

STATE UNIVERSITY OF NEW YORK AT ALBANY

Albany, New York 12203

DATE: 21 August, 1967

FROM: Walter M. Tisdale

TO: President Evan R. Collins

SUBJECT: Campus Progress Report No. 95

This morning we took over the Earth Science building upper three floors, plus B-11 in the basement, for storage. The takeover was subject to a small punch list. Actually, this building was in as good, or better shape than any other we have taken over in the first instance. A good deal of furnishings and equipment is already on hand and movement of some of this into the building will start this afternoon.

Movement of new equipment is scheduled to continue through this week, and next week, movement of existing equipment from other locations on campus into the Earth Science building will get under way.

The remainder of the basement of the building is slated to be turned over on 7 September. Meanwhile, B-11 should suffice to accommodate equipment destined for the basement.

Walter M. Tisdale
