FOR RELEASE

NOT BEFORE 7 P.M. THURSDAY

FEBRUARY 2, 1967

State University of New York at Albany has received a five-year grant of \$1,338,241 from the National Institute of General Medical Science, National Institutes of Health, U.S. Department of Health, Education, and Welfare, for support of a research group in cell biology in the department of biological sciences. An appropriation of \$257,172 already has been approved for the first year.

The award, a program-project grant made to a group of research scientists working on closely related problems, will be administered by Dr. Robert D. Allen, chairman of the university's department of biological sciences. The grant makes possible the development of new facilities for a broad experimental study of the organization and dynamics of living cells.

First official notification of receipt of the grant was received by Dr. Evan R. Collins, president of the university, from Representative Daniel E. Button, Albany, of the 29th Congressional District.

President Collins said receipt of the grant represents the fruition of one of the major forward steps being taken by the university in its progress toward building graduate programs of the highest quality. He added, "The award recognizes not only the competence of Dr. Allen and his research group but also the growing excellence of the entire department of biological sciences, its supporting facilities and its graduate students."

FROM: STATE UNIVERSITY OF NEW YORK AT ALBANY

Page 2 - Research Grant

For ten years before his appointment as chairman of the department at SUNYA, Dr. Allen was a member of the biology faculty of Princeton University. His research at Princeton dealt with the mechanisms of cell movement and the development of improved techniques of light microscopy. At the Albany campus his research will continue to deal with improving the technique of recording microscopic images and the sensitive measurements of certain physical-optical properties of living cells.

Other members of the research group are Dr. Gunter Koeppel, visiting professor of biology from Giessen, Germany; Dr. Florian Muckenthaler and Dr. Georgia Lesh, assistant professors of biology at SUNYA; Dr. Robert J. Thomas, research associate in the department; Dr. Colin Izzard from Cambridge University; and Dr. Eiji Kamitsubo, of the University of Osaka, Japan.

Dr. Koeppel, who joins the department next month (March), is well-known for his studies on the molecular structure of fibrinogen, the protein in the blood which forms the fibrin in blood clots. Under the grant, Dr. Koeppel, will extend studies to include the formation of other kinds of fibrils in living cells as well as in the blood of various animals.

Dr. Muckenthaler joined the faculty in September, 1965. After receiving his Ph.D. degree from Catholic University, Dr. Muckenthaler spent one year at Johns Hopkins University as a postdoctoral fellow in cell biology. He will study the organization of dividing cells, especially chromosomes, the bodies within the cell nucleus that contain genetic information in the form of DNA (deoxyribonucleic acid), and the mitotic spindle, the fibrillar apparatus responsible for apportioning the chromosomes (and hence the genetic material) equally between two daughter cells.

FROM: STATE UNIVERSITY OF NEW YORK AT ALBANY

Page 3 - Research Grant

Dr. Lesh, who came to the Albany campus last fall, received her Ph. D. degree from Western Reserve University. She remained on the faculty there for one year following receipt of her degree. Dr. Lesh is studying the chemical factors influencing cellular migration and differentiation in Hydra, a small fresh-water animal (coelenterate) with only two cell layers that can reproduce either sexually by egg and sperm or asexually by budding.

Dr. Thomas, who joined the faculty at SUNYA last fall, received his Ph.D. in cell biology from Iowa State University. An electron microscopist and a developmental biologist,^{he} has worked with the electron microscopy of mitotic cells and the early development of vertebrate embryos such as those of the tropical fish. Currently he is setting up the electron microscope laboratory where he will serve as the electron microscopist for the entire research group.

The two other scientists, Dr. Izzard and Dr. Kamitsubo, are joining the group this spring. Dr. Izzard has worked on embryonic development in tunicates, primitive relatives in the animal group to which man belongs, namely, the chordates. Dr. Kamitsubo has studied cytoplasmic streaming in plant cells.

In 1963, Dr. Allen and a collaborating physicist at Princeton, Dr. James Brault, invented the phase modulation microscope, a scanning microscope capable of measuring extremely small phase shifts in light waves induced by microscopic objects. In recognition of that and of other contributions to light microscopy, the Royal Microscopical Society recently conferred the title of Fellow on Dr. Allen. In 1961 and 1966, Dr. Allen was the recipient of Guggenheim Fellowship awards for study in Osaka and Cambridge.

Page 4 - Research Grant

The biological investigations in the research laboratory will be concerned with the phenomena of biological movement of and within living cells. Many living processes in that category are still little understood, and they constitute an important area for further scientific study. The National Institute of General Medical Science is supporting the research of Dr. Allen and his group at SUNYA in the hope that techniques developed and information amassed through their investigation may help clinical scientists in the battle against disease. Such diverse human maladies as respiratory infections, infertility, and cancer can be attributed to aberrations in the processes of biological movement.

A tape of the televised General Electric College Bowl game played Sunday, Jan. 29, with teams from State University of New York at Albany and from St. Mary's College, South Bend, Ind. participating, will be shown by WRGB-TV, (Channel 6) Schenectady, on Sunday afternoon, February 5, at 4 o'clock. The Albany team lost to St. Mary's by a narrow margin.

Moderator of the program, Robert Earle, described the contest in New York as "One of the most exciting games we've had here in a long time!" And it was, for the all-girl team from Indiana in their second appearance on the program allowed SUNYA only three toss-up questions in the first half; yet the teams were just 25 points apart at the first half with a score of 95-70, St. Mary's leading.

Early in the second half St. Mary's was penalized five points for incorrectly anticipating an answer, and Albany, in turn, was penalized five points for being guilty of a conference on the toss-up question. St. Mary's took the next several toss-up questions to roll up a score of 160-95 before Albany could get in again. The three-man, one-woman team then moved in to take three toss-ups in a row, but in the last few minutes of the game, when the score stood at 185-190, St. Mary's correctly answered the last toss-up to pull out ahead with a final score of 200-185.

Writing in The Knickerbocker News, Albany daily, John Bart said, "But the loss was by the split second of a reflex action at the final whistle." Referring to the upcoming taped program, he wrote, "Like a rerun of a well played athletic contest, it will be well worth watching." Mr. Bart was a member of the College Bowl team which in 1961, representing Bates College, Lewiston, Me., retired undefeated after scoring five victories.

Dr. Clifton C. Thorne, vice president for student affairs at SUNYA, said that plans are underway for a reception to be held Tuesday afternoon, Feb. 7, at 4 o'clock to honor members of the Albany university team and their coach, John Gunn, of the university faculty.

The SUNYA contestants, who brought back to their campus \$500 in scholarship funds, will determine disposition of the money.

Dr. William S. Johnson, chairman of the department of chemistry at Stanford University, will lecture at State University of New York at Albany on Wednesday afternoon, Feb. 15. His subject will be "Olefinic Cyclizations." Sponsoring the lecture is the university's chemistry department.

A noted scientist, Dr. Johnson was honored in 1958 for his creative work in synthetic organic chemistry. He is a member of the National Academy of Science and of the American Academy of Arts and Sciences. Additionally, Dr. Johnson is a Fellow of the London Chemical Society and a member of the Swiss Chemical Society.

The lecture is scheduled for 4:30 o'clock in room 151 of the chemistry building on the university's uptown campus.

The second in a series of conferences for educators interested in developing curriculum programs will be held by the Capital Area School Development Association Wednesday, Feb. 8, at State University of New York at Albany. Continuing theme of the conferences is the change process as it affects curriculum programs.

At the morning session Mrs. Henry Fancett, coordinator of social studies at Jamesville DeWitt High School, will speak on the development and meaning of concepts for social studies programs, commenting on the Syracuse University study and its meaning for the classroom. Other morning session speakers will be Mrs. Helen Martin, principal of Woestina Elementary School in the Schalmont School District; William Aylward, chairman of social studies at Guilderland Central School junior high; Carl Herman, teacher at the latter school; and Mrs. Fancett. Their subject will be "The Change Process and Social Studies at Work in Local Schools."

At the afternoon session, the topic to be discussed is "Relationship between the State Education Department and Local Schools in Initiating and Implementing Change." State Education Department participants will be Dr. Walter Crewson, associate commissioner for elementary, secondary and continuing education; Mrs. Dorothea Conklin, chief of the bureau of child development and parent education; Robert H. Johnstone, chief of the bureau for elementary curriculum development; and Gordon E. Van Hooft, chief of the bureau for secondary curriculum development.

The curriculum workshop will be held in the lower lounge of the university's Brubacher Hall. Reservations may be made with Dr. Joseph Testo of the Center for Research and Field Services at the university.

State University of New York at Albany has been designated as a test center for administering the National Teacher Examinations on March 18, Dr. Norman Greenfeld, associate professor of psychology has announced.

College seniors preparing to teach and teachers applying for positions in school systems which encourage or require applicants to submit their scores on the National Teachers Examinations along with their other credentials are eligible to take the tests. The examinations are prepared and administered by Educational Testing Service, Princeton, N.J.

The designation of SUNYA as a test center for these examinations will give prospective teachers in this area an opportunity to compare their performance on the examinations with candidates throughout the country who take the tests, Professor Greenfeld said.

At the one-day session, a candidate may take the common examinations, which include tests in professional education and general education, and one of the thirteen teaching area examinations, which are designed to evaluate his understanding of the subject matter and methods applicable to the area he may be assigned to teach.

Bulletins of Information describing registration procedures and containing registration forms may be obtained from Professor Greenfeld in room 214 of the social studies building, or directly from the National Teacher Examinations, Educational Testing Service, Box 911, Princeton, N. J. Prospective teachers planning to take the tests should obtain their Bulletin of Information promptly, Professor Greenfeld advised.

Dr. Stokes said that while principal concerts will continue to be given at Page Hall, those of a smaller nature would be held in the ballroom at Campus Center. Among the latter is a Sunday afternoon program to be presented in the spring by a musician from State University College at New Paltz in an exchange concert.

Preregistration for enrollment in music courses for the new semester has doubled, with about 700 students planning to take one or more music courses.

Assistant director of Campus Center is Joseph A. Silvey. Additional professional staff include Mrs. Joseph A. Garcia, Jr., associate director, student activities; Ralph Beisler, conference coordinator; and Miss Patricia Buchalter, Miss Alice Corbin, Gary Jones, Miss Susan Rose and Louis Saltrelli, student activities advisors.

Art exhibits planned for the center are Humble Oil Company's "Twelve Paintings of American History", the Helderberg Workshop's "Twenty Works Done by Youthful Students", Dartmouth College's "Collection of Silk-Screened Posters", and "Studies in Color", a presentation of the New York Council on the Arts and the Albany Institute of History and Art.

Other special events at the center during the semester will be an open house for students and faculty, fine arts panel and performance, the president's meeting for faculty, a debate tournament with Oxford University, and an address by Rep. Jonathan B. Bingham.

FOR RELEASE:

SUNDAY, FEB. 5, 1967

Campus Center on the new uptown campus of State University of New York at Albany will open Monday, Feb. 6, at the beginning of the second semester. Although several areas of the building, located on the south central side of the academic podium, have not been completed, the center will begin to be used as a focal point for out-of-class programs of an educational, cultural, social, and recreational nature.

Neil C. Brown, Jr., director of Campus Center, said the ballroom, second-floor assembly hall, fireplace lounge, music lounge, administrative office areas and office space for student government and the campus student newspaper would be operational. Mr. Brown, who also serves the university as director of student activities, listed several events already scheduled.

Tuesday afternoon the General Electric College Bowl team from the university and those who assisted in preparation for the contest will be honored by the university at a reception. Guests will include members of the Central Council and of the Commission on Academic Affairs. The reception will take place from 3:30 to 5 in the center's second-floor lounge.

Several areas of the building are not ready for operation. Among them are the food service and kitchen areas, dining facilities, bookstore, barbershop, and bowling alleys. Completion is expected within a few weeks and full use of the building is anticipated by April 1.

FROM: STATE UNIVERSITY OF NEW YORK AT ALBANY

Page 2 - Campus Center

The large fireplace lounge, expected to be the principal social gathering place for students, is furnished with sofas and chairs, in rust and olive tones, walnut tables, and a mottled beige rug.

Distinctive decoration in the two-story ballroom includes a parqueted oak floor with center concentric design. Ceiling lattice work will emphasize colored lighting effects. When used as an auditorium, seating will be available for approximately 650 persons. Chairs are of red cushion-vinyl and brushed chrome. Equipment includes a portable stage and folding tables for banquets or discussion groups.

One lounge section, which is located around the perimeter of an open well area above the cafeteria, is decorated with continuous live plantings. In the gallery around the balcony overlooking the lobby is a display of art posters. The gallery serves as a foyer for the ballroom.

The music department of the university, of which Dr. Charles F. Stokes is chairman, has moved temporarily to the center's third floor where it occupies some 20 rooms. The department will remain in the temporary quarters until completion of the theatre-music building next year.

In its present location the department occupies a large instrumental room, large choral rehearsal and classroom, two other classrooms, two rooms for listening purposes and music library work, a large instrumental storage room, electronic music studio, five practice rooms, storage rooms, studio-office arrangements for applied work, and administration and faculty offices.

FOR RELEASE: NOT BEFORE 2 P.M.
TUESDAY, FEBRUARY 7, 1967

Dr. Lewis P. Welch, associate dean of the Graduate School of Public Affairs at State University of New York at Albany, has been appointed acting dean of the school by Dr. Evan R. Collins, president of the university. Announcement of the appointment was made today by Dr. Collins at a meeting of the school faculty.

Dr. Welch, who was named associate dean two months ago, will fill the vacancy created last week when it was announced that Dr. O. B. Conaway would go on leave immediately from his post as dean to direct a study to determine how the State University can assist New York State in solving its varied and complex urban problems. University Chancellor Samuel B. Gould said Dr. Conaway's assignment reflected the university's concern over the need for a comprehensive program under which it would closely cooperate with the cities of the state.

The new acting dean, prior to his appointment in December, had served as assistant dean of the school since 1962. He holds an A. B. degree (magna cum laude) granted in 1954 from Bowdoin College where he was elected to Phi Beta Kappa. In 1957 he received a master's degree in public administration from Syracuse University and four years later, a Ph. D. in political science from the same institution.

While at Syracuse Dr. Welch held fellowships at Syracuse during two years of graduate study. He was appointed an instructor of political science at the Maxwell School of Citizenship and Public Affairs, Syracuse University, during the period 1958-61. In that rank, he served as assistant director and coordinator of the graduate program in public administration. During the current academic year he has been serving as chairman of the newly-established department of political science of the Graduate School of Public Affairs.

"After The Moon, What Next?" is the question to which the noted physicist, Dr. Edward Teller, will address his remarks at the opening lecture of the symposium, "Science and the Future of Man", Wednesday evening, February 8, at State University of New York at Albany.

Introducing Dr. Teller, professor-at large of physics at the University of California, will be Dr. Earl G. Droessler, vice president for research at the university. The symposium will be opened formally by Dr. Eugene H. McLaren, chairman of the university's division of mathematics and science, sponsor of the series of public lectures.

Dr. Teller's lecture will take place, beginning at 8:30 o'clock, in the dining room of Dutch Quadrangle on the university's uptown campus. Parking facilities are located in the quadrangle's parking lot at the northwest corner of the campus.

Dr. Teller's present activities are connected with applications of nuclear energy, with astrophysics, and with molecular physics.

The Capital Area School Board Institute will hold an evening program on "Educational Implications of the New York State Constitutional Convention of 1967" Thursday at Brubacher Hall of State University of New York at Albany.

Following dinner in the hall's main dining room, the general session will be in the lower lounge with Dr. Leon S. Cohen serving as moderator. Speakers will be Miss Lois J. Wilson, whose subject will be "Basic Educational Issues Facing the Convention", and Kenneth DeKay, who will talk on "Implications for School Finance and Higher Education." A discussion session will follow.

Dr. Cohen is assistant professor of political science in the university's School of Public Affairs. He has taught courses in American government, political behavior and legislative behaviour. Presently he is engaged in a research study of the legislative process in New York State.

Miss Wilson has been assistant director of studies for the New York State Teachers Association for nearly two years. Prior to that time she served as assistant to the director in the New York State Assembly's Office of Legislative Research. Currently Miss Wilson is legislative program chairman for the Albany Branch of the American Association of University Women.

A research consultant on state government affairs, Mr. DeKay has done research work for such groups as the State Board of Regents, the Temporary State Commission on the Constitutional Convention, and the Finance Committee of the New York State Senate. He also lectures on government regulatory problems in the Graduate School of Management at Rensselaer Polytechnic Institute. Mr. DeKay is president of the Board of Education of Schoharie Central School.

Harold Wusterbarth, of Schenectady's Board of Education, chairman of the institute's steering committee, will preside.

for Faculty Focus

Dr. Martin Levey, professor of the history of science at State University of New York at Albany, has had two books published this year. He is the author of Medieval Arabic Toxicology: The Book on Poisons of ibn Wahshiya and Its Relation to Early Indian and Greek Texts, published by the University of Pennsylvania Press. His other new book is Archeological Chemistry: A Symposium. The latter volume, which Dr. Levey edited, was published by the American Philosophical Society. Featured are papers presented at a symposium organized by the SUNYA professor for the American Chemical Society. The book's article on ancient Egyptian bronze medical instruments was written by Dr. Levey.

The fourth concert of the Music Faculty series at State University of New York at Albany will be presented in Page Hall Tuesday evening, February 21, at 8: 15. Soloists will be William Hudson, clarinet, and James Morris, trumpet, with Findlay Cockrell, piano, and guest artist Arthur Catricala, cello.

The program will include the Beethoven Trio in Bb major, opus 11; Brahms Sonata No. 2 in Eb major, opus 120, for clarinet and piano; Telemann Concerto in D major for trumpet; Sonata for trumpet and piano by Halsey Stevens; and Sinfonia for piano, clarinet, trumpet, and cello by Alfredo Casella.

Mr. Hudson,^a former student of Anthony Gigliotti of the Philadelphia Orchestra, was at one time first clarinetist of the Connecticut Symphony and of the New Haven Symphony. For two years he toured Europe as first clarinetist with the U.S. Army Symphony Orchestra. He joined the faculty of SUNYA in 1963, having previously been a member of the conducting staff at Yale, where he received his graduate training. He is conductor of the University Symphony Orchestra and the University Concert Band.

Dr. Morris holds degrees from the University of California at Los Angeles, Yale University, and the University of Southern California where he did his doctoral work. He has performed as a professional trumpet player with numerous orchestras in the Los Angeles area, including the Los Angeles Philharmonic and the San Francisco Ballet and Opera orchestras. In addition to his teaching duties at the university, Dr. Morris is solo trumpet with the Albany Symphony Orchestra.

From: STATE UNIVERSITY OF NEW YORK AT ALBANY

Page 2 - Music Faculty Series

Mr. Cockrell was educated at Harvard University and at the Juilliard School of Music. He received the bachelor of science and the master of science degrees from the latter institution. He has performed as piano soloist with the San Francisco Symphony, the Oakland Symphony, the Westchester Symphony, and other orchestras. His numerous recitals include a Town Hall debut in 1965, an appearance on nationwide C.B.S. television on the Arthur Godfrey Talent Scouts Program, one week on the Arthur Godfrey morning show, and radio broadcasts from Berkeley, Calif., Cambridge, Mass., and New York City. He is the recipient of a number of awards and prizes. In 1965 he participated in the International Chopin Competition in Warsaw, Poland.

Mr. Cockrell heads the piano department at the university where he joined the music faculty in 1966.

Arthur Catricala for many years has been regarded as one of the outstanding teachers and performers in the Capital District. He is first cellist of the Schenectady Symphony and president of the Schenectady Conservatory of Music.

Seven artists will speak informally of their endeavors in seven fields of art in a program of "Contemporary Voices" to be presented Tuesday evening, Feb. 14, at State University of New York at Albany. Sponsored by the New York State Council on the Arts and the National Council on the Arts, the program, open to the public, will be held in the ballroom of Campus Center on the uptown campus from 8:30 to 10 o'clock.

Painter Jack Tworckov, who teaches at Yale, will lead the discussion by the touring group during their visit to SUNYA. Other participants are Len Lyle, whose metal sculptures are motorized; Merce Cunningham, of the famed dance company that recently won an international prize in Paris and much acclaim in Sweden, England and Portugal; Guggenheim fellow and author Robert Creeley; experimental filmmaker Stan VanDerBeek; electronic composer John Cage; and electronics engineer Billy Kliver, who is involved with the embryonic and vitally contemporary medium of technology in art.

The artists, who will discuss films, dancing, painting, poetry, computers, and kinetic sculpture, also will demonstrate their work. Panel discussions will reveal their own concept of their art, the interrelationships of various art forms, and the creative process in general. The group is on a tour of several upstate New York campuses, initiated by the New York Council under the direction of John B. Hightower, who wanted students to have personal access to each artist.

The appointment of Dr. Robert L. Emrich as assistant dean of the School of Criminal Justice at State University of New York at Albany has been approved by the Board of Trustees of State University of New York. Dr. Emrich, presently with the U.S. Department of Justice Office of Law Enforcement Assistance, will join the school faculty in May.

From 1965 to 1966 Dr. Emrich was associated with the Hughes Aircraft Company Technical Analysis Office working on a project for the U.S. Air Force Office of Scientific Research and continuing analysis of the New York State Intelligence System. Early in 1966 he joined the Washington department where he is the grant program manager for science and technology and consultant to the President's Commission on Law Enforcement and the Administration of Justice.

Dr. Emrich received his bachelor of arts degree from the University of Chicago in 1955, and the master of arts degree from Chicago in 1958. He was awarded the Ph. D. degree by the University of Oregon in 1962. From 1962 to 1965 he was employed by the System Development Corporation, at first as manager of a seven-man project producing procedure manuals for the Strategic Air Command, then as part of a group which developed and designed the New York State Identification and Intelligence System.

In addition to the administrative appointment, Dr. Emrich is being given concurrent appointment as associate professor of criminal justice for three years.

IMMEDIATE

Dr. Miguel Herrea Figueroa, presently visiting scholar in social psychology at Columbia University, will lecture Tuesday afternoon, Feb. 14, at State University of New York at Albany. His visit to the campus is sponsored by the university's School of Criminal Justice, the departments of psychology, anthropology, and sociology, and the Center for Inter-American Studies.

Dr. Figueroa, president of the John F. Kennedy Argentine University, is an internationally known sociologist and psychologist. He holds a master's degree in law from the National University of Buenos Aires and a doctoral degree in jurisprudence and social science from the same institution. Special awards include a medal of honor from the Latin American Sociological Association in recognition of contributions to sociology in Latin America. Active in publishing, he is director of publications for the International Institute of Sociology.

The lecture will take place in lecture room 3 in the library building on the uptown campus, beginning at 3:30 o'clock. Dr. Figueroa will be introduced by Richard A. Myren, dean of the School of Criminal Justice. His topic will be "Criminology in the Detective Story".

IMMEDIATE

Dr. Edward M. Kosower, professor of chemistry at State University of New York at Stony Brook, will give a colloquium lecture Tuesday afternoon, Feb. 14, at State University of New York at Albany. His topic will be "Stable Pyridinyl Radicals." Sponsoring the lecture, to begin at 4:30 in room 151 of the chemistry building, is the university's department of chemistry.

Dr. Kosower, a native of New York, received his B.S. at M.I.T. in 1948 and his Ph.D. at U.C.L.A. in 1952. After two post-doctoral years at Basel and Harvard, he taught at Lehigh University and later at the University of Wisconsin. In 1961 he joined the faculty of State University of New York at Stony Brook. He was awarded Alfred P. Sloan Fellowships for the periods 1960 - 1962 and 1962 - 1964.

Dr. Kosower's interests include the fundamental mechanism of biochemical processes, especially the "active site" of enzymes, and the application of principles of physical-organic chemistry to the molecular transformation of biochemistry. His book, Molecular Biochemistry, is considered to be one of the best in the field.

Dr. Robert G. Murdick and Dr. Arthur E. Schaefer, professors at State University of New York at Albany, are authors of the book, "Sales Forecasting for Lower Costs and Higher Profits", just published by Prentice-Hall, Inc.

The 276-page publication, illustrated with graphs, charts, and case studies, introduces new techniques suggested to reduce the margin of error in sales forecasting and shows how they can be used to reduce inventory and the cost of carrying it, facilitate budgeting, increase sales, schedule production runs and deliveries, improve customer service, and stimulate profits.

Dr. Murdick, a registered professional engineer, is professor of management at the Albany university. He has taught marketing policy and research at the University of Louisville and at SUNYA. For thirteen years he was employed in various capacities by the General Electric Company and, subsequently, he was manager of market research for Randac Systems. A former Ford Foundation Fellow at the University of Florida, he has published over 40 articles in the field of management. Additionally, he is co-author with D. W. Karger of the book, "Managing Engineering and Research."

Until recently, Dr. Schaefer, now associate professor of chemistry at SUNYA, was manager of sales forecasting and inventory planning for General Aniline and Film Corporation. His responsibilities in that post included sales forecasting and inventory planning for the entire product line of the Dyestuff and Chemical Division. He has had

From: STATE UNIVERSITY OF NEW YORK AT ALBANY

Page 2 - Dr. Robert G. Murdick and Dr. Arthur E. Schaefer

a background of 27 years of industrial experience in plant production, production and inventory control, and sales forecasting. Dr. Schaefer, who has taught at Rensselaer Polytechnic Institute, also has made frequent lecture appearances before the American Management Association and Industrial Education Institute.

Home addresses: Robert G. Murdick, 14 Fairway Lane, Rexford, N.Y.
Arthur E. Schaefer, 73 Meadowland Street, Delmar, N.Y.

Dr. Philip Morrison, professor of physics at the Massachusetts Institute of Technology, will lecture Tuesday, Feb. 21, at State University of New York at Albany. The program, sponsored by the university's physics department, will begin at 4:30 p. m. in room 137 of the humanities building on the uptown campus.*

Dr. Morrison is a theoretical physicist working mainly at the boundaries between cosmic rays and astronomy. A Fellow of the American Physical Society, Professor Morrison is also a member of the Federation of American Scientists, the American Association of Physics Teachers, which awarded him its 1965 Oersted Medal, the American Astronomical Society and the Commission on College Physics. In 1955 he received the Pregel Prize of the New York Academy of Science and in 1957 the Babson Prize of the Gravity Foundation.

Dr. Vincent J. Schaefer, director of the Atmospheric Sciences Research Center at State University of New York at Albany and executive director of the Natural Sciences Institute of ASRC, is making plans for the annual summer program of the institute.

A limited number of high school seniors, who will be graduated in June, are eligible to participate in the field research-oriented program scheduled to run from July 2 to August 25.

Only students who have shown a high degree of maturity, intelligence, industry, and potential for leadership are sought. Those selected will receive a stipend of \$100, free room and board, and a season ticket for all lectures and sessions of the the Institute on Man and Science at Rensselaerville.

Students will be housed in a colonial house in Rensselaerville at the edge of the E. N. Huyck Preserve which includes woods, a stream and two lakes. Most of the research will be related to the natural history and geophysical sciences of the area, but students in the humanities and social sciences will receive equal consideration.

Area schools are being requested to send the name of one candidate with his school affiliation, address, and academic record to Miss Alice K. Klopfer, 4041 Albany street, Schenectady. Preliminary plans questionnaires and related forms for gathering information to assist in the selection of the students for the institute will be forwarded directly to the students who are possible candidates.

Assisting with the canvassing of area schools is the Capital Area School Development Association of State University of New York at Albany.

The University Council of the State University of New York at Albany honored retiring chairman Truman D. Cameron at a luncheon during its regular meeting. Commenting on a resolution unanimously adopted by the council, vice chairman John R. Hauf lauded Mr. Cameron for his twelve years of service, over ten of which were as chairman. During that period the university developed to its present status as a university center.

Referring specifically to Mr. Cameron's dedication in advancing the cause of the university, Mr. Hauf spoke glowingly of the chairman's faithful and generous contribution of time and effort and of "his wise and patient counsel."

The university council is established by Education Law to supervise the operations and affairs of each State University unit within provision of rules established by the State University trustees. Appointments to the nine-member council are made by the governor for nine-year terms.

Mr. Cameron, well-known Albany businessman, resides at 1039 Western avenue.

Other members of the council are: V. Vanderbilt Straub, Albany; Walter H. Wertime, Cohoes; Mrs. Kenneth S. MacAffer, Menands; Mrs. Frank C. Hughson, Loudonville; Harry O. Lee, Cropseyville; and Millard L. Levy, Schenectady.

Dr. Murray G. Phillips, associate professor of education at State University of New York at Albany, has announced that two sections of the NDEA* Institute in Educational Media will be held at the university. The full-time section will begin July 24, continuing through Aug. 11. On Sept. 16, the part-time section will begin, concluding on May 18, 1968.

The institute, planned for building coordinators and school administrators, is designed to assist all participants to organize and operate effective educational media programs within single school buildings. A total of 60 participants will be admitted. Wherever possible, teams of media specialists and administrators from the same school building or districts will be given preference for admission. However, all qualified specialists or administrators are encouraged to apply individually.

On the staff of the institute, in addition to Dr. Phillips, will be Dr. Samuel Cohen, assistant superintendent of schools, Hewlett; Howard R. Abeles, coordinator, audiovisual services, Great Neck, L. I.; David Crossman, associate in educational communications, New York State Education Department; and Dr. Robert Brown, associate professor of education, James W. Rice, coordinator of educational television, and John Gunn, television producer and lecturer in speech and dramatic art, all of SUNYA. The staff will be augmented by visiting lecturers and consultants.

During the full-time session a stipend of \$75 per week and an allowance of \$15 per dependent per week will be available. During the part-time session a stipend of \$15 and an allowance of \$3 per dependent will be available for each day of the institute. Each administrator is eligible to receive a stipend and dependency allowance at approximately one-half the above-mentioned rates or at the full rate, depending on his choice of program.

Two faculty members at State University of New York at Albany, Dr. Edward P. Shaw and Dr. Arnolds Grava, have been accepted as members of the Societe francaise d'etude du XVIII^e siecle (French Society for the Study of the 18th Century). President of the Association is the famous scholar, Jean Guehenno, of the French Academy.

Initially organized by researchers in France, the society intends to create international affiliations whenever desirable. All areas of study in the eighteenth century, French culture or otherwise, are considered to be within the scope of the activities of the association.

Dr. Shaw is chairman of the division of humanities at the university and Dr. Grava is professor of Romance languages.

Dr. G. I. Kingston, assistant professor of chemistry at State University of New York at Albany, has received a \$3,200 grant from Research Corporation, a foundation, for a project concerned with the synthesis of juniperol, a complex chemical in plants.

Professor Kingston, who joined the university faculty last fall, received his bachelor of arts and doctoral degrees from Cambridge University. Additionally, he did postdoctoral work at Massachusetts Institute of Technology and at Cambridge, working with Lord Todd, noted chemist, before coming to Albany.

Research Foundation makes project grants under the Frederick Gardner Cottrell program to academic and scientific institutions to help younger staff members initiate imaginative fundamental work early in their careers, and to encourage highly speculative research that may contribute significantly to scientific knowledge.

Professor Kingston's research will involve developing juniperol under a synthetic method calling for the development of new techniques.

Two members of the State University of New York at Albany Debate Club will face a touring debate team from Britain Monday (Feb. 20) in the ballroom of Campus Center. Stratton Rawson, a sophomore and Marc Miringoff, a senior, will take the negative side of the proposal, "Resolved that this house would fight in South Viet Nam."

The British team, comprised of David Hunt, a graduate of Bristol University, and Pamela Ings, from Swansea College, Wales, is touring the Eastern United States.

Rawson recently teamed up with another member of the ^{SUNYA} Debate Club to win a trophy as the top negative team at the Siena tournament. Miringoff recently was on a team which won 5 out of 6 debates at R.P.I. and was voted the top affirmative team.

The debate is sponsored by the Speech Association of America. Dr. Paul B. Pettit will give an introduction at the debate which begins at 7:30 p.m. There is no admission charge.

Students at State University of New York at Albany are planning a "Cavalcade of Talent" 24-hour telethon on their campus for the benefit of The New York State Mental Health Association, Inc. /Reported to be the first venture of its kind at a college campus, the unusual program will be conducted March 10-11 from 7 p. m. to 7 p. m. in the ballroom of the university's new Campus Center.

John Fotia and Jeff Mishkin, co-chairmen of the student committee, stated that the show would be watched by viewers on monitors placed in student activity rooms throughout the building. The ballroom will accommodate some 800 for the live show and an additional 1200 will watch the varied program on television in the cafeteria, assembly room, student lounges, and game room.

A host of volunteer performers, including both faculty and students, already have signed up. Among them are The Statesmen, men's choral group; Finley Cockrell, pianist; fraternities and sororities, a German band, comic performers, dramatic readers, vocalists, a banjo band, folk singers, and the like. Twenty hours of programming already have been scheduled.

Masters of ceremonies will include Sorrel Chesin, associate dean of students; Charles Bowler, director of alumni affairs; and Martin Mann, of the speech department, who will rotate in their roles. There also will be filmed shorts selected especially for the occasion and a band will be on stage for the entire telethon.

From: STATE UNIVERSITY OF NEW YORK AT ALBANY

Page 2

Claude D. Price, executive director of the mental health association with offices at 150 State street, Albany, commented: "It is extremely gratifying to witness the growing concern of our youth toward the social problems facing today's community. It is good to see the unique interest and understanding shown by our students at the State University of New York here in Albany toward the needs and problems facing the mentally ill today. With their upcoming mental health telethon, our students are demonstrating to the community the value of a highly creative and intelligent youth program, which to my knowledge, is the first student-sponsored mental health production of this kind in the country." President of the association is Mrs. George R. Metcalf of Auburn.

Contribution pledges can be made by telephone from anywhere on or off campus throughout the telethon and a special telephone bank is being installed to accommodate supporters of the show. Tickets will be sold for the telethon, with student admission, \$2. (\$1.50 with student tax card); faculty admission, \$2.50; and general admission, \$3.

The unusual benefit program will be opened officially by Dr. Evan R. Collins, president of the university.

State University of New York at Albany, in collaboration with Union College, Schenectady, will conduct a six-week NDEA Institute in English for teachers in elementary and secondary schools during the summer. The program in the Albany-Union institute, under the direction of William C. Krause of the English education department at SUNYA, will combine the study of English with that of other humanities.

Mr. Krause stated that the program will emphasize form and structure in thinking, in language, and in the expression of ideas, and in the enjoyment and criticism of the arts, including literature. He added, "The program should make participants aware of the common criteria available for analyzing a work of art in any medium, of some widely debated issues in the field of aesthetics, and of ways to improve elementary and secondary instruction in English by use of the humanities approach."

Courses will include "Literary Criticism and Analysis", Professor Carl Niemeyer, Union; "Cinematic Structure", Professor Frederick Silva, Albany; "Rhetoric in Speech and Writing", Professor Morris Funder, Albany; and "The Structure of Language", Professor H. Alan Nelson, Union. Additionally, there will be three series of lectures: "Form and Structure in Art", Professor Edward Cowley, Albany; "The Nature of Form in Musical Composition", Professor William E. Curtis, Union; and "Models and Structure", Professor Sven Peterson, Union.

The institute, to be held June 26-Aug. 4, will accommodate an enrollment of 22 elementary and 22 secondary teachers of grades 1 through 12. Application forms are available from the institute office SUNYA.

"Coping with Curriculum Change", the third in a series of conferences for curriculum builders conducted by the Capital Area School Development Association at State University of New York at Albany, will be held Wednesday, Mar. 8, at the university's Brubacher Hall.

The morning session will be devoted to the change process at work in the schools, guiding principles for implementing change, and new approaches to science curriculum. Robert Sullivan, chairman of the science department at Burnt Hills Ballston Lake High School, will discuss dynamic science programs in the high school and The Harvard Project, among other related subjects. Steve Ward and Pat Hughes, assistant professors in the science and education departments at Castleton State Teachers College, will talk on the development of science resource centers and science programs for the elementary school.

At the afternoon session, the focus will be on "The University and The State Education Department" and "Changing Programs in Science for Pupils in New York State". Joseph R. Kelly, science supervisor at The Milne School, SUNYA, will speak on the university and science programs in the schools. Hugh Templeton, supervisor of science in the State Education Department, will have as his topic, "The State Education Department and Programs in the Schools".

Frank G. Krivo, director of admissions at State University of New York at Albany, has been named to serve with two advisory groups.

Dr. Richard F. Grego, president of Sullivan County Community College, has appointed Mr. Krivo to the advisory commission on general education at the college. Purpose of the commission is, according to President Grego, "to aid us in evaluating our liberal arts curriculum and general education phase on various occupational curricula."

By election, Mr. Krivo also will serve on the advisory committee of the admissions program of the central administration of State University of New York. The committee advises the director of the admissions program concerning policy and procedures to be used in the uniform application program followed by most of the university units.

Mr. Krivo will direct the orientation institute for new admissions officers for the second year. His appointment was made by Dr. James Spence, director of the Office of the Admissions Program for State University.

Last year Mr. Krivo served as director of the first such institute held by SUNY. Its function is to provide the basic orientation and to guide beginning admissions professionals in the university.

At the first institute conducted last summer on the Albany campus about 50 persons attended. They represented all types of institutions within SUNY. Planning for the second institute is now underway.

With the cooperation of State University of New York at Albany as a community service, the Albany County League of Women Voters will sponsor a seminar on China, "The Citizen Looks at China", beginning Wednesday, Mar. 29, in Draper Hall on the university's downtown campus. Mrs. Michael Dworkin, of Albany, chairman of the seminar and of the league's foreign relations committee, has announced that five professors from area colleges and universities will participate in the program.

Subjects to be considered during the seminar are China history, national characteristics, analysis of mainland China as an economic and military power, consideration of China's image of the outside world and the world's image of China, examination of United States relations with Peoples Republic of China and of the U.S. commitment to the Republic of China on Taiwan, identification of major issues dividing the United States and mainland China, evaluation of specific U.S. policy issues, and consideration of modifications of U.S. policy with regard to China.

Guest speakers will include Professor Donald R. Thurson, of the history department at Union College, Schenectady, Mar. 29; Professor Tsung-Chien Woo, director of Area College Chinese Language Program at Union, Apr. 5; Dr. Yo-Kuang Chu, professor of Asian studies and education at Skidmore College, Saratoga Springs, Apr. 12; Dr. Kuan-I-Chen, professor of economics at SUNYA, Apr. 19; and Dr. Channing Liem, professor of political science and international relations at State University College at New Paltz, Apr. 26.

The department of sociology and anthropology at State University of New York at Albany will present a series of lectures entitled, "Alternatives of Functionalism", beginning Tuesday, Mar. 7. All four lectures will be held in lecture room 3 on library court at the uptown campus at 8 p. m.

Paul Meadows of Syracuse University will speak on the topic, "Functionalism and the Problem of Order and Change", on Mar. 7. He is chairman of the department of sociology at Syracuse. Professor Meadows has written numerous books and articles including the widely read "The Culture of Industrial Man."

On Mar. 14 David Lockwood of Cambridge University will be the second speaker. His topic will be "The Theory of Social Solidarity in the Works of Durkheim, Marx, and Weber." Professor Lockwood is teaching this year at Columbia University. He is the author of "The Blackcoated Worker" and co-author of "The Affluent Worker" soon to be released.

The lecture on Mar. 30 will be by George Zollschan of Wellesley College. The title of his lecture is "Further Explorations in Social Change". It will relate to ^{an} extension of the theory proposed in his book, "Explorations in Social Changes."

The last speaker in the series will be Asher Tropp who has been appointed head of the first department of sociology at the new University of Surrey in England. Until this year Professor Tropp was on the staff of the London School of Economics and Political Science. He is doing research at the University of Texas this year. Professor Tropp, author of "The School Teachers" and other books and articles, will speak on "Functionalism and the Sociology of Development."

Representative Jonathan B. Bingham, member of Congress from New York's 23rd District (Bronx), will be at State University of New York at Albany next Monday evening (Feb. 27) for a public meeting co-sponsored by the World Affairs Council of Albany ^{and} the university's Forum of Politics, a student organization. His address, "Vietnam Reports", is scheduled to begin at 8:15 in the ballroom of Campus Center at the university's uptown location.

Congressman Bingham, who recently returned from Vietnam, will be introduced by Albany's Representative Daniel E. Button of the 29th Congressional District. The guest speaker, who was first elected to Congress in 1964, served as Secretary to former New York Governor Averell Harriman from 1955 through 1958.

A Democrat, Mr. Bingham won his party's nomination in a hotly-contested primary contest against veteran Congressman Charles A. Buckley. He later was re-elected to serve in the 90th Congress. For a year he was U. S. Ambassador on the Economic and Social Council of the United Nations. Additionally Mr. Bingham served as U. S. Representative on the U. N. Trusteeship Council. In 1962 he was elected president of the council.

John Flory, an advisor on nontheatrical films for the Eastman Kodak Company, will be the second speaker in the current symposium on "Science and the Future of Man" at State University of New York at Albany. He will speak Tuesday evening, Feb. 28, at the symposium sponsored by the university's division of science and mathematics. His subject will be "Films, 21st Century".

In his capacity as a consultant in Kodak's Motion Picture and Educational Markets Division, Mr. Flory communicates with individuals and organizations throughout the country which use motion pictures and other audiovisuals. He is a veteran of more than 33 years in the motion picture field. His background includes producing, directing, writing, and distributing motion pictures. He spent five years in Hollywood, where he was on the production staff of Paramount Pictures, Inc.

In the decade prior to 1950 Mr. Flory was president of Flory Films, Inc., New York City, successors to Grant, Flory and Williams, Inc., producers and distributors of a variety of films. He is a graduate of Yale University and a former member of the editorial staff of the Scripps-Howard daily newspaper, "The Cleveland Press."

Mr. Flory is a Fellow of the Society of Motion Picture and Television Engineers; past chairman of the audio-visual committee, Association of National Advertisers; and former member of the committee for radio and audio-visual education, National Council of Churches of Christ in the U. S. A. In 1962 he was recipient of the Industry Film Productions Association Jay E. Gordon Memorial Award for "an outstanding contribution to industrial films."

The guest lecturer, who will be introduced by Dr. Donald S. Allen, professor of chemistry at SUNYA, will speak in the dining room of the Dutch Quadrangle beginning at 8:30. Parking facilities are located in the quadrangle's parking lot at the northwest corner of the campus

Area Code 518 472-7402 - 472-7377

FOR RELEASE:

A. M., WEDNESDAY, FEB. 22

Reporting on an exploratory in-flight survey of the continental United States, Dr. Vincent J. Schaefer, director of the Atmospheric Sciences Research Center at State University of New York at Albany, this evening (Feb. 22) at Buffalo told the Western New York section of the American Chemical Society that "the submicroscopic lead particle concentrations in air over much of the United States are so high and widespread that their presence poses a number of perplexing problems to all scientists, lawyers and government representatives interested or concerned with cloud modification."

Dr. Schaefer, who recently published findings that anti-knock compounds in automobile gas produces invisible lead particles that can unintentionally seed clouds and alter weather, added that the survey presented "some attractive possibilities for the massive seeding of damaging hailstorms and related phenomena." The coast-to-coast survey was conducted in the fall to establish the actual concentrations of submicroscopic lead particles from automobile exhausts which can produce ice nuclei over extensive areas when the particles are activated with iodine. Participants and sponsors were the Division of Air Pollution, New York State Department of Health; Atmospheric, Inc., Fresno, Calif.; and the ASRC.

Of particular interest among the findings was the extent of air pollution at the time of the "big smog" last Thanksgiving. Flights over New York were sponsored by the Air Resources Division of the State Health Department. Dr. Schaefer reported that on Wednesday, Nov. 23, 1966, the instrumented aircraft was flown to the New York

- more -

From: STATE UNIVERSITY OF NEW YORK AT SUNYA

Page 2 - Schaefer story

City-Long Island area where measurements were made over the lower Hudson Valley and at the edge of the massive smog zone hanging over New York City and extending eastward along the southern shore of Long Island. Cross sections were flown between Long Island Sound and the northern edge of the dense smog belt, east of New York City. Concentrations of polluted particles as high as 500,000 per cubic centimeter were found at the edge of the smog area. The measurements were in progress at the time the health officials were issuing a smog alert as the area suffered its worst pollution levels of the year.

After leaving the Metropolitan area, the return flight was made by following the Connecticut Valley to Springfield, Mass., and thence westward to Albany. As the flight was underway, ground level measurements were made by Dr. Schaefer between Albany and Hartford, Conn.

On the third day, Nov. 24, another short flight was made from Albany across the southern Adirondacks. On the fourth day, Nov. 25, a flight was made from Albany to Oneonta, Binghamton and Elmira, where stormy weather grounded the plane. The next day the flight continued to Jamestown, Springville and Buffalo, thus completing the New York State survey as planned.

In commenting on the entire survey, Dr. Schaefer said, "The reason we go out of state to make such measurements is that air over the Mississippi Valley in the evening is often over New York State the next day. The flight showed a concentrated mass of polluted air extending from the Los Angeles region to the east coast. It is true that this occurred during a high pressure system which favored stable air but it is no longer possible to find extensive areas of unpolluted air over the United States.

From: STATE UNIVERSITY OF NEW YORK AT ALBANY

Page 3 Schaefer story

It is becoming increasingly important for our own welfare in the State of New York to know something about pollution levels all over parts of the U.S., most of which is upwind of New York."

The flight totaled 6,300 miles and lasted from November 18 through December 3. Over New York State there were 74 soundings and along the transcontinental flight route there were 266 sampling spots.

The sampling flight through more than 6,000 miles of polluted air over the country was made in a small twin-engined airplane. Equipped to measure atmospheric particles emitted by automobile exhausts, which were recently found to produce large number of potential ice nuclei when exposed to iodine vapor, the flight was described as "highly successful" by Dr. Schaefer in establishing the widespread occurrence of such particles in the lower mile of air from coast to coast.

In addition to measuring the submicroscopic lead particles which are emitted in the exhaust of internal combustion engines using leaded gasoline (the nearly universal fuel now in use by all autos), measurements were also made of the concentrations of cloud nuclei of the total number of all atmospheric particles of iodine vapor and of natural ice nuclei. A total of 256 in-flight measurements were made during the research trip which began at Fresno; swung down to Los Angeles, took an easterly course passing over Prescott, Ariz.; Albuquerque, N.M.; Oklahoma City; Little Rock, Ark., Chattanooga, Tenn.; Charlottesville, Va., to Albany. A total of 94 observations were made enroute, both within and above the smog-laden air which was trapped under a

Page 4 Schaefer story

temperature inversion whose top ranged from 2500 to 5000 feet above the ground. Smog-filled air in varying intensities was encountered as a continuous blanket all the way to the east coast from the Pacific. The latter part of the flight path crossed the New Jersey-New York metropolitan complex on Monday, Nov. 22. The intense smog which choked the New York City area on Wednesday and Thursday, Nov. 23 and 24, already had started to accumulate. Thomas Henderson, president of Atmospherics, described it when he landed at the Albany airport Monday, Nov. 21, as "approaching a bad smog condition in the Los Angeles Basin."

After arriving in Albany, plans were formulated to conduct an intensive aerial survey over New York State. The first of four flights was made on Tuesday, Nov. 22, and covered the area from Albany to Boonville to Rochester to Oswego and then over the eastern end of Lake Ontario to Watertown. From Watertown, the flight route crossed the middle of the Adirondack Mountains to Ticonderoga and thence southerly over Lake George and Glens Falls to Albany. The cleanest air encountered during the entire flight from California to the eastern seaboard was encountered and measured over the middle of the Adirondacks. While the aerial flight was underway, Dr. Schaefer and Austin Hogan, ground observers of the ASRC, obtained Aitken and cloud nuclei measurements. Dr. Schaefer made a transect from the center of the City of Albany to the top of the Helderberg Mountains, while Mr. Hogan obtained measurements in the Utica-Boonville and Cobleskill-Schenectady areas.

From: STATE UNIVERSITY OF NEW YORK AT ALBANY

Page 5 Schaefer story

After the New York State survey the flight continued to Detroit and Midland Michigan; thence down Lake Michigan to Chicago; westward to Dubuque, Iowa; Rapid City, S.D.; West Yellowstone, Mont.; Boise, Idaho, to Newport, Ore., where the ASRC mobile unit had just completed a month's survey of maritime air coming in from the vast reaches of the Pacific Ocean. The flight then veered southward along the Pacific to San Francisco and thence to Fresno, the home base of Atmospherics, Inc.

The flight covered a total distance of 6300 miles during which time 266 sets of in-flight measurements were secured, both within and above the stable air in which polluted air is generally trapped.

Measurements above the top of the inversion, which in meteorology is termed the "exchange layer," showed in general that serious levels of pollution are very widespread over the United States and not limited only to centers of high population. It is this extensive zone of pollution which causes the rapid build-up of hazardous levels of pollution when weather systems slow down or "stagnate," a common occurrence in the fall months particularly.

Dr. Schaefer pointed out that when there is no fresh country air to flush out the build-up of pollution in the urban area, it takes a massive weather change from the northern part of the continent to afford relief. This extensive country-wide mass of pollution is of worrisome magnitude and should emphasize the dangers ahead and the urgency of massive efforts to reduce pollution levels at their sources. During the flight 68 observations showed concentrations of pollution of 10,000 per cubic centimeter or higher. Counts greater than 5,000 were found in air that in most

Page 6 Schaefer Story

cases was visibly dirty. Most of the soundings which showed pollution counts higher than 5,000 also showed that potential ice nuclei concentrations due to lead, that is particles activated by exposure to iodine vapor to form lead iodine, had values of 10,000 per liter or higher.

In his report Dr. Schaefer revealed that although an attempt was made in every sounding to establish the level of natural ice nuclei at minus 20 degrees Centigrade, no nuclei were found during the flight. However, he added that the finding was not surprising since the commonly observed concentration of naturally occurring ice nuclei at this temperature is found to be not more than 1 per liter, which is the lower limit of sensitivity of the portable chamber used in making the measurements. In contrast, the levels of activated lead iodide measured with an identical instrument ranged from 1,000 to 100,000 per liter and often exceeded the maximum concentration which can be measured.

Attempts were also made during the flight to detect free iodine in the sampled air. This was done by producing high concentrations of lead particles in the cold chamber by sparking lead electrodes. It is quite likely, concluded Dr. Schaefer, that the lifetime of free iodine molecules is of very short duration wherever high concentrations of atmospheric particulates are present, as was the case throughout the particular flight. He added that not ruled out was the strong possibility that lead particles from auto exhaust might eventually be activated by such absorbed iodine, especially if it is not in chemical combination with the particles on which it is deposited.

T.V. & Spotlight

FROM: Kenneth Frasure

SUBJ: Immediate Release

DATE: February 20, 1967

PHILADELPHIA PA. (Feb. 20) --- Kenneth Frasure,
(your full name)

Professor of Educational Administration at State University of New York at Albany
(grade you teach, or title) (name of school system, university)

will participate in the National Education Association's Regional Conference on Instruction from March 1-4 here at the Benjamin Franklin Hotel.

James E. Allen, Commissioner of Education for the state of New York, and NEA President Irvamae Applegate head a list of distinguished educators who will take part in the three-day conference. Theme of the meeting is "Imperatives in Education."

Participants will hear an "assessment" of the current controversy over proposals for a national assessment of public schools. Dr. Robert S. Gilchrist, director of the Mid-Continent Regional Educational Laboratory in Kansas City, Mo., will give an analysis of assessment in education.

Other conference highlights will include:

--- Two leading educators, one an expert in the field of technology in education and the other a specialist in human development, will explore the topic, "Humanizing Education." The educators are Gabriel D. Ofiesh, director of the Center for Educational Technology at the Catholic University, and Clara Cockerille, professor of education and psychology, Westminster College, New Wilmington, Pa.

--- A Report on "Practices and Innovations in Curriculum Design" by Frank Brown, principal of the nongraded Melbourne High School, Melbourne, Fla.

A joint two-day meeting of the Eleventh Annual Conference on New York History and the Conference on Early American History and Culture will be held in April at State University of New York at Albany.

On Friday, Apr. 7, beginning at 3 p.m., the program will be devoted to "Classic Scholars of New York History and Changing Interpretations." Hugh M. Flick, associate commissioner of cultural education, State Education Department, will serve as chairman. "Carl Becker and New York History" will be the subject of an address by Bernard Mason, State University of New York at Binghamton, and Linda Grant De Pauw, of The George Washington University, will talk on "E. W. Spaulding and New York History".

Commentators will be Alfred Young, of Northern Illinois University, and Milton Hamilton, editor of the William Johnson Papers.

In the evening Dr. Evan R. Collins, president of the host university, will welcome the group at a banquet. Speaker of the evening will be Wilcomb E. Washburn of The Smithsonian Institution.

At the Saturday morning session, beginning at 9:30, the subject will be "Intellectual History of Colonial American Education." Serving as chairman will be James E. Allen, Jr., New York State Commissioner of Education. Robert Middlekauff, of the University of California at Berkeley, will discuss "Cotton Mather's Educational Ideas" and Arthur D. Kaledin, of the Massachusetts Institute of Technology, will speak on "Piety and Intellect at Early 18th Century Harvard." Lawrence Cremin, of Teachers College, Columbia University, and Hyman Kuritz, of SUNYA, will be commentators.

At noon a business meeting of the Eleventh Annual College Conference on New York History will be held.

Inquiries about the upcoming joint meeting can be sent to Harry S. Price, professor of history at SUNYA.

A directory of New York State high schools offering a one-semester economics course has been prepared by the Center for Economic Education of State University of New York at Albany.

The information was obtained in a survey made by the New York State Council on Economic Education. Economics courses are taught in 235 secondary schools throughout the state.

Professor J. Woodrow Sayre, director of the center and executive director of the council, stated that it was "encouraging to note that many responses, not included in the report, have indicated that economics is taught within the framework of other subjects."

State University of New York at Albany has received word that an additional sum of \$25,327 has been approved by the Division of Student Financial Aid, Bureau of Higher Education, Department of Health, Education, and Welfare, as a federal capital contribution to the National Defense Student Loan Fund at the university.

Previously the university had been notified of an allocation of loan funds of \$416,648, thus making available for the current academic year at SUNYA a total amount of \$441,975.

Additionally, the division has approved an allocation of \$7,000 to the university under the U. S. Loan Program for Cuban Students for the present semester.

Published by the New York State Council on Economic Education, the 1967 edition of "Paperbound Books in Economics", by Professor J. Woodrow Sayre, director of the Center for Economic Education at State University of New York at Albany and executive director of the council, is now available.

The book contains an annotated list of 600 publications. It first came out in 1961 and each year since then over 6,000 teachers have requested copies. One copy is available without charge upon request of any teacher in New York state.

The 60-page volume is planned as an aid in teaching economics, with the books especially selected and classified. Area residents who served on the preparation committee include Dr. Louis R. Salkever, chairman of the economics department at SUNYA, and William F. Warren, of Shaker High School, Newtonville.

Robert A. Stierer, formerly city manager of Troy, has accepted a temporary appointment as a consultant at State University of New York at Albany. He will serve in the office of Dr. Milton C. Olson, vice president for management and planning.

Mr. Stierer, who lives at 1098 Madison avenue, Troy, was manager of that city from January 1964 until his resignation several weeks ago. He received his bachelor of arts degree from the University of Chicago in 1942. After having served in the armed forces overseas during World War II he returned to the university where he did graduate work in political science for a year.

Mr. Stierer will begin his new duties at SUNYA next Thursday, Mar. 2.

Carol Graham, a senior at The Milne School, State University of New York at Albany, has been named the school's 1967 Betty Crocker Homemaker of Tomorrow. She is now eligible for state and national competition and a possible \$5,000 in scholarship awards.

Carol, daughter of Mr. and Mrs. John Kenneth Graham of 71 Manning boulevard, Albany, finished first in a written knowledge and aptitude test given on December 6 to Milne senior girls.

A statewide competition of individual school winners will be held, with the winner receiving a \$1,500 scholarship and the right to compete in the national finals.

This is the 13th year of the Betty Crocker Search for the American Homemaker of Tomorrow, initiated in 1954-55 by General Mills to emphasize the importance of home-making as a career.

The extra-curricular activities of Miss Graham include varsity cheerleader, secretary of the National Honor Society, president of the Girls' Athletic Association, president of Ambassadors (school service club), literary editor of the school yearbook and member of Ski Club. She is also a Regents scholarship winner and straight "A" student.

Professor Vernet Eaton of Wesleyan University will lecture on "The Demonstration Lecture as an Art" at State University of New York at Albany Tuesday afternoon, March 7. Sponsored by the university's physics department, the lecture will take place in room 125 of the physics building on the uptown campus beginning at 4:30.

Professor Eaton has driven a station wagon full of demonstrations throughout the United States and Canada, lecturing at colleges under the auspices of the American Institute of Physics. He is a past president of the American Association of Physics Teachers and the recipient of the Oersted Medal for notable contributions to the teaching of physics.

George S. Kaufman and Marc Connelly's play, "Merton of the Movies," portrays all the flamboyance and excitement of the Jazz Age. In keeping with that tone, tickets for "Merton" will go on sale Wednesday (March 1) at State University of New York at Albany to the music of the roaring 'Twenties and the silent movie age.

"Merton", one of the largest productions ever to be staged by State University Theatre, tells the simple story of a young man who goes West to Hollywood with stars in his eyes and a headful of illusions. From this deceptively basic premise, Kaufman and Connelly reveal all the sham and hollowness of Hollywood by taking the title character, Merton Gill, through a series of definitely un-serious misadventures. Merton eventually succeeds, but in a way as unlikely as ever imagined.

The play is a satire, but Kaufman and Connelly demonstrate the greater effectiveness of satire by example, rather than by preaching, and in doing so, create comic situations reminiscent of the great silent-screen comedies.

Under the direction of James M. Leonard, the play will run Wednesday through Saturday, March 15-18, in Page Hall, at 8:30 p.m. Tickets will be on sale every weekday until the end of the run. They may be obtained in person or by calling the SUT box office between 11:15 a.m. and 3:30 p.m. Since a large advance sale is expected, it has been suggested that tickets be reserved early.

Michael Butler Yeats, only son of the poet William Butler Yeats, will speak at State University of New York at Albany Wednesday evening, March 8, beginning at 8 o'clock. His lecture, to be given in the dining room of Colonial Quadrangle, is entitled, "Words and Music: The Role of Music in the Works of William Butler Yeats."

The guest lecturer, born in 1921, grew up at Thoor Ballylee, the romantic old tower which was the Irish residence of the poet. He attended Trinity College, Dublin, taking honors in history. He became a barrister and later he was appointed to the Irish Senate by President Eamon De Valera. He subsequently was elected to the Senate where his duties occupy him full time except for the writing of a music column for a Dublin newspaper.

The lecture, open to the public, is sponsored by the university's English department. Mr. Yeats will use tape recordings of Irish ballads sung by his wife, Grainne O'Hagerty, acclaimed as Ireland's outstanding Irish harpist and singer of Irish ballads, to illustrate the role of music in his father's poetry.
