hall on the downtown campus of SUNYA.

Mr. Chadabe, assistant professor of music, established the electronic music studio at the university on a grant from the Research Foundation of the State University of New York. Mr. Lucier, director of the electronic music at Brandeis, studied in Rome on a Fulbright grant. His selections have been performed throughout the United Nations, Italy, and the Scandinavian countries. He will use a variety of his electronic equipment in combination with that of the host university. An unusual one of his instruments will be a machine which registers audio signals from brain waves.

The program will include compositions by Frederic Rzewski, David Behrman, Mr. Chadabe, and Mr. Lucier. Additionally, a film by the talented young Japanese film maker, Takahiko Iimura, will be shown.

Of electronic equipment Mr. Chadabe states: Advances in electronics in the last two decades have made possible the use of electronic instruments as sound generators, with the following effect: music is no longer limited to the technical capacities of the performer. It is now extended to the limits of human perception."

The department of music at the university in cooperation with the Music Council at SUNYA is sponsoring the free public concert. No tickets will be necessary for the program which will begin at 8:15.

An exhibit of painting and sculpture by William Wilson, associate professor of art at State University of New York at Albany, will open Tuesday evening, Nov. 1, in the Humanities Building faculty lounge at the university's uptown campus. Following the opening, set for 8 to 10 o'clock, the exhibit may be viewed through Nov. 22.

Most of the works to be shown were executed in Mexico during the past year. Mr. Wilson worked there during a sabbatical leave and through a summer grant from the Research Foundation of the State University of New York.

The artist preceded the current exhibits of his Mexican work with a one-man show at Antonio Souza gallery in Mexico City. On exhibition will be his painting, "In One Gulp", which was a prize-winner in the recent Berkshire Art Association Exhibition at Pittsfield, Mass.

Under the sponsorship of the Capital District Council for the Social Studies in cooperation with the New York State Council on Economic Education, a conference for high school social studies teachers will be held Friday, Oct. 28, at Shaker High School, Latham. Program coordinator is Frank Keetz, chairman of the history department at the host school.

In the morning Dr. Edwin J. Holstein, professor of economics at Rensselaer Polytechnic Institute, will speak on "Monetary and Fiscal Policy for Stability and Growth" and Dr. Louis R. Salkever, chairman of the economics department, State University of New York at Albany, will discuss "Conflicting Goals in Maximizing Economic Welfare."

At the afternoon session speakers will be Professor J. Woodrow Sayre, executive director of the New York State Council on Economic Education and director of the Center for Economic Education at SUNYA, who will address his remarks to the question, "Where Do We Go from Here?", and Miss Mildred McChesney, chief of the Bureau of Social Studies, State Education Department, whose subject will be "Economics in the New State Curriculum".

Participating panelists will be Miss Edith Starratt, executive secretary, New York State Council for Social Studies; William Warren, economics teacher at Shaker High; William Hemmer, economics teacher, Queensbury High School; and Conrad Wettergreen, doctoral candidate at SUNYA.

HARTLEY TO SPEAK AT STATE UNIVERSITY

Donald T. Hartley, District Director of the U.S. Internal Revenue Service, Albany, will be the speaker at the final dinner meeting of the Federal Income Tax Seminar which has been conducted by the School of Business, State University of New York at Albany. The fifth and last session of the seminar will be preceded by a reception in the Lower Lounge of Brubacher Hall at 6:45 p.m. next Tuesday, (Nov. 1). Dinner is scheduled for 7:15 p.m. in the main dining room.

Mr. Hartley will discuss the role of automatic data processing in processing tax returns and its future implications. Mr. Hartley was named District Director of the Albany District of IRS on December 1, 1965. He held previous positions with the Internal Revenue Service in New York City; Hartford, Conn. and Albuquerque, N.M. He is a graduate of the Internal Revenue Service's Executive Development Training Program, and he holds baccalaureate and master's degrees from the University of Michigan. He is a native of Dunkirk.

The Seminar on Federal Income Tax explored the major subjects of current interest for those who will prepare returns for the 1967 filing period. It was designed for certified public accountants, public accountants, attorneys, and others who prepare federal income tax returns. Technical assistance was provided by the U.S. Internal Revenue Service, Albany.

The art department of State University of New York at Albany will sponsor a lecture on Monday, October 31, by Professor Jason Seeley, artist in residence at New York University.

Mr. Seeley has entitled his talk, "How An Artist's Work Develops." He will speak mainly on his own work and will illustrate the lecture with slides. In recent years, the artist has received wide acclaim for his sculpture in which welded automobile bumpers are used as sculptural material. One of his major pieces is installed in the Sculpture Garden at the Museum of Modern Art, and he is represented in the collection of Governor Nelson A. Rockefeller.

The Seeley lecture will be held in lecture room 3 on the library lower level at 4:30 p.m. The public is invited.

An NDEA Institute in English and Other Humanities will be held next summer at State University of New York at Albany. Word of the over \$60,000 grant, funded under the National Defense Education Act, was received this week by William C. Kraus of the English education department at SUNYA who will be project director.

The 1967 six-week summer session will mark the second consecutive year that the university, in cooperation with Union College, will have conducted the institute. Expected to participate will be 30 secondary school teachers who minored in English and 30 elementary school teachers who have concentrated on English studies.

Approval of the project was received at the Albany campus from Donald N. Bigelow, director of the Division of Educational Personnel Training, U.S. Office of Education. SUNYA staff members in addition to Professor Kraus will be Dr. Morris Finder and Mrs. Cecelia McGinnis, both of the department of English education; Miss Ellen Regan, of the speech and dramatic department; Professor Fred Silva of the English department; and Edward P. Cowley, chairman of the art department; and from Union College, Professor Carl Niemeyer, chairman of the department of English; Professor H. Alan Nelson, of the English department; Professor Edgar Curtis of the department of music; and Professor Sven Petersen, of the department of philosophy.

A Turkish student, Ufuk Özbudak, a junior at State University of New York at Albany, has been awarded a \$300 foreign student scholarship by the Business and Professional Women's Clubs of District #3 for the current academic year.

Miss Özbudak, 24, is continuing her undergraduate work in this country after having completed two years of study at the Middle East Technical University in Ankara. Her major field is psychology and she is minoring in sociology.

Helena Grimm, chairman of the foreign student committee for the B.P.W. Club district, said that Miss Özbudak, who served two years in the Ministry of Foreign Affairs in Turkey as interpreter-typist, would visit sponsoring clubs in District #3 of the New York State Federation of Business and Professional Clubs.

The young woman, who will be at SUNYA for two years, has defined the purpose of her coming to the United States to study as that of "getting a sound education to be able to serve both in the development of Turkey and also to contribute to Turkish-American relationships by direct contact with people".

Dr. Henry G. Kuivila, chairman of the department of chemistry at State University of New York at Albany, has received a \$83,000 grant from the U. S. Army Medical Research and Development Command through the Research Foundation of SUNY for support of a research project entitled "Synthesis of Organotins for Anti-Malarial Screening".

For the past 15 years Dr. Kuivila has been concerned with studies of compounds known as organotins which may be effective in the treatment of malaria. The research is concerned with preparing many new organotins which would be screened later for effectiveness against malaria at the Walter Reed Army Hospital Research Institute.

(SEE ATTACHED DESCRIPTION MATERIAL CONCERNING ANTI-MALARIA RESEARCH)

Participating in the research project at SUNYA with Dr. Kuivila will be Dr. Kuo-Chen Yeh, Katsuhiko Kawakami, and Frederick S. Albrecht. Dr. Yeh, who is working on his doctorate at University of Alabama, will come to the Albany campus upon receipt of his degree in January. He will remain for a year working full time on the project as a doctoral research associate. Mr. Kawakami is a Japanese chemist serving on the SUNYA faculty as a visiting professor. Mr. Albrecht, a senior at SUNYA, is majoring in chemistry.

STATE UNIVERSITY OF NEW YORK AT ALBANY

Additional descriptive information pertaining to anti-malaria research for possible inclusion in attached release.

Prior to 1948, no clear instance of drug-resistant falciparum malaria had been recognized. Many medical authorities believed antimalarials and insecticides would permit the world-wide control of the disease. During the following decade, scattered reports of resistance of vivax and falciparum malaria to some drugs began to appear from many parts of the world, including South America, tropical Africa, Southeast Asia, the Middle East, and the South Pacific. In 1960, the first instance of resistance of falciparum malaria to the most widely used antimalarial, chloroquine, was reported from Columbia. Since then, chloroquine-resistant falciparum malaria has been discovered with increasing frequency, particularly in U.S. and allied forces in Vietnam, Thailand and Malaysia. By mid-1964 falciparum strains from seriously ill U.S. soldiers had been found that were resistant to all known antimalarials, including quinine.

As troops became increasingly committed to the area where drug-resistant falciparum is endemic, the number of cases rose rapidly. During the 40-day period ending November 20, 1965, the Armed Forces in Vietnam reported 683 cases of drug-resistant malaria. Three or four relapses have not been uncommon, even after treatment with quinine.

The ultimate solution of the problem of drug-resistant malaria will depend upon mastering the fundamental mechanisms of drug resistance. Although the Army has supported research on this aspect of the malaria problem for many years, it was foreseen in 1963 that a much greater effort was necessary. Expansion of malaria research was slow at first because of lack of funds and experienced malariologists. The problem became more apparent and in 1965 additional funds for research on malaria became available and a coordinated extramural and intramural program got under way.

Three internationally known physicists are now at State University of New York at Albany where a new \$300,000 laboratory, described by some as the most versatile and well-equipped in the country, is now in use. On the Albany campus for a year are Dr. Vladimir Synecek and his wife, Dr. Marie Simerska, of Czechoslovakia, and Dr. Jack Foster McConnell, of Australia.

Dr. Synecek, senior scientist at the Institute of Solid State Physics of the Czechoslovak Academy of Science at Prague, a visiting professor at SUNYA, has worked since 1957 in the institute's department of metal physics, leading a group that deals with the structure and physical properties of metallic solid solutions. His main interest is in the investigation of heterogeneities in supersaturated Al-solid solutions on using x-ray small-angle scattering and single-crystal diffraction methods.

Author of several works concerning phase transformations in alloys, Dr. Simerska is a research associate at SUNYA working with her husband on a grant from the National Institute of Dental Research of the National Institutes of Health. Both Dr. Synecek and Dr. Simerska are graduates of Charles University in Prague.

Dr. McConnell, also a visiting professor at SUNYA, is widely known for his research in crystallography. Presently he is on sabbatical from the University of New South Wales in Sydney where he is an associate professor. Earlier he spent two sabbatical years at the College of Science and Technology at the University of Manchester and at California Institute of Technology where he did research in hydrogen bonding. He received his doctoral degree from the University of New South Wales.

Page 2 Internationally Known Physicists

The new x-ray laboratory will accommodate any kind of research which involves x-ray diffraction and scattering in general. Its particular strength is investigation at extreme temperatures.

Underway now in the laboratory are studies concerned with seeking solution to the dental problem of finding an ideal filling material that will be permanently bonded to the teeth. The project is a joint endeavor of SUNYA and Rensselaer Polytechnic Institute at Troy. Through the Research Foundation of State University of New York, the Albany university received a \$83,000 grant from the National Institute of Dental Research.

In announcing award of the grants, Surgeon General William H. Stewart of the Public Health Service said, "We hope to gain from this research program a better understanding of why existing dental materials fail. Such knowledge should lead to development of superior restoratives. The latest advances in materials engineering and solid state physics will be brought to bear on these comprehensive studies of the chemical and physical properties of dental materials."

SEE ATTACHED BACKGROUND INFORMATION FOR EXPANSION OF RELEASE

Grants totaling \$148,217 for the first year were awarded by the Dental Institute, one of the nine National Institutes of Health. The National Advisory Dental Research Council recommended support of the project for four years. Principal investigator is Dr. J. Lawrence Katz, associate professor of physics at RPI, who is responsible for the interdisciplinary investigations to be conducted both at RPI and at SUNYA. Studies of how metallic crystals expand and shrink with changes in temperature will be conducted under the direction of Dr. Henry Chessin, professor of physics at SUNYA.

Dr. Chessin has been concerned with x-ray diffraction studies for the past 14 years and he is the author of numerous articles on the subject published in professional and technical journals. Dr. Chessin, who joined the SUNYA faculty two years ago, received his degree in physics from Polytechnic Institute of Brooklyn.

STATE UNIVERSITY OF NEW YORK AT ALBANY

Background information re dental filling research.

A tooth material that meets the recommended requirements of the mouth's environment has not yet been found. An ideal filling material must be strong enough to withstand the thousands of pounds of pressure exerted by biting yet elastic enough to expand and shrink under extremes of hot and cold that occur during the eating of one's meal.

It must bond with the tooth, sealing it against leakage of decay-causing fluids and micro-organisms, but^{be} resistant to corrosion, non-toxic and natural in appearance.

The use of an adhesive restorative material would reduce spectacularly the time and cost of repairing decayed teeth. Only the diseased tooth structure would have to be removed. Presently the cavity has to be made much larger so that the geometry of the excavation will lock in the filling.

Scientists at both schools will conduct interrelated studies of mechanical properties and structure of current as well as experimental dental material. Studies of how metallic crystals expand and shrink with changes in temperature will be conducted by Dr. Henry Chessin, professor of physics at State University of New York at Albany.

For release Wednesday, November 2

Thirty-six members of the senior class at State University of New York at Albany were inducted last evening (Nov. 1) into membership in Signum Laudis, academic honorary at the university. The ceremony took place in the lounge of the Biology Building of the uptown campus.

Members of the society constitute the top 4 percent of their class in the spring of their junior year, the next 4 percent of the class in the fall of the senior year, and the remaining 2 percent in the following spring. All applicants must have a 3.0 cumulative average out of a possible 4.

Guest speaker was Dr. Richard Kendall, professor of history. His subject was "Athletics and the University." Allen Jones, Signum Laudis president, presided.

New members of the society, which now has a total membership of seventy, are Frederick Albrecht, Frank V. Alessi, Dorothy Armbruster, Beatrice Barfoot, Marsha K. Black, Susan A. Burton, Donalette W. Card, Frederick Cicero, Kathryn Cleland, Carl G. DiTosti, Maureen E. Doyle, Richard Dunleavy, Lee A. Dunn, Yetta D. Feldman, Shirley B. Gage, Donald G. Giek, Jacqueline Goldman, Marcia A. Gussow, David Hallenbeck, Daniel H. Hanavan, Susan I. Hervey, Maxine M. Hinman, Elaine Houghtown, Arlene V. Kushner, Stephen J. Luako, Marcia S. Lembcke, Margaret L. Lewis, Bruce A. Kindsey, James Lobdell, Rosemary McCleery, Patricia B. Mintz, Harvey Patashnick, Ruth G. Righter, Gail F. Scott, Jeanette Shelin, and Ruth G. Silverman.

The Society promotes the recognition of students who have achieved an exceptionally high degree of scholastic prominence.

an open letter.....

We would like to inform you that on November 17th, Thursday evening, in Page Hall at 8:15, Alvin Lucier of Brandeis University will join us in presenting a program of electronic music. It will include pieces by Mr. Lucier, David Behrman, Frederic Rzewski (the Rzewski tape, Zoological Garden, was written in the East German Studio for Electronic Music in East Berlin), and myself. There will also be a film by Takahiko Iimura, a talented young Tokyo film maker.

We are living in an age of technological change, and this has profoundly affected the arts. It has made possible the use of new materials and new organizational techniques to express them. In architecture, new materials have made possible new designs and LeCorbusier, the French architect, has written that the musical revolution will not come until the basic materials of music change.

Music deals with organizations of sound. The composer of now selects sounds from the repertoire of the world. The last two decades' advance in electronics have made possible the use of electronic instruments as sound generators, with the following effect: music is no longer limited to the technical capacities of the performer. It is now extended to the limits of human perception.

Organizations also change. The immediate personal effort that carved a renaissance church facade is as clearly felt in the final result as is the intricate planning and complicated organization that is behind every skyscraper. But do skyscrapers replace sculpture, do films replace theatre, does electronic music replace performed music? No. But we have co-existing, different mediums that are sensorally perceived in the same way.

The exploratory nature of electronic music reflects the youth of the field and its dramatic possibilities. We are in a state of growth and change. This is the interesting time to arrive. For if exploration is not valid in art, then what is art?

ELECTRONIC MUSIC — Alvin Lucier, choral director and head of the electronics music studio at Brandeis University and others perform in a concert of electronic music at 8:15 p.m. Thursday in Page Hall, State University in Albany.

Electronic Music At State University

A program of electronic music compositions will be presented Thursday evening, November 17, by Alvin Lucier, of Brandeis University, and Joel Chadabe, of State University of New York at Albany, at Page Hall on the downtown campus of SUNYA.

Mr. Chadabe, assistant professor of music, established the electronic music studio at the university on a grant from the Research Foundation of the State University of New York. Mr. Lucier, director of the electronic music at Brandeis, studied in Rome on a Fulbright grant. His selections have been performed throughout the United Nations, Italy, and the Scandinavian countries. He will use a variety of his electronic equipment in combination with that of the host university. An unusual one of his instruments will be a machine which registers audio signals from brain waves.

The program will include compositions by Frederic Rzewski, David Behrman, Mr. Chadabe, and Mr. Lucier. Additionally, a film by the talented young Japanese film maker, Takahiko Imura, will be shown.

The department of music at the university in cooperation with the Music Council at SUNYA is sponsoring the free public concert. No tickets will be necessary for the program which will begin at 8:15.

IMMEDIATE

A program of electronic music compositions will be presented Thursday evening, November 17, by Alvin Lucier, of Brandeis University, and Joel Chadabe, of State University of New York at Albany, at Page Hall on the downtown campus of SUNYA.

Mr. Chadabe, assistant professor of music, established the electronic music studio at the university on a grant from the Research Foundation of the State University of New York. Mr. Lucier, director of the electronic music at Brandeis, studied in Rome on a Fulbright grant. His selections have been performed throughout the United Nations, Italy, and the Scandinavian countries. He will use a variety of his electronic equipment in combination with that of the host university. An unusual one of his instruments will be a machine which registers audio signals from brain waves.

The program will include compositions by Frederic Rzewski, David Behrman, Mr. Chadabe, and Mr. Lucier. Additionally, a film by the talented young Japanese film maker, Takahiko Iimura, will be shown.

Of electronic equipment Mr. Chadabe states: Advances in electronics in the last two decades have made possible the use of electronic instruments as sound generators, with the following effect: music is no longer limited to the technical capacities of the performer. It is now extended to the limits of human perception."

The department of music at the university in cooperation with the Music Council at SUNYA is sponsoring the free public concert. No tickets will be necessary for the program which will begin at 8:15.
