

30 October, 1968

Walter M. Tisdale

President Evan R. Collins

Campus Progress Report No. 134

Today I inspected and accepted the water tower and ancillary systems, subject to punch list. Having been once rejected because of its incomplete status, it has now been quite thoroughly completed, and the punch list is small and insignificant.

The system includes a steam generating plant which precludes freezing of the water during the winter and is automatically controlled by a remote control system that is integrated with the master control panel in the Service building group.

Plant Department personnel have been given an orientation, and feel comfortable about the operation of the system. This will be our responsibility from here on.

Preliminary arrangements have been made for the transfer and installation of the carillon in its permanent site atop the tower as early next Spring as weather will permit.

Walter M. Tisdale  
Assistant to the President  
for Planning & Development
