

Introduced by: University Life Council
Date: May 15, 2006

Resolution to Create a New Position within the Division of Athletics and Recreation to Coordinate the Intramurals Program and Assist in Supervising Recreational Activities

Whereas the program for intramural sports provides students with healthy physical activity, camaraderie, and positive use of leisure time, and

Whereas the intramural program has in recent years grown considerably in the number of participants, and

Whereas the University Life Council recognizes the size and breadth of the current intramural, recreation and fitness programs would significantly benefit from having a full-time experienced administrator, and

Whereas most universities have a full-time director and assistant director to supervise their fitness center, recreation and intramural programs to minimize liability and to provide a degree of administrative oversight,

Be it resolved that the University Senate supports creating a new full-time position within the Division of Athletics and Recreation to coordinate the intramurals program and assist in supervising recreational activities.
