Key words: System Dynamics, Education

Abstract

The SDS Education SIG continues to pursue its twin interests in publicising and enhancing both the contribution of SD to Education Management and the evolution of the contribution of SD to the curriculum - in both cases the interest spans the whole span of education from K-12 to Higher Education.

Scope of the E-SIG Interests

E-SIG, the Education Special Interest Group of the System Dynamics Society brings together people interested in any one of six richly overlapping education domains:

SIX	OVERLAPPING	EDUCATION	DOMAINS
	K-12		Higher Education
Teaching and Learning			
Management Effectiveness			
Public Policy Analysis			

E-SIG Current and Planned Activities

1. Building a network of mutually helpful resource people interested in system dynamics approaches to any aspect of education.
2. Encouraging the generation of additional resources.
3. Developing a comprehensive taxonomy of published work in the field and making it available.
4. Supporting the training of teachers
5. Developing and updating an E-SIG website.
6. Reaching out to other professional education associations to acquaint them with the potential value to them of system dynamic approaches to their work.
7. Encouraging undergraduate and graduate students to undertake projects and dissertations to advance the theory and application of system dynamics to education,
8. Organizing the second international workshop on application of system dynamics to education.

Please come to the E-SIG sessions to tell us about your work and find out what others are doing. See you there !!!
