

STATE UNIVERSITY OF NEW YORK AT ALBANY

Albany, New York 12203

DATE: 20 April 1971
FROM: Walter M. Tisdale
TO: President Louis T. Benezet
SUBJECT: Campus Progress Report No. 172 - 4 M.E.V. Particle Accelerator

Yesterday an acceptance inspection was held of the 4 M.E.V. Particle Accelerator. Inspection was attended by representatives of the University Construction Fund and R.D.I., the contractor. Owing to the high state of completion, the instrument was accepted and henceforward, the University is solely responsible for the operation, maintenance, security and safety of the facility. Dr. Jagadish Garg, Director of the Nuclear Accelerator Laboratory, was present and has signified his concurrence to this acceptance of the instrument and all the responsibility now vested in the University.

The acceptance was subject to an agreement of four parts, which enforces the guarantee of the instrument and insures the protection of the University's interests. This agreement was signed by Dr. Jagadish Garg for the University and Kennard Morgenstern for R.D.I.

The acceptance pertains to the instrument only and does not effect the facility which houses the instrument. This facility was the subject of an earlier acceptance inspection. The Construction Fund will now make final payment for the instrument and the Nuclear Accelerator Laboratory may now proceed with its experiments under the direction of Dr. Jagadish Garg.
