### SUNYA PLACEMENT, ALUMNI COLLABORATE IN JOB EFFORT

The University Placement Service and the Office of Alumni Affairs at State University of New York at Albany, with the support of the university's Alumni Association, have undertaken a cooperative venture to assist in securing leads to positions for both students and alumni registered with the Placement Office.

More than 14,000 alumni, covering a 40-year period, and other friends of SUNYA will be receiving by mail a descriptive brochure requesting them to indicate job openings of which they are aware.

Clinton Roberts, director of placement, and David Jenks, director of alumni affairs, have indicated that they consider the collaborative effort to be an important step in a growing relationship that will mean broader placement for students and alumni.

### SUNYA RECEIVED GRANTS TOTALING \$355,099 IN DEC.

Grants totaling \$355,099 were received by State University of New York at Albany during December according to a report by Vice President for Research Louis Salkever.

Recipients included Edward Berger, biology, \$21,250 from National Institute of General Medical Sciences for "Genetic Control of Protein Synthesis in Eucaryotes"; Austin Hogan, Atmospheric Sciences Research Center, \$15,631 from National Oceanic and Atmospheric Administration and U. S. Department of Commerce for "Continuing Survey of Maritime Aerosols"; Paul Marr, geography, \$40,617, Office of Sea Grant Programs and USDC, "Management of the New York Coastal Zone."

Also, Donald McNaught, biology, \$16,266, OSGP and USDC, "Modelling of Biological Impacts of Thermal Discharge on Lake Ontario"; Hilton Power, general studies, \$28,000, New York State Police, "Traffic Science Program"; Ramaswamy Sarma, chemistry, \$1,429, North Atlantic Treaty Organization, "NMR Study of Important Biological Molecules"; Jon Scott, ASRC, \$10,456, from OSGP and USDC, "Multiple Utilization of Power Plant Buffer Zones and/or Corridors."

Also, Ronald Stewart, ASRC, \$5,000, OSGP and USDC, "Alternate Means of Cooling Electricity Generating Stations- Analysis of Feasibility"; Bernard Vonnegut and William Boeck,

-continued-

ASRC, \$18,200, National Science Foundation, "Meteorological Effects Produced by Niagara Falls"; Dr. Vonnegut and Richard Griffiths, ASRC, \$58,000, NSF, "The Electrical Properties of Snowstorms"; Jerry Weinberg, astronomy, \$15,750, National Aeronautics and Space Administration, "Polarimetric Observations of Comet Kohoutek from The Ground."

Total funding from the State University Research University Awards Fall 1973 series was \$123,700.

### FOCUS '74 AT SUNYA TO OFFER LATEST IN MEDIA DEVELOPMENTS

Focus '74, a media get-together for an exchange of new ideas and techniques, will be held the weekend of April 19-21 at State University of New York at Albany. While the university's Educational Communications Center and Office of University Affairs will host the symposium, the program is being planned by a committee of Albany area residents whose interests and knowledge are in those fields included in the program. Among those on the planning committee are a television news anchorman, a motion picture producer who traveled with President Nixon to China, the director of an area camera club, an advertising agency director, educators, a museum curator of exhibits, and the manager of a major industry's graphics and photography department.

As indicated by the variety of interests represented by the planners, Focus '74 will cover a broad spectrum of media-related topics. Participants will be able to choose from the many seminars, exhibitions, workshops, lectures, and demonstrations those which they wish to attend.

The interests of those who may plan to attend may well be as varied as the topics. Amateur cinematographers and still photographers will be able to catch up with the latest equipment

-continued-

and methods in their fields; professionals in related fields will have an opportunity to bone up on procedures and techniques in each other's specialties, for example, the journalist and photo-journalist; high school teachers may want to learn the methods and value of the latest audio-visual aids for classroom application; and college and university professors will find worthwhile information in such fields as graphics, photography, art, journalism and television.

The symposium will emphasize the practical approaches for translating ideas into creative results in several media forms. The latest in new ideas and techniques in still photography, motion pictures (16 and super 8), television production, graphics, and multi-media presentations will be offered.

Many individual workshops will be held. Motion picture production, for instance, will be covered from start to finish, from the original idea to the released print. Among the included elements will be planning, cost, direction, lighting, sound, camera work, editing, and laboratory work.

The Smithsonian Institution will offer three workshops. One will detail how to exhibit photography and art, another will explain simple methods of color photography, and a third will explore photographic silk screening.

There will be a lecture-demonstration on multi-media presentation techniques, taking a project from beginning to end. Other areas of instruction and demonstration are the educational uses of motion picture and still photography, photo journalism, and funding.

Negotiations are being completed with a major film production company to premiere a motion picture at the seminar and to make available its director for a question-and-answer period following the screening. A number of equipment manufacturers will sponsor displays and exhibits of their products.

Attendance at some of the workshops will be limited. Persons interested in further information about Focus '74, including registration details, may write to Bette Herzog, assistant for university communications, Administration 232, SUNYA 12222 or telephone 457-5976.

### ELLINWOOD HEADS PHI BETA KAPPA OFFICERS AT SUNYA

The newly-chartered chapter of Phi Beta Kappa at State University of New York at Albany will be installed officially Thursday, Mar. 7, when, also, elected officers will assume their duties.

DeWitt C. Ellinwood, associate professor of history, has been elected president of the chapter. His fellow officers are Malcolm F. Smiley, professor of mathematics, vice-president; Perry D. Westbrook, professor of English, secretary; Janet Hood, director of Student Health Service, treasurer; and Arthur A. Ekirch, professor of history, historian.

Resident membership in the chapter includes all Phi Beta Kappa members on the faculty and administrative staff, as well as student members on campus. Graduate students enrolled at SUNYA who are members of another chapter are included in the SUNYA resident membership.

### SUNYA PHYSICIST AND INDIAN SCIENTIST RECEIVE NSF GRANT

A joint collaborative project submitted by the Indian Institute of Technology and State University of New York at Albany has been approved for support by the National Science Foundation for research in nuclear physics, science education, and related activities for a period of three years. The principal investigators of the award are Girijesh K. Mehta of India and Jagadish B. Garg, professor of physics at SUNYA.

Under the terms of the grant a sum of about \$75,000 has been awarded to the Indian Institute of Technology. As a co-operating scientist, Professor Garg will visit the Indian site at regular intervals at N.S.F. expense and will provide the necessary advice to the foreign principal investigator and to N.S.F. The objectives of the collaborative project between scientists of the two countries is not only to enhance the scientific endeavors of the two participating institutions but, also, to foster the development of better understanding and cooperation between the scientists of the two countries.

Professor Garg joined SUNYA in 1966 and was responsible for the installation and evolution of the university's Nuclear Accelerator Facility. The laboratory, dedicated in August 1971, is currently used for research in nuclear and solid state physics.

-continued-

Professor Garg is internationally known for his important scientific contribution in the field of neutron physics and is serving as a regular visiting scientist at the Columbia University Synchrocyclotron Laboratory and at Brookhaven National Laboratory. Recently he was appointed a consultant to the Oak Ridge National Laboratory for a period of two years. Last year he spent six months at the Australian Atomic Energy Commission at Sydney.

Dr. Garg is a Fellow of the American and British Physical Societies. His biography is listed in the Marquis "Who's Who in the World" and in other reference books.

### 82 SUNYA FACULTY RECEIVE \$123,700 IN SU RESEARCH GRANTS

Eighty-two faculty members at State University of New York at Albany have received grants totaling \$123,700 from the SUNY Research Foundation as part of the University Awards fall series. Across the state, 589 persons on 33 campuses received a record \$896,000. Grants to Albany recipients comprise eight percent of the total awarded.

Applications were reviewed and ranked by the all-faculty University Awards Committee under guidelines developed by a Joint Awards Council. The program is sponsored jointly by the university and the Research Foundation which derives support from federal and private sources and from other foundations.

Albany recipients are Kenneth Able, biological sciences, Tracking Radar Studies of the Orientation of Migrating Birds, \$2,459; Laurel Andrew, art, The Religious Architecture of the Later-Day Saints, \$1,440; Alexander Andreyewsky, slavic languages and literature, Soviet Clandestine Songs (1953-73), \$1,170; Donald Birn, history, The League of Nations Union 1918-1945, \$1,440; Herbert Brown, mathematics, Commutants of Sounded Operators on Convergent Sequences, \$1,440; Jarka Burian, theatre, Theatre in Czechoslovakia Between the Wars, \$2,275; Kevin Burke, geological sciences, Geology of the Tibetan Plateau, \$1,590.

-continued-

Robert Carmack, anthropology, Preparation of Cronicas Quicheanas, \$1,600; Frank Carrino, Inter-American studies, Preparation of Definitive Edition of Martin Fierro, \$1,259; Lindsay Childs, mathematics, Graded Azumaya Algebras, \$1,440; Richard Churchill, mathematics, On the Decomposition of Invariant Tori, \$1,264; Petr Chylek, atmospheric sciences, Air Pollution and Climate, \$2,475; Richard Clark, educational psychology, A Study of Pupil Behavior in Different Classroom Settings, \$486; Sarah Cohen, English, Jewish-American drama, \$1,440; Edward Cowley, art, Paintings of Events and Activities at Altamont, N.Y., \$1,264; Nelson Cue, physics, X-Ray Spectroscopy of Heavy Ion-Atom Collisions.

Stephen Delong, geological sciences, Mineralogy of High-Pressure Xenoliths, Aleutian Islands, \$754; John Dewey, geological sciences, Notre Dame Bay Newfoundland-Distended Ordovician Island Arc, \$1,586; Robert Eisenberger, psychology, Incentive Contrast of Choice Behavior, \$1,264; Morris Eson, psychology, Egocentricity in Communication and Moral Judgment, \$1,440; Lanny Fields, history, Revision of Thesis for Publication, \$1,264; Jeanne Fisher, rhetoric and public address, Impact of Burkean Identification upon Attitude Change, \$1,254; Nathaniel Friedman, mathematics, Inducing Kolmogrov Automorphisms, \$1,440; Mojmir Frinta, art, Ramification of Technique and Style in Byzantine Icons, \$3,150.

Richard Goldstein, mathematics, Stiefel-Whitney Homology Classes, \$1,264; Josiah Gould, philosophy, Stoic Logic in Alexander's Commentary on Aristotle's Logic, \$1,440; Norman

Greenfeld, psychology, Reinforcement Conditions and Imitative Responses, \$1,264; Mark Greenwold, art, To Complete Paintings in Progress, \$1,440; Mary Elizabeth Grenander, English, Edition of the Collected Letters of Ambrose Bierce, \$1,669; William Haboush, mathematics, The Classification of Orbitally Rigid Subgroups, \$1,440.

Drew Hartzell, music, Medieval English Musical Notation from 750 to 1200, \$2,152; Floyd Henderson, geography, Developing Interpretation Keys for Radar Land Use Maps, \$1,345; Richard Hester, music, Slide Collection and Centralization of Keyboard Instruments, \$966; Robert Hicks, psychology, Hemispheric Time-Sharing of Verbal and Manual Performance, \$1,264; Robert Hoffman, history, Political Radicalism and Cultural Reaction in France, \$1,559; David Horenstein, personnel services, Anxiety and the Lack of Transfer of Human Relations Training, \$522; Akira Inomata, physics, Geometrical Study of Gauge Theory and Dynamical Symmetry, \$1,264; Billie Jean Isbell, anthropology, The Dialectic of Urban and Rural Ideologies: A Peruvian Case, \$2,532; Colin Izzard, biological sciences, Control of Calcium Levels in Fibroblast Motility, \$1,488; Benton Jamison, mathematics, A Martin Boundary Approach to Maximum Entropy Principles, \$1,440; Joe Jenks, mathematics, A Characterization of Groups With Symmetric Group Algebras, \$1,440; Michael Kaufman, English, In Praise of Rashness: Studies in Shakespeare's Tragedies, \$1,264.

James Leonard, theatre, Duffy and Forrest and the South Pearl Street Theatre, \$1,440; Burt Levy, music, The

The Computer as Calculator of Musical Ideas, \$2,390; Ronald Ley, educational psychology, Latency of Associations in Recognition and Recall Memory, \$2,333; Lloyd Lininger, mathematics, Foliations Induced by Locally Free Actions, \$1,440; Arthur Loesch, atmospheric sciences, Energy Exchanges Among Baroclinic Waves Due to Interactions, \$2,637; Thomas MacGregor, mathematics, LP Mean Inequalities for Analytic and Univalent Functions, \$1,440; Patrick McKeown, business administration, The Fixed Charge Transportation Problem, \$1,264; Robert Meyers, philosophy, Sellars' Critique of Foundations, \$1,440; Henning Meyn, philosophy, The Logic of Transcendental Arguments, \$1,264.

Ruth Montague, educational psychology, Preschool Screenings-Stability and Predictive Validity by Gr. 2, \$1,440; Joseph Morehead, library science, Access and Use of National Archives Documents Collection, \$484; Harold Morick, philosophy, The Concept of a Person, \$1,440; Robert Morris, mathematics, Embedding in P-Divisible Groups, \$1,440; Jerome Myers, mathematics, P-Adic Automorphic Functions, \$1,440; Colbert Nepaulsingh, Romance languages, Medieval Spanish Literary Structures, \$1,600; Ricardo Nirenberg, mathematics, On the Induced Operator, \$1,264; Michael Parenti, political science, The Politics of Community Protest, \$1,264; Rodney Patterson, Slavic languages, The Poetry of Irina Dodevceva, \$1,264; Michael Range, mathematics, CK Estimates for the Cauchy-Riemann Equations, \$1,440.

William Reese, philosophy, Conceptual Frameworks of Religious Discourse, \$1,440; Gerlene Ross, speech pathology,

Distinctive Features of the Nonverbal Behavior of Stutterers, \$1,075; Russell Rupp, mathematics, Nonlinear Mathematical Optimization, \$1,440; Charles Scholes, physics, Electron Nuclear Double Resonance on Heme Compounds, \$2,440; Edmund Sherman, social welfare, The Significance of Cherished Personal Objects for the Aged, \$2,960; Frederick Silva, English, A Critical History of Warner Brothers Films, 1930-40, \$1,264; Kenneth Stern, philosophy, Recent Skepticism, \$1,440; Joseph Strelka, German, Theory of Literature, \$1,264; Richard Sullivan, mathematics, Transformation Groups, \$1,264.

Edward Thomas, mathematics, Coupled Non-linear Oscillators, \$1,440; Alfred Tong, mathematics, Countable Additivity of Measures and Kernal Functions, \$1,264; Edward Turner, mathematics, Structure Theorems for Dippeomorphisms Groups, \$1,264; James Victor, educational psychology, Hyperactive Impulsive Behavior in Primary School Children, \$2,105; Dwight Wallace, anthropology, Excavations at Palace A. Utatlan, Guatemala, \$1,350; Paul Wallace, classics, The Topography of Cyprus and the Excavation of Idalion, \$1,264; Chung Wang, atmospheric sciences, Energy Transfer Mechanisma for Sar Arcs, \$990; Kenneth Welch, art, Technical Casting of Precious and Low Melting Point Metals, \$1,440.

Paul Wheeler, sociology, Aged Blacks: Social Category or Statistical Artifact, \$1,264; Donald Wilken, mathematics, Topics in Complex Function Theory, \$1,440; Joseph Zacek, history, An Annotated Translation of Edvard Benes, Mnichovske DNY, \$800; and Jon Zubieta, chemistry, Complexes of Molybdenum with Sulfar-Containing Chelates, \$2,344.

### PRESIDENT BENEZET TO LEAVE SUNYA POST IN 1975

Educator To Return To Academic Pursuits After More Than A Quarter Century As College And University President; Supports Performance Review Before Successor Search

Louis T. Benezet, president of State University of New York at Albany since July, 1970, has informed the university community that he will return to academic duties in July, 1975. By that date he will have completed 27 years as a college and university president in four different institutions.

Dr. Benezet, in a message to faculty and students, said that for some time it had been his hope that he might return eventually to research and writing in contemporary higher education which he described as/"area of rising and critical importance in the United States".

The Board of Trustees of State University of New York last year extended the opportunity after a five-year term of office for a president to return to academic duties. Dr. Benezet

-continued-

stated that a "recent personal conference with Chancellor Boyer\* has led to an agreement that I shall make that step a year from next July."

Provided in the trustees' policies is a presidential performance review in the event an incumbent wishes to be considered for reappointment after five years. President Benezet has proposed that the performance review be held on the State University at Albany campus during the spring "as perhaps the best way to prepare the search for a successor to the presidency of the University Center in July, 1975."

Continuing in his message, the university administrator commented that the University Center at Albany, through changes in the nation's economy and outlook, was faced in mid-1970, the time of President Benezet's arrival, with a demand to change from unbridled growth to a consolidation of effort and a series of internal reallocations. He added, "Although during the past four years we have not had capital additions or net additions to teaching faculty, student enrollment has grown by 12 per cent. Currently, we have a flood of applications surpassing all predictions. The time is good for a reappraisal of the University Center's course ahead."

By 1975, President Benezet pointed out, "I believe we shall know enough about ourselves and our prospects to present a clear and inviting picture to the new administration. We are

-continued-

\*Ernest L. Boyer  
Chancellor, State University of New York

working at present on the parameters of qualitative growth, which may be one of the next SUNY frontiers...Our students and faculty I would not exchange for those in any university of our stage of development or beyond it, for that matter."

Applications for admissions to SUNYA, which closed the last week in January, totaled 13,200, up 2,800 over a year ago at a later date. The fall 1973 enrollment was 14,731, a total of 10,752 full-time students and 3,979, part-time. There were 9,840 undergraduates and 4,891 graduate students.

Chancellor Boyer paid tribute to Dr. Benezet's leadership at the university, stating that he had arrived "at a crucial moment in its history." He added, "He has led the institution with vigor, wisdom, and great skill. During his administration new priorities have been established and the educational excellence of the institution has increased."

Chancellor Boyer continued, "I regret that Dr. Benezet has elected not to continue as President after the completion of this five-year term. However, I am delighted that he will remain with the State University of New York as a scholar and professional colleague, focusing especially on the study of American higher education."

J. Vanderbilt Straub, chairman of the University Council, said, "President Benezet has done an outstanding job as head of State University at Albany. I know I share the feelings of all of the members of the University Council in expressing my regret over his decision to leave the office of president."

During his distinguished career Dr. Benezet has been active in many endeavors concerned with higher education. He has served on the board of directors of the American Council on Education; as chairman of the National Advisory Committee, Agency for International Development--university relations; and on the National Advisory Council. He also is past chairman of the Association of American Colleges Commission on Academic Freedom and Tenure, of the Independent College Funds of America, and of the National Science Foundation Advisory Committee for Institutional Relations.

Most recently Dr. Benezet has served on the New York State Commissioner's Advisory Council on Higher Education and the Governor's Task Force on Financing of Education, and as chairman of SUNY Region III.

Prior presidential positions were at Allegheny College, Meadville, Pa.; Colorado College, Colorado Springs, Colo.; and at Claremont University Center, Claremont, Calif., where he served from 1963 to 1970 when he came to Albany.

STATE UNIVERSITY OF NEW YORK AT ALBANY

### TWO EXHIBITIONS OPEN FEB. 25 AT SUNYA ART GALLERY

Two exhibitions will open Monday, Feb. 25, at the University Art Gallery, State University of New York at Albany. "4,623,926 (Genocide)" is intended by the Society of Illustrators to be a contemporary continuation of the long history of artists' vivid reactions to war and their condemnations of its inhumanity. Wayne Lennebacker's most recent large photographs reflect the artist's continuing interest in motion study. He is an assistant professor of photography at the university.

In his introduction to the "Genocide" exhibition, Donald M. Halley, Jr., director of the Hudson River Museum, points out that "most people coming to a Society of Illustrators' exhibition will expect to find an array of expert graphic techniques and skillful watercolors in a polite, perhaps amusing form...This is no such exhibition, as even the title makes clear. For passion and personal vision it will certainly dispel any drawing room conceptions of the art of illustration."

The works in "Genocide" are created through a wide variety of media and forms of expression. There are drawings, paintings, collage, assembled objects, constructions and sculpture by more than 50 artists. Their styles range from the inward, intense reaction of the expressionist artist to the ironic and hard commentary of the pop artist.

-continued-

Mr. Lennebacker has exhibited widely in the Capital District area in recent years as well as in a number of national traveling exhibits. The dance studios at SUNYA have photo murals by the artist and he also has been commissioned to do murals for the university's Education Building.

In addition to the large photos, the show also will contain a series of smaller color and black and white prints dealing with motion in nature.

A public reception for Mr. Lennebacker will be held in the gallery Tuesday, Feb. 26, from 7:30 to 10 p.m. The show continues through Mar. 27. The "Genocide" exhibit may be seen through Mar. 17.

The gallery's regular hours are Monday through Friday, 9 a.m. to 5 p.m., and Saturday and Sunday, 1 p.m. to 5 p.m.

\* \* \* \* \*

February 14, 1974

### SUNYA'S COLLEGE OF GENERAL STUDIES TO OFFER 40 NON-CREDIT COURSES

The College of General Studies at State University of New York at Albany will offer 40 non-credit courses during the spring. All will begin early in March, with the exceptions of tennis and introduction to wines and cheeses, planned for April.

The schedule includes: Ballet, 1 and 2; Jazz Dance; Modern Dance; Radio As Literature; Ireland and Its Literature; 50 Years of Best Sellers: The Anatomy of Literary Success; Beginning French: A Conversational Course for Travelers; Contemporary Chinese for the Interested Layman; Reading Improvement; Successful Business and Technical Writing; Taking a "B" Line Through Musical History; Summerfare: A Springtime Survey of The Summer Arts Festival.

Also, Seminar on Human Sexuality; English for Speakers of Other Languages; Lithography; Living Crafts of the Indians; Cartooning in Theory and Practice; Batik and Tie-Dye; Watercolor; Serigraphy, Painting; Independent Study: Advanced Painting Workshop; Basic Drawing; Drawing Workshop; Creative Design; Intermediate Design.

Also, Basic Jewelry Making: Design and Techniques; Jewelry Casting; Basic Photography; Basic Television Production; Motion Picture Production Techniques; Basic Tennis Techniques (two sessions); Introduction to Wines and Cheeses, Organic

Gardening Seminar; Introduction to Natural Foods; Stock  
Market Strategies; Beginning Hatha Yoga; Intermediate Hatha  
Yoga; and Yoga Philosophy (two sessions).

Detailed information is available from the college at  
Draper Hall, SUNYA, 135 Western Avenue, Albany 12203, or by  
calling 472-8494.

### SEMINAR AT SUNYA TO FOCUS ON CRIMINAL JUSTICE FACILITIES AT LOCAL AND COUNTY LEVELS

At State University of New York at Albany next Wednesday and Thursday, Feb. 20 and 21, 300 criminal justice professionals, lawyers, architects, local government administrators, and concerned citizens will come together at State University of New York at Albany to discuss the role of physical facilities planning in the criminal justice process that begins with arrest of the adult offender at local and county levels in New York State. The campus sponsor is the university's School of Criminal Justice.

The first regional seminar of "Criminal Justice Facilities for Local Governments" is co-sponsored by the New York State Council on Architecture, a state agency, and the New York State Association of Architects, American Institute of Architects, a private organization. It is being funded by the Law Enforcement Assistance Administration through the New York State Crime Control Planning Board and by Educational Facilities Laboratories, Inc.

The seminar will focus on a connection and a separation: the interrelationship between administration, law, and physical facilities; and pretrial detention as a problem distinct from corrections. Developments and alternatives in facilities programming and design will be explored.

Lecture Center 1 will be the scene of the larger sessions of the seminar. Formal keynote speakers will include Archibald

Murray, Commissioner of the Division of Criminal Justice Services;  
Dr. Sal J. Prezioso, Commissioner of the Office for Local Government;  
and State Senator John R. Dunne.

Sheriffs and corrections administrators, educators, trial lawyers, planners, and representatives of government and private organizations involved in the criminal justice process will speak more informally in workshops, the first discussing space needs in terms of problem definition and strategies, the second divided into the three separate disciplines (pretrial, courts, corrections), and the third grouped geographically. The regional workshops are in formation through the seven chapters of NYSAA which will provide a continuing technical resource base for future localized efforts.

### SHAKESPEARE IN AMERICAN WESTERN SETTING AT SUNYA MAR. 13-17

The Theatre Council of State University of New York at Albany will present Shakespeare's "Comedy of Errors" on March 13 through March 17. The director, Edward Golden, has updated the classic comedy by relocating it in the mid-19th Century American West. The sets, designed by Robert J. Donnelly, and the costumes, designed by Jane E. Morgan, have been fashioned accordingly.

Nelson Avidon and Howard Kolins are featured as the identical twins who, separated from birth, are unknowingly brought together in the same city, causing a furor through mistaken identity. Thom Prager and Charles Varadian add to the confusion in their roles as twin servants to their respective masters. Included among the 21 remaining cast members are two department of theatre instructors, Albert Weiner and Joseph Roach.

Dr. Golden is one of the newest members of the department, having joined the faculty last year. Some of his previous professional experience includes his work as founder and producing director of Baltimore's Center Stage theatre, guest director of the Peabody Opera Theatre and Harford Opera Theatre in Maryland, and seven seasons as a professional actor in summer stock. He has held teaching positions at Tufts University, Boston University, and Johns Hopkins University, in addition to being the director of drama at the Jewish Community Center of Baltimore.

-continued-

Tickets for the production are on sale now in the Performing Arts Center box office at SUNYA. Prices are \$3 general admission, \$2 with student identification, and \$1 with student tax card. The box office hours are 11 a.m. to 4 p.m. daily through Friday.

The evening performances are Wednesday through Saturday at 8:30. The Sunday matinee will begin at 2:30.

### SUNYA UNIVERSITY SINGERS CONCERT MARCH 5

The University Singers of State University of New York at Albany will be heard in concert Tuesday, March 5, beginning at 8:30 p.m. in the Recital Hall of the Performing Arts Center.

Ernest Knell will conduct. Also participating in the program will be the University Chamber Orchestra and soloists.

Program highlights include Mozart's "Regina Coeli"; Ravel's "Trois Chansons"; Haydn's "Abendlieb zu Gott"; Monteverdi's "Lasciatemi Murire"; sacred and secular Hebrew songs; and spirituals.

There is no admission charge for the concert which is open to the public and no tickets are required.

BENTLEY GLASS TO BE INSTALLING OFFICER OF SUNYA'S PHI BETA KAPPA

Bentley Glass, distinguished professor of biology and former academic vice president at State University of New York at Stony Brook, will be the installing officer at State University at Albany Thursday, Mar. 7, when a Phi Beta Kappa charter establishing the Alpha Alpha chapter at SUNYA will be granted.

President Louis T. Benezet will extend a welcome to Phi Beta Kappa represented on the campus by 99 faculty and administrators who were elected to Phi Beta Kappa at their respective schools. Acknowledgements will be expressed by DeWitt C. Ellinwood, professor of history at SUNYA and incoming president.

Marjory T. Fuller, lecturer in the university's department of music, will sing three Aaron Copeland selections, "Little Horses", "At the River", and "Zion's Walls".

The dinner meeting will be held in the Patroon Room of the Campus Center beginning at 6:30 p.m.

Other officers of the new chapter are Malcolm F. Smiley, professor of mathematics, vice president; Perry D. Westbrook, professor of English, secretary; Janet Hood, director of Student Health Service, treasurer; and Arthur A. Ekirch, professor of history, historian.

### JEWISH THEATRE SCHOLAR TO LECTURE AT SUNYA

Arieh Sachs, chairman of the department of theatre studies at the Hebrew University in Jerusalem, will lecture on Monday, Mar. 4, at 8 p.m. at State University of New York at Albany. The program will be held in the Studio Theatre of the Performing Arts Center under the sponsorship of the university's department of theatre and its International Programs Office.

Professor Sachs' subject will be "Jew and Christian Against the Comedian". He will outline Jewish and Hebrew theater, including experiences during war time. The lecture is open to the public without charge.

The scholar's visit to the United States is being coordinated by the Office of the Consulate General of Israel in New York. While on the SUNYA campus he will meet informally with groups of students.

STATE UNIVERSITY OF NEW YORK AT ALBANY

### SUNYA AND OGS COOPERATE TO SHARE BUS SERVICES AND SAVE GASOLINE

A unique cooperative agreement between two state agencies, the Office of General Services and the State University of New York at Albany, to effect the merging of bus services is expected to reduce the university's daily gasoline consumption by 100 gallons beginning Monday, Mar. 4, according to officials' estimates.

The unusual venture will provide for joint usage of vehicles during the morning and afternoon rush periods when students are en route to and from classes and state employees are heading for their offices or for their homes. The agreement will provide for the use of the privately contracted buses connecting the Washington Avenue peripheral lot near the State Office Campus and the downtown Albany offices. If the cooperative effort had not materialized, SUNYA would have had to cancel 40 round trips daily to meet reduced fuel allocations. The university is lending OGS several buses for shuttle runs in the Albany area during the day which will reduce usage of state cars in the Capital District.

-continued-

Studies conducted jointly by OGS and SUNYA personnel indicated that the peripheral parking lot buses were full on the morning trip downtown but virtually empty on the return trip. At the same time, the buses connecting the uptown campus with the downtown campus and the dormitory quadrangle, between Ontario and Partridge streets, were filled with students on the way to morning classes on the trips to the main campus near Fuller Road.

Under the arrangement the OGS peripheral parking lot buses in the morning will return from their downtown run to Albany office areas via the downtown SUNYA campus and residence hall area and pick up the university students. Stops will be made at Draper Hall, Alumni Quadrangle, and the Administration Circle at the uptown campus. In the late afternoon the process will be reversed. The buses will continue to pick up the state office employees at the Washington Avenue peripheral lot and at all other designated downtown locations at the same scheduled times.

The OGS-operated peripheral parking lots are used by about 2,000 state employees each day. It is estimated that 1,800 SUNYA students daily will be transported by the peripheral buses.

OGS buses, marked "SUNYA Express", will run every five to ten minutes between 7:15 and 8:55 a.m. They will go west on

-continued-

Western Avenue, stop only at Draper Hall and Partridge Street, and terminate at Administration Circle. The remaining stops will be serviced by SUNYA buses approximately every 10 minutes.

Express buses will depart Administration Circle every five to ten minutes from 3:55- 5:30 p.m., will travel east on Washington Avenue, and will stop only at Partridge and Draper.

In both morning and afternoon, all other stops will be served by SUNYA buses which will not stop at the express stops unless there is ample room for passengers. SUNYA runs during the day will not be affected by the new rush hour schedule.

Both OGS and university representatives have expressed satisfaction with the cooperative program and said they hope it will continue indefinitely, regardless of the fuel situation.

SEALED WITH A HANDSHAKE has been a cooperative agreement between two state agencies, the Office of General Services and State University of New York at Albany, to effect the merging of bus services which is expected to reduce the university's daily gasoline consumption by 100 gallons. The expressions of John Hartley, vice president for management and planning at SUNYA, and Thomas Christensen, director of interagency transportation services, OGS, indicate their satisfaction with the unique arrangement.

A FINAL REVIEW OF MERGED BUS SERVICE DETAILS is made at State University of New York at Albany by principals involved in arrangements made for a unique cooperative agreement between the Office of General Services and the university. The merging of bus services is expected to reduce the university's daily gasoline consumption by 100 gallons beginning March 4. Seated, l. to r., are Ira DeVoe, chief, SUNYA buildings and grounds maintenance branch; Thomas Christensen, director of interagency transportation services, OGS; Paul Lavigne, superintendent of parking services, OGS; Jack Olsen, SUNYA motor pool supervisor; and David Chenk, administrative analyst, OGS. John Hartley, vice president for management and planning, SUNYA, faces the group.
