

REPORT FROM MRS & MR JOSEPH G. BOLDUC ABOUT
UNKNOWN OBJECTS. (Report filled february 17, 1977)

On february 4, 1977, I, Joseph G. Bolduc, was driving on the part of Phillips Road situated between Hays Road and Brookview Road. My wife, Yvonne, sat near me in the car. After a working night we were both returning home, our address being : 2421 Phillips Road, Castleton, N.Y 12033.

It was then 4:30 A.M.

The weather was cold. There were no wind. We had a full moon clear sky.

I was left with a 600 yards drive to reach my home when I paid attention to a flotilla of unknown objects, right in front (but above) of me.

The unknown objects - of which the diameter approximatively was 25/30 feets, the length 40 feets, the speed 45/50 miles per hour, and the color just like the one of lighted matches - crossed Phillips Road (and illuminated it) at the level of the electrical threads.

There was no odor. No noise.

There were hundred unknown objects.

After crossing Phillips Road the unknown objects disappeared in the West to East direction. (They seem

to have landed in the field, about 1000 yards away from our car.) The "seing" must have taken place in less than a minute.

I had stopped the car and had not percolated a word.

" Have you seen?" said my wife.

" Yes. I have stopped the car, have I not?"

" But you did not say a word!"

" Until you talked about it, I thought I had dreamed the whole thing!"

We went to bed. The same day, when up, in order not to be laughed at, we only spoke of the unknown objects to a limited number of friends.

Then, on monday february 7,1977, I heard a radio information about a meteorite which had desintagrated in the Louisville (Kentucky) sky.

The radio speaker was requesting people having seen unusual phenomom to get in touch with their near observatory.

At that time I called the Dudley observatory and had a talk with Dr Vonnegut.

Dr. Vonnegut asked me to fill a report of the event... what I have just done.

Yours truly,

Joseph G. Bolduc
