Dwellings Purchase A Step Closer

The Student Dwellings Corporation has come one step closer to becoming a landlord by placing a down payment on a building near the corner of Dove and Hudson

The building at 314-316 Hudson would house between 11 and 12 students in eight separate apartments. The final purchase of the building is contingent upon the success of various funding programs. procedures needed to supplement the \$20,000 appropriated earlier this year by Central Council.

The rehabilitation grant, which is administered by the Urban Renewal Agency, would pay for one third of Hudson Street toward buying them. The building is appraised at \$39 the total Student Dwelling's

funds. Student Dwellings President Michael Grill estimates that the rehabilitation on the building will cost between five and 15 thousand

"Right now we're using a middle man in applying to the Urban Renewal Agency," said Grill. "We are going through the Capitol Hill Improvement Corporation. CHIC is a group created by the city to help neighborhoods with rehabilitation If with CHIC's help, the corpora-

tion succeeds in obtaining the grant, Student Dwellings would then anmortgage and a rehabilitation loan. provides its third of the money after

According to Grill, the corpora tion seeks a \$28,000 mort gage leaving them about \$13,000 left for possible seed money to purchase ad ditional buildings. Rent money is expected to provide the funds needed to meet the mortgage installments.

The bulk of the rehabilitation funds would go to pay for a sprinkler system for the front rooms of the second floor, as well as the addition of windows in several of the bedrooms. In order to receive federal funds, the entire rehabilitation program will have to be completed four months after the corporation obtains

The Hudson Avenue building was selected after the corporation examined a number of apartments for sale in the area.

"We selected 314-316 Hudson not only because it was a good building in itself, but because of what is

Students Seek Permanent Role In Senate

by Matthew Cox

A proposal to give students a per-manent place on the University Senate, where they currently hold 23 of 90 seats, was passed by the Senate April II and is due to be decided upon at a General Faculty Meeting this September. Student Senate members generated the proposal "so that we won't have problems over whether students are on the Senate or off it," said one student Senator.

Under the present Faculty By-Laws, which govern Senate students are a part of the university proceedings, student representation on the Senate must be renewed every two years at general meeting of the university faculty, he said.

Senator Malcolm Sherman of the Mathematics Dept. said he would be no student input at all." opposes the continuous representation proposal.

Senate) should be faculty and Senate Secretary Judy Kane said. It professional staff, who are is "the primary governance body on of the Rhetoric and Comcolleagues and share a concern in the university," he said. "Students in the Senate . . . deny the faculty and effective forum," he said.

Student Dwellings Inc. has placed a down payment on 314-316

Student Association President Steve DiMeo said "Whatever happens on this campus affects students, and students have a right to a voice in the decision making on all university matters," he said. "It should be acknowledged that

DiMeo said he supports the continuous representation proposal because, should students someday The University Senate is

"technically an advisory body to Un-

this campus" she said. Students have been represented on the Senate since 1969, she said. The University Senate was

originally called the Faculty Senate. and prior to 1969 was composed solely of teaching and non-teaching faculty members, Kane said. Membership was broadened "to get student input," she said.

Sherman said he feels the presence of students on the Senate "is one of those things that's an excess of the 1960's . . . and is hard to get rid of."

"I think it would be useful to have students there in an ex-officio

"If there was a rule that students couldn't meet except in the presence of faculty, you'd understand how munications Dent disagreed with Senate "have beloed to keen us from passing stupid legislation by raising helpful objections

As a member of a SUNY-wide Faculty Senate Tompkins said. "I don't see any difference in the quality of debate" between other campus Senates where students don't serve and between the Albany Senate.

"The same mundane issues are dis cussed " he said

DiMeo said other bodies open to students, like Central Council, "don't fit into" the University governance structure. "If the Senate does something, let's face it, it has more ministration" than any other campus

WASHINGTON (AP) President Carter met with Portugese Prime Minister Mario Soares on Thursday to discuss joint strategy for gaining international financial support for Portugal's faltering economy. Carter gave Soares a warm Oval Office welcome, declaring he is "very proud of our friendship and partnership with Portugal" and predicting closer relations. The Carter administration has taken the lead in encouraging large-scale international financial support for Portugal, which has been plagued recently by worker rebellion, a 30-per-cent inflation rate, high employment, lagging production good work for eight hours, and you and political agitation from both extremes.

Carter's Energy Message not so Hopeful

WASHINGTON (AP) President Carter's energy message bristles with facts, figures and requests to sacrifice, but it doesn't specify a price tag for the average American family. Each of the country's 72 million househole about \$1,208 for such energy items as heat, light and gasoline in 1976, according to government figures. But Carter's senior energy advisors either don't know or won't say what each household will spend if Congress passes the President's plan. The government says the average size of an American household is, in round numbers, about three people. It defines a household as r more people living in a single housing unit.

Americans May Establish 'Interest Section' in Cuba

section" in Hayana with American diplomats on the scene. Sources here said today that the next round of talks would be held in Hayana with Terence Todman, the assistant secretary of state for inter-American affairs, heading the U.S. delegation. He would be the highest-ranked American diplomat to go the Cuba since relations were broken off in 1960's. Delegates from the two estranged countries met face-to-face last month in New York on establishing maritime boundaries. U.S. and Cuban law set a 200-mile fishing zone, and Cuba is only 90 miles off the southern tip of Florida.

industry officials told a state Assembly hearing here Monday. Higher prices for the fuel are needed as incentive for increased production but even immediate hikes would not be felt for at least three years, the industrial official testified. But a Michigan State University economist testified that the expectation of higher prices in the future was holding back increased gas production now. "There is no question in my mind that higher prices will bring forth increased production . . . this is a long term problem. It is not a problem you can solve by next winter, but you can do something now to solve the problem three, five, seven years from now."

The open hearing was reserved for anno and the election of board officers for next year, in addition to the short mention of SUNYA.

The SUNYA bus committee is still waiting for Division of Budget clearance of the CDTA proposal before they will consider it further but CDTA board members said that

New Major Clears First Hurdle

A new undergraduate major in pending approval of the University Senate and SUNY Central ad-

According to individuals close to the development of the program, students may find good employmen opportunities after graduating with egree in the new major

Graduate School of Public Affairs Assistant Dean Sandro Barone noted that while a political science degree might not produce any more job offers than a general liberal arts curriculum, a major in public affairs will be "something used to find carreer employment when students graduate.

Barone described the proposed major as getting "a little bit more into the studies of policy and policy analysis." Core courses will predominantly be offered by the science, public affairs, and public ad-

the major will come from English. public affairs will be offered this fall, economics, natural sciences, and social sciences for a total of 56

The impetus for the major came largely from former majors in the nmental Studies program and port was indicated by a letter from President Emmett Fields to SUNY Vice Chancellor for Academic Programs Bruce Dearing. In that letter. Fields observed there was "a growing body of students committed to an interest in the policy field."

The program was accepted unanimously by the GPSA Academic Policy Committee, according to Barone. After being sent on to the University Senate's Undergraduate Academics Council, the proposal was returned because of technical problems last fall.

UAC Chairperson Barbara Rotundo said that once the logistical corrections were made, "there wasn't any opposition." She said the new major will be considered by the full

emphasis on public affairs in GPSA since 1973. Since that emphasis took place largely at the masters' level, it was "logical to extend this thinking to include the undergraduates," h

The proposal reads "since virtual ly all of the courses required . . . are already being offered, no additional faculty resources would be required Initia

The proposal also related the Public Affairs Major to President Fields' Mission statement:

Statement. . . reflect(s) increased emphasis upon the relation o agademic programs to the world of work. . . The undergraduate major in Public Affairs seeks to address these concerns directly through the development of specific skills in writing and oral communication. research methods and tools, concentual breadth and clear application a well as work experience in a program oriented to work in government of

Fire on Woodlawn Avenue Destroys Vacant Building

A vacant two-story building at 96 Woodlawn Avenue near Ontario Street was totally destroyed as a result of a fire last night.

Police said that the fire was of a suspicious nature. The three-alarm fire was called in at 6:58 p.m.

Residents Evacuated Residents of 94, 98, and 100 Woodlawn immediately next to the burning building were evacuated after firefighters arrived. Police said that there might be some students among those evacuated, but because the area was residential, they said that they could not be certain. They

One student at the scene said, "A hell was breaking loose," Woodlawn Avenue and parts of Ontario and Quail Streets and New Scotland Avenue were blocked to traffic a late as midnight last night, according

to police.
Police added that adjacent structures suffered some fire, smoke, and

water damage. The owner of the vacant building was reported to be Dominic Cubello An apartment on Allen Street owned by Cubello suffered a fire in January in which at loust five students were

Students Fast For Hunger Awareness

by Ed Griffin
Over 300 students are going hungry today and most of ton to show their concern for the plight of the one-third of humankind for whom hunger is a daily reality.

The fast, sponsored by the student group, People and Food, has two purposes-raising hunger consciousness on campus, and raising funds to aid those who hunger. Participants are sponsored per hour of abstinence, and the funds are to be distributed through CROP, the community hunger appeal of Church World Service, to hunger fighting agencies in developing countries and here in Albany.

During the last twenty four hours of the fast the group will conduct a hunger awareness marathon in the Colonial Quad. The session, beginning at 6 this evening, will include speakers, films, discussions and wareness games, all aimed at sensitizing students to their role in the hunger problem and what they can

According to Elizabeth Nolan. who is arranging the 24 hour program, the hope of the event is "to share with the fasters an understanding of the complexity of the hunge issue, as we experience the simple side of the problem, the feeling in ou stomach when we don't eat. Our goal is to leave concerned people with concrete ideas as well as difficult questions about the solutions to nunger. We want them to feel for those who starve daily and can not when they will ever eat

People and Food began last month when several students taking the World Food Crisis course decid ed to do something constructive about the problem. After the initial meetings, the fast idea evolved and recruitment and planning began. The recruitment workers, led by Mary Rand and Michael Guiliano. have been encouraged by student chairperson for the group, spoke of several students expressing their gratitude for the chance to help the hungry, and added, "We really touched them."

The hunger awareness marathon is open to the university community. It will be held from 6 p.m. tonight to 6 p.m. tomorrow.

Janis Somerville, GRE program director at ETS, said, "The new measure will test a student's skills in able to show their ability to conclusions from a complex series of or interdependent categories of

Various Questions

She explained that, like the traditional measures of the GRE, the exam can be ordered at one dollar new test will use various kinds of

rime experts fear tha outlets might be ideal for mobsters who are looking for new ways to launder "tainted money," and to expand into other businesses linked to organized crime.

The McDonald's chain already gone to federal court in efforts to regain control of about 30 McDonald's restaurants that are partially controlled by two business operators with reputed Mafia ties. The two investors reportedly have been making millions of dollars off of their "secret" interests in Mc-Donald's eateries, and investing some of their profits in a Las Vegas gambling casino.

The folks at McDonald's are admittedly worried about Ronald Mc-Donald being linked to the mob. Says one golden arches official: "We want to keep McDonald's free of any unsavory elements. We want to be as clean and as all-American as ham-

TOLL-FREE

Vietnam war veterans who receiv-ed less-than-honorable discharges are swamping government telephone calls a day. The calls are pouring into the government's joint liaison office in Overland Missouri, in response to President Carter's proposal to reevaluate and up-grade military discharges. To handle the avalanche of calls, extra personnel to answer 50 telephones for 13 hours each day have been hired, and placed in cubicles in the basement of the two-block-long records building in Overland. However, they report they are still unable to keep up with the thousands of toll-free calls that are

AGE OF BOREDOM

Two Illinois researchers are war-ning that the human race is about to enter what they term a crisis of boredom. Psychologist Salvatore Maddi of the University of Chicago and engineering Professor Andre Vacrous of the Illinois Institute of Technology predict that the result of the computer age will be an upswing in alcoholism, drug a buse and crime. The reason for this, they say, is that machines will take over many of our daily tasks, leaving us with little to do. The two researchers say that today's self-timing micro-wave ovens and other similar labor-savers are only the beginning: They state that within the next 15 years or so, millions of people will feel they are no longer productive because many of their responsibilities will be replaced. The probable result, say Maddi and Vacrous, will be more boredom and more drinking.

FOR YOUR YEARBOOK PORTRAITS

sorry. but . . .

After a series of unhappy surprises in my rsonal life I've withdrawn from the Student Association presidential race.

To all the people who listened to and believed in me, my deepest apologies.

My withdrawal in no way affects my vice presidential running mate, Jim Aron hope those of you who supported both of us do not let my actions interfere with your com-

vote for me as veep

To the Editor: With elections around the corner, I would like to express my qualifications and aspirations as a candidate for Vice President of the Student Association. The SA Vice President has flexibility which allows him or her to communicate with students. Central Council and SA groups. This communication is necessary for an effective Student Association, and is desperately needed now. My experience as an off campus representative, and chairperson of the Administration and Auxiliary Services Committee is important in fulfilling this need. My participation in projects and committees such as UAS, last year's bus rally, SASU's fight against budget cuts, the CDTA bus committee, the NYPIRG-SASU Registration Drive, and the Used Book Exchange, has made me aware of students' needs at this

The Vice President is responsible for providing a student voice in the development of university policies. There are many issues which relate directly to students, yet do not appear on SA's agenda.

The transformation of Mohawk Tower to a dormitory has provided our university with a greater space problem than we once had. It is SA's responsibility to see that we do not get

pushed into a small corner. The Campus Center should be operated by students, converting it into a student union. Downtown and off campus students should be able to utilize the gym facilities and classrooms located in the Draper complex. The Patroon Room should be a student oriented food dining hall designed and utilized by

Academic policy decisions are usually made with little or no student imput. Student representation on the Senate depends on a faculty vote each year. We cannot afford to continue this unstable representation requirements and plus/minus grading. SA large impact on students, before they reach the desks of the administrators.

Most important. SA must reach out to the students they represent. These students are having their money appropriated, and these ents pay the stipends of the SA President and Vice President. Through open forums, the campus media, and personal contact, the political arm of SA will reach out to you.

We need a Student Association Vice President who will do more than sign vouchers, manage the contact office, and give out - solicitation permits. As your Vice President I will do more.

Anne Markowitz

they say they will . . .

They say they'll increase student awareness, student involvement and communication between SA and students. They say they'll organize students and fight administrators. They say they'll initiate new, innovative programs for the benefit of all students. They say they'll be dedicated and responsible student leaders. They say they'll make

Before they tell what they're going to do, ask them what they've done. When they tell you they'll change things, demand specific

I'll stand on my record and my proposals. Candidate for SA President

vote. vote, vote

To the Editor:

During the next week, you will see a lot of posters and hear a lot of speeches on the virtues of each presidential candidate. I can see that there are many candidates, each highly qualified in his own right, and it will be hard to make a choice. However, you should make a choice. SA needs your support. Your vote will count in making SA stronger. I am hoping that you will vote for me. I would like your vote, but SA needs your vote. Regardless of who you choose, please vote.

Mitch Werner

Candidate for SA President

unusual and unconvential

To the Editor:

I am running for SA President, but my name wasn't strewn over the pillars until yesterday. I am running for SA President, but I'm not treating people like babies and begging for votes. My name is Jon Lafayette and I'm not just another asshole running for President.

In October, I resigned from both Central Council and Class of 78 Council. I was sick of what we had to do to get things done. I was sick of seeing SA not accomplish anything, and working hard to do nothing. Great efforts and care were wasted. I promised myself I wouldn't be involved with SA if I had to put up with that kind of shit again.
Under another President, SA will continue

committees and rules. It needs something new. It needs something different. It needs something unconventional. I feel I can deliver changes. No structure is sacred to me, and I won't hesitate to change things so that people can work and things can get done.

I won't be afraid to use all of the resources at our disposal to improve life here. I won't be afraid to come to the students with problems to explain what's happening, or to hear what you have to say. I will be visible partying, podiating, and being friendly. I will use the ASP and WSUA to get to the students. Next year, you will be able to name at least three good things SA has done and you will recognize the SA president if you trip over him at Bogart's or Sutter's.

. I'm not running a normal campaign (please come to my rallies on the quads) but if an unusual campaign works, an unconventional President may be just what we need.

the tacky ticket

As you may or may not know, we the undersigned, are running for various SA offices on the Do-Nothing Ticket.

We would like to take this opportunity to present our platform to you. We are in favor of

1. Building a lean-to outside Bogarts, so people don't have to wait in the cold and rain. 2. Having a keg on tap at all times with free

beer for anyone who wants it. 3. Having warm weather imported from the

Virgin Islands. 4. Naming Rich Lakis "Master of the

Universe". 5. Having a day dedicated to people who are the perfect height.

6. Having a day to commemorate people who wear glasses.

7. Getting drunk often.

8. Having Chuck Barris as the emcee

9. Having the Beatles reunited for the Spring Weekend Concert.

10. Giving everyone as many Sloc Comfortable Screws as they want. 11. Having "Keep on Smiling" as the official

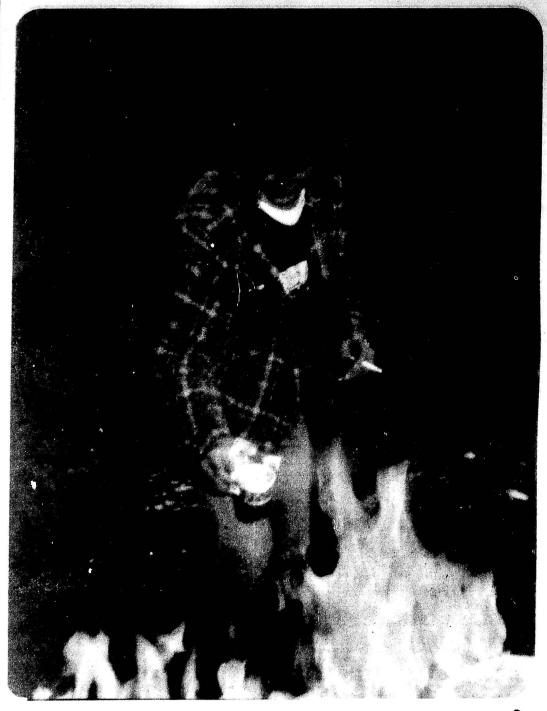

12. Canceling classes for the year

We won't promise that we can deliver on all these plans, but we're working on them. We realize that it would be difficult for voters to remember all our names and offices. Therefore, we have decided that a vote for

We urge you to vote for the traditional offices, but when you get your ballot, write in Marty for Singer. If we get enough votes they will write about us in the ASP (and we want to

FEIFFER BUT WHY CAN'T THEY GO LANGER BELIEVE IN THE COURTS. TO THEIR GRIEVANCES THE COURTS? WELL, IF THEY DOUT BELIEVE IN CONGRESS TELEVISION. A HIGHER RATING.

The Magazine of the Albany Student Press Friday April 22, 1977

and I bring you . . . FIRE!

Film Flashes

Directed by Ralph Bakshi

By ED ROTONDARO

To say that Fantasy is a popular literary genre would be to understate the obvious. Yet for all its popularity, there are few attempts to bring fantasy to the motion niture screen. With the exception of Disney's Fantasia and The Wizard of Oz, one would be hard put to name any really outstanding films with fantasy as the subject.

The reason for this is two-fold: first is the cost of producing a fantasy movie. Ideally animation is the best way to represent monsters, dwarves, and huge pattle scenes. Yet the cost of good animation is far too high for most film-makers to consider running the risk. Secondly, the lack of really viable plots to sell to the limited audience. This point is probably the most crucial one for movie-makers. The movie would have to be able to reach more than just fans of fantasy.

The popularity of Tolkien's works and the explosion of fantasy literature that has occured in recent years makes fantasy movies potential money makers. The first to cash in on them is Ralph Bakshi, whose new animated film Wizards is currently playing at the Cine -6 in the Northway Mall Shopping Center.

Atoms in Albany

By RICK PALLEY

Anyone who drives a car in Albany knows that there s nothing on Central Avenue remarkable enough to catch your attention. It is a never-ending chain of fast ood stores, gas stations and bar-and-grills punctuated by an occasional shopping mall.

But there is one building that people wonder about when they drive past. It sits off the road behind a barbed-wire topped chain-link fence, and looks like just another factory. That is until you see the sign halfway down the grassy front lawn. In understated strictly business lettering, it says: "NL Industries Suclear Division has worked 132 days without a lost one accident."

It takes only a second to comprehend that there is omething important and perhaps dangerous going on inside this drab, two story factory. There it is, nestled cozily between the decaying brick facade and neon sign of Ford's Tavern and the quiet humming framework of ı Niagara Mohawk sub-station.

Who could pick a better, more inconspicuous place to manufacture nuclear warheads? Hell, they could advertise in the back of Detective Story magazine: "Own your own bomb Impress your friends." And while people drive through Town and Country Car-Wash and munch on Double-Beef Whoppers at Burger King, crazed local physicists would be tinkering 100 yards up the road on 500 megaton H-bombs.

Think of the sign, too: "Nuclear Divison has worked 132 days without an accident." What kind of secident? Did someone drop a warhead on his foot? "Oors sorry Here, let me give you a hand with that thing." Or was it some radioactive gases that escaped from a reactor?

The only problem with this whole mad-scientist thing is transportation. How do they bring in the

Bakshi, the man who brought us Fritz the Cat, is a master of innovative animation. Wizards demonstrates this quite graphically. The movie doesn't make any demands on its audience, and it is visually exciting. Bakshi has been criticized for his uneven plot, and rather simple delineations between good and evil. but the overall movie makes up for it. If a film-maker is prepared to spend between 3 and 5 million dollars on a feature length cartoon, which is what Bakshi has spent, he can produce a quality movie.

Wizards takes place in a post-nuclear holocaust Earth. The time is 10 million years in the future, and the world is peopled by fairies, dwarves, mutated humans, and a few scattered wizards.

The Earth is slowly healing itself from the ravages of the atomic devastation, and in the areas untouched by the radiation life has begun anew. Into this setting, twin brothers are born to the queen of the fairies. One of the twins. Avatar, is the embodiment of kindness and virtue. His brother, Blackwolf who is partially mutated, is the very soul of evil.

Blackwolf is expelled from the fairy lands and goes to the nuclear wastes where he becomes the leader of the evil mutants. For thousands of years he studies the black arts of technology and raises huge armies to conquer his brother's lands. After several failures due to the lack of motivation on the part of his followers, he discovers a dream machine that is in reality a movie camera with a supply of Nazi war films. His armies are inspired by the Nazi bloodlust and go forth again to conquer. The dream machine also has the capability of

demoralizing its opponents and the forces of goo suffer defeat after defeat as a result.

Avatar aided by the new Queen of the Fairies and dwarf prince, goes forth to destroy the dream machine and defeat his brother. The plot is simple, but the animation more than makes up for it. The scene switches from the idvllic forests to the horrors of the devastated cities that are home to the mutants. The scenes of Blackwolf's castle evoke the stronghold of Sauron in the Lord of the Rings. Bakshi's use of the Nazi motif as the epitome of all evil succeeds quite well.

The use of an old Russian film Alexander Nevsk allows Bakshi to create scenes of thousands of knight with red eyes and demon's wings charging down on the dwarves. The color is reminiscent of Disney at its best and the battle scenes are believably bloody. The huge mechanized demon army of Blackwolf contras strikingly with the Hobbit-like army of Avatar.

The real importance of this film lies in its preparing the public for Bakshi's next animated work, none other than The Lord of the Rings. Bakshi warns the public from comparing Wizards, which he conceded was a test run for other works, with Lord of the Rings, which he says will be much more serious and more elaborate

Wirards is a must for all fantasy lovers, and for anyone seeking a film that is entertaining and visually exciting without being too involved. If Wizards and Bakshi's version of the Lord of the Rings are successful, we may be entering a new era of animation and fantastic films. Conan and Fritz Leiber here we

Signs, signs, everywhere a sign. . . . but what makes this sign special is that passersby cannot help but ponder its claim. Is NL Industries just another factory on Central Avenue?

the loading dock there for years and not see one container of highly radioactive material enter

All they really ever deliver there is depleted Uranium salts and that stuff is hardly radioactive at all. In the list of materials you can use for warheads, depleted uranium would be about ... well it wouldn't make the list at all. It's pretty faccid stuff when it comes to armament material. All it's good for is reactor shielding and airplane counter-weights; docile things

And those accidents, well, they could happen at any factory or even at a Pricechopper. People drop things and make mistakes, but that happens in any industry.

Even more harmless than the uranium salts they forge there is the financial base of the company. It is not run by deranged, wide eyed scientists and maverick tycoon bent on world destruction. It is a subsidiary of NL Industries, which is part of the Sherwin-Williams Corporation, Just big business doing business in a very business-like way. On the wall behind the receptionist's desk in the office is the key the Sherwin Williams Dutchboy, life size, surrounded by six electrons careening wildly around the center of an imaginary atom. The atom tamed by the smiling

It makes more sense this way than the way a lot of people see it. They might think it's a mysterious building filled with radioactive isotopes and H-bombs but we know better. It is just another factory on Central Avenue in Albany.

Defense Sec. Predicts Draft

ROCHESTER, N.Y. (AP) Defense Secretary Harold Brown told a student audience Wednesday that he does not anticipate reinstatement of a military draft until the 1980's at the earliest.

Speaking to about 500 students at the University of Rochester, Brown said the all-volunteer army "has worked quite well," but two factors in the next decade may change that.

He anticipated the economy would get better. And the number of 18-to-20 year olds will decline because of the lower birth rates of the 1960's.

"The military is going to have to compete with private employers under more difficult circumstances," he said. Brown, 49, said the allvolunteer army, contrary to popular opinion did not cause the large increase in military manpower costs that has occurred since 1967

"There was a substantial increase in military pay in 1967 and 1968, while the draft was still on," he said.

and another small increase was made. "I don't think military people are overpaid. I don't think the cost per person can be brought down," Brown said. He said personel costs have increased in

the last decade from about 40 percent of the military

"Subsequently in the early '70's, the draft was ended

"The comprehensive approach" is the phrase the administration uses to describe one of two disarmament proposals the Soviets rejected. It called for a reduction of nuclear delivery systems by about 15

be reduced and the military could learn to get by with fewer people, he said. The stalled nuclear disarmament negotiations with the Soviet Union was another topic a panel of seven students and professors questioned the secretary

Brown suggested that "much more careful personnel

management" could cut costs. Soldiers could be moved

from post to post less often, duplicate education could

Brown expressed the Carter Administration's views that "in the long run, they (the Soviets) will come to realize that a comprehensive approach will have to be adopted.'

People's Aid

By ANNE RABE

"Each building ve've moved into has been nicer than the one before. I suspect we'll be here for a while " commented a community worker at Refer, Jeff Katz. switchboard organization, Refer offers information, crisis intervention and referral services to the Albany community. Having moved a couple of blocks down from Hamilton Street, their former location, they are low at 214 Lark Street, near the corner of State Street.

Refer, along with the Community Counseling Center, Youth Service Program and Community Arts. all part of the Project Equinox organization, has received noticeable attention. Already the number of people using the walk-in counseling has doubled; and a local doctor has already walked in to offer his services.

"If you don't know where to call, call Refer". This is one of their slogans, because "if we don't know the answer, we'll know someone who does," says Katz. "In a sense, we act as a coordinator between different agencies," he continued. "We're in the process of visiting all the agencies we refer to and keeping the files undated.

Helping people with their problems, the other aspect of Refer, is done in a "humanistic, non-judgemental and sensitive way," according to one seasoned volunteer, "It's hard to teach that though," he added.

Attending training sessions and being guided by "a resource person," is how Refer prepares people to answer the phones. The ten training sessions teach role playing in values-clarification, sensitivity, drugs, suicide and sexuality, to name a few.

"Are you more like a roller skate or a pogo stick?" asked the teacher, Betsy Kaplenk, in a forced-choice exercise of the values-clarification session. "It's to help people know what their own values are in case they get in the way when counseling," she explained.

"There's a certain criteria for people to work at Refer they have to care about people, have a certain amount of sensitivity and be able to be open-minded about things," claborated Katz. People have been rejected by Refer because, for example, they were "too judgemental" or "unstable".

"Refer", a volunteer-based crisis intervention organization, awarded in 1975 for outstanding community service, differs from Middle Earth in that the majority of its clientele are of a low socio-eco nomic status.

Once a person is approved to work on the phones, he gathers enough confidence and experience to "do the building alone," although they try to have "double coverage" or two people working most of the time.

Part of the training at Refer involves knowing when a caller can better be helped by someone else. "Hopefully one of the things we're good at is realizing our limitations," explained Katz, "We're really sort of para-professionals," "If we don't feel qualified or if something is too big for us . . . we refer," cited one

Walking by the two large storefront windows, the entrance leads into an arched brick corridor and straight towards Refer's three-phone switchboard. The interior design was done by Director of Community Arts Workshop Newell Eaton, keeping in mind a practical use of space, such as built-in desks and shelves. Newly painted, the two story building has offices, counseling rooms, a staff meeting room and storage space for their "mini-library of resources."

"Everybody coming into work has been really pleased. They've been feeling it out and it feels comfortable," said a girl working on the phones.

A volunteer-based organization, Refer started in

1970, "in response to a lot of social things happening like runaways and bad trips with drugs," according to Katz. Around four years later Project Equinox, nov the head organization, started with an ongoing counseling center. The Community Arts Workshop set up to provide arts and crafts classes at little or n cost, and the Youth Service Program that maintain shelters for runaways and teenagers in trouble are als part of Equipox.

Awarded for being an outstanding volunteer agenc in 1975 by the Albany-based Voluntary Action Center Refer now has about 60 volunteers and four paid employees.

Different from the SUNYA oriented Middle Earth switchboard. Refer is community oriented and deals with a lot of "street people, often poor or on welfare. Funds come from federal and state programs, private organizations, such as churches, and donations. Their publicized annual Thanksgiving dinner, which fee approximately 1,400 people last year, was funded by community donations, "People were really beautiful about contributing." Katz reflected. They also sponsor summer concerts in Washington Park that are also

Reverting to Primal Forms

By STEPHEN DZINANKA

In the night shone the brillinance of burning birch bark. Like raving madmen they trudged through the soft snow clenching fiery balls of the white tree skin in their hands held high above their heads.

Before them a face-high bonfire roared against the milky black of the moonlit forest. Prodded by a sense of anonymity granted in isolation, and a touch of acute pyromania, their trudging slowly progressed into frantic, barbarous dancing. Their outstretched arms whirred like windmills, coaxing the bark to burn more furiously. Bits of the flaming bark broke off in the onrush of air and settled to the snow in a scattering of

Incessant shouting went unanswered in the shattered tranquility of the Adirondacks. Not human nor bear dared near the site of these bizarre tribal-like rites.

Now they placed pieces of burning bark atop the walls of the fire temple they had earlier constructed of

The fire temple. It began as a snowman. Also considered was a snow-woman, adorned with frosty bosoms and a crabgrass crotch. But its creators had deemed such projects far too conventional, thus they had molded the snow into a three feet tall semicircular fortress symbolizing their reverence to rapid oxidation.

On the front wall of the temple a hot garbage can lid had been pressed against the cool snow leaving a rounded, ridged swell. This they proclaimed the "Grand Seal" of their peculiar little society. The garbage can lid had been heated, of course, over the

They had traveled north from Albany that day to the solace of Dippikill Mountain. Four students, three males and one female, had disembarked together for a weekend to quietude.

The woods had crazed only two. Spencer and Steve And their dementia grew as Betty and Eric lay huddled nearby in a cabin doing their best to ignore the goings on outside. But this was to be no simple task

The two crazies were determined to command attention, and it was this yearning that led to their desire to burn down the cabin, a sure means of arousing the occupants' interest.

They rushed toward the cabin with fistfulls of the burning birch. Tromping on to the porch they raised the crackling bark threateningly up to the cabin

Their evil cackling would have unnerved even the lowliest coyote; compelled the devil himself to lose control of his Satanic sphincter. But Eric, considered by his peers far more evil than any of these, did not soil his underwear. Rather, he lay peacefully in the cabin undaunted in the face of impending cremation. Betty too seemed quite at ease.

Soon the bark fizzled out, forcing the two crazies to retreat from their flame-waving attack. Quickly they replenished their fuel supply and launched yet another fiery assault on the cabin.

But the cabin did not burn. The bark torches could no more kindle the wet wood of the cabin than wet matches could a cottonball. They knew this, and it did not bother them, for they were happy in their mischief

The scorched but solid cabin was constructed largely of logs, stacked one upon another. It stood eight, maybe nine, feet high. The gaps where the uneven surfaces of the logs met were plugged with rope.

Spence and Steve, having discarded their primitive instruments of arson, entered the cabin pushing open a flimsy wooden door. Inside, a smooth plank floor, and old white wood-burning stove and custom cabinets detracted from the otherwise natural look of the place. There were bunk beds in the two corners of the room

furthest from the door. Betty and Eric lay together on the lower tier of one of these. "What the fuck are you doing out there?" Eric asked calmly "Burning bark," said Steve, "and keepin' the fire

'Yeah," added Spence. "That stuff burns nice." "You boys are completely crazy."

Knowing which way to go is always critical.

"We know that," said Steve. "We need the lantern to get more wood."

Eric started to protest but Steve grabbed th Coleman lantern and headed out the door for the woodshed with Spence. Their boots were soaked through now, and it was cold enough to make the short trek to the woodshed an uncomfortable one. But they showed little concern for comfort. They liked to think of themselves as woodsmen.

Holding the lantern up over his head, Steve examined the stacks of logs which had been sectioned cleanly with a chain saw into chunks about two feet in length. The logs varied in width from about one to two

Spence climbed up on the pile to inspect the pieces more closely. They carefully chose only birch, and only pieces of moderate size to make transporting them

Like surgeons peeling back a patient's skin, they stripped the precious white bark off of the larger logs that would have to be left behind. Then, embracing the logs that had been selected for burning, they plodded through the thigh-deep snow towards the bonfire.

About half-way up the trail leading back to camp the lantern failed. This created no great immediate problems, since the trail between the woodshed and the campsite was short and afforded constant visual contact with the bonfire. But the lantern would be needed later inside the cabin.

Central Council niversity of New York at Albany Constitutional Reforms March 9, 1977 Introduced by : Internal Affairs Committee

It is hereby proposed that the following be enacted:

1. That article VII of the Constitution of the State University of New York at Albany Student Association be amended to read:

Section 11 Impeachment proceedings may be instituted by written petition of at least one sixth of the constituent members of the on-campus group represented and one tracking of the one-campus group represented. In the case of the President of Vice-President of Student Association, impeachment may also be instituted by a first and account of the other proceedings of the majority alternative vote of the total membership of Central Council A majority alternative vote of the entire Central Council A mappeachment of central Council and the entire Central Council and the needed for a verified to guilty. These proceedings shall be needed for a verified to guilty. These proceedings shall be apply in all class.

Section 3: Recall proceedings may be instituted by written petition of at least one sixth of the constituents of the on-campus group represented and one-twelfith of the instituents of the off-campus groups represented. Recall proceedings for the President or Nice-President may be instituted, one sixth of their respective constituencies. At least a majority one of the constituent members overing of the group represented shall be necessary to carry out the mandate of recall.

Approved: Steven Di Meo, President

Primal Form

continued from page 3a

Spence and Steve unloaded their cargo at the fireplace and set out for the cabin to attempt repairs on the lantern. It was the only one they had.

Seated at a small wooden table near the stove, they took turns fiddling with the valves and the air pump on the lantern. The flow of Coleman fluid, the camper's version of napalm, from the reservoir was blocked off. After a few minutes, they managed to unclog the fuel line. But in the process they also managed to crumble the ashen mantle around which the flame burned. So there would be no light from the lantern that night. The light from the fire outside and from the meager remains of a discarded candle would have to suffice.

News of the defunct Coleman lantern was not wellreceived by Eric. "Bright boys," he muttered sleepily.

Luckily, they had finished dinner earlier. The four of them devoured a large pot of chili prepared by Betty and Fric. Cooking in the dark would have been difficult.

Spence and Steve went back outside leaving Betty and Eric in the cabin with the slowly disappearing candle. And they fed the fire. It ate all they could give it, and still it was not quenched. And so they burned more bark and by its light, split the logs into halves, then quarters, with the iron wedge and sledge hammer. The quarters were sliced down to burning size with single swings of the ax.

They served the fire well, and it served them. Every time another piece of bark flared up they laughed wildly. As the flames of the bonfire danced around the top of the stone and concrete chimney their eyes bulged with excitement.

Their facial expressions would have more readily befit two child molesters set free to roam about a Brownie camp. And like those who lust for innocent young girls, they served the fire not because their brains were particularly small, nor because an unstable environment had transformed their cortical cells into yogurt. They did it because they enjoyed it.

Spencer and Steve eventually tired and left the blast lugiace they had created. Though they knew their departure meant certain death for the bonfire, their chilled bodies longed for the warmth of the cabin and a

The four of them sat around the dark room sipping the cocoa and telling tales of psychopaths who escaped from institutions and made their homes in the woods. The stories always ended with innocent campers falling prey to the random violence of these "crazy" individuals. Often the victims were hacked to death with their own ax which had been carelessly leaned against a tree.

The only decent light in the room came from the wood stove, and only from there when one of the iron plates was removed from the top allowing flames to jut out. Unfortunately, with the flames came smoke, so they stayed in the dark as much as possible.

They were thinking about going to bed when Eric announced the arrival of a visitor. "I don't know if I should say this, but a rat just came in through the

Eric yanked a cover off of the stove while Spence and Steve grabbed the ax and the sledge hammer. They searched for the intruding rat, but the lack of good, clean light foiled their efforts. Smoke from the open stove probably would have choked them to death before the rat was found.

Finally, they all settled down for some sleep. Betty and Eric took the lower bunk near the stove. Spence and Steve were left with the beds on the opposite wall.

Before climbing up to and nearly falling down through the upper bunk. Steve slid the ax and the sledge hammer underneath the bed out of sight. Light from the greatly subdued bonfire outside still flickered on the cabin walls. Silence fell upon the room quickly and they slept, or at least tried to. Somewhere, the rat was still wandering around. The two woodsmen zipped their sleeping bags up tight.

It was cold in the morning.

Outside the snow adjacent to the cabin and surrounding the fireplace was stained with black ash. The fluffy powder had been beaten down by footsteps. An icy finish glazed the surface. Woodchips and sawdust were sprinkled about. The place was a mess.

"You guys, I don't know," said Betty, shaking her head from side to side.

The four of them packed up the leftover food and gathered the gear together. It was time to leave.

They marched down the trail away from the cabin and past the woodshed. Spence and Steve chattered about plans for the next trip. Fired, cold and sore, they were glad to leave now. But they knew well they would

And once again white hot coals would spit and flames would rise high tearing into the black still of an Adirondack night.

Coexisting with Cold Weather, Stars, Rocks and Police.

By RICHARD MERMELSTEIN

"I just felt like taking a walk."

Jesus, I thought to myself, you couldn't have been more trite if you tried, Rich. But I did just feel like taking a walk. Really. I had just spent two and a half hours talking and laughing with one of my favorite people. And after walking back to her suite I walked out of the tower and into a cold, windy night. I wasn't wearing a coat. Or any socks. I was very cold, but I just didn't feel like going back to my room yet, even though it was past two in the morning, and I had a class in on a few hours. Wouldn't it be great. I thought, if I could learn to walk in the cold and not let it bother me? I hate cold weather and vice-versa. But what if I went for a walk, a long walk, without going anywhere, a long walk, not by myself but with myself? And with everything around me. Wouldn't it be great to stand in the cold and stare at the sky? To find my favorite onstellation, the cute little one which is shaped like the Big Dipper, but is about one-thousandth as big. All the stars in this one are real close together and you can only see it if you stare real hard. I was thinking all this.

I walked very slowly. I danced and skipped. Up and down the stairs toward the Biology building, crossing from a Gene Kelly step to a Red Skelton flop. And I looked up and found my favorite constellation. I found it easily, without even using the trick. The trick is to find these three big stars in a row, and just follow them half-way across the sky, until you come to my constellation. You can't miss the three big stars, because they're all by themselves and they really stand out. Maybe they're part of Orion's belt or something, and I think mine is called the Seven Sisters, but it really doesn't matter.

I had heard of the blind eye of the law but not the deaf ear of it

Anyway, tonight I found my constellation without even using the trick. And I wasn't noticing the coldness, even without a coat or socks. I was wearing moccasins—the real type. The kind the Indians wear. They have a comfortable furry lining, and they keep you very warm. I thought of how coldness should remind me that the Indians, hundreds of years ago, who couldn't even afford socks, lived in harmony with the cold. And I thought of how my feet were so comfortable with this blanket wrapped around them. And I thought of how I dread writing these things down for someone to read and evaluate and

Then I saw this cop. He glared at me. There was no one else around. He slowed up his stride while I continued my aimless strolling. With my hands in my pockets, and the foot which wasn't on the ground always swaying back and forth before it landed. He's watching me, I thought. This beautiful quiet stillness is being ruined because he's watching me. I stopped, and stared up with my back to him. And just like Arthur mysteriously found Merlin whenever he needed to, I found my constellation. Sometimes, I would stare at my constellation for five uninterrupted minutes, look away, and not be able to find it when I looked back up. But this time I found it with no trouble at all. I turned toward the cop. He had walked on.

I too walked on. I had only planned on walking the twenty steps toward Eastman tower, and the mere joy at still being outside probably added to the contented feeling I had. The wind made my nose suddenly feel burning cold. I hate that feeling. Maybe if I associate that feeling with looking up at the stars and wearing my warm moceasins that are so comfortable, it won't be so bad. It wasn't so bad.

Retracing my steps, balancing on a line, hopping and then skipping backwards, with my head looking way up. My neck hurt. It always hurts.

I saw a police car with its lights on zoom by. But it stopped right after it passed me, only about wenty feet to the side. I knew they were watching me. The car's lights turned off. What are they, stupid—thinking that if they turn their lights off I'll forget that I had heard them screech by me with their light shining in my face? I walked slower, and dug my hands deep into my pockets. Just because you're paranoid doesn't mean someone isn't watching you. (I gave that poster to my father to put up on his office wall. I had heard the

saying months before I found the poster, and I was sort of upset that it had gained popularity. Now if I ever say it, someone says. "Yeah, I saw that poster." They forget that it was a saying before it was a poster.) I kept walking, thinking that if I don't get to a certain spot in a certain amount of time, nothing would happen. Even if I did get to a certain spot in a certain time, nothing will happen. Nothing depends on what I'm doing.

If I can learn to associate this peaceful feeling with the cold, I'll learn to accept one of the few things I hate. I hate the cold.

Another cop car sped to the first car, and swerved so that the driver of the second car was right next to the cop in the passenger's seat of the first car. They were talking about me.

I walked slower. I even stopped to notice how bright the North Star was. I found my constellation. A cop was coming towards me.

He started and then stopped. I stopped and then started. He seemed indecisive as to whether kicking pebbles was a punishable offense. He went back to his car to get his cap. And then he walked right up to me.

"Hello."

"Hello."
"Anything?" I asked, meaning does he want

anything.

"Hello."

"Hi."

I had heard of the blind eye of the law but not the deaf ear of it. I envisioned the other three cops charging me, throwing me against the car, and forcing me to confess to three slayings.

"Are you a student here?" he asked me.

"Yup." Maybe he just wanted someone to talk to. It was very late, and he could have just been bored.

"Do you have any ID?"

I had just expected to go to Gail's and I almost did not even bother to lock my door, but I decided just before I left that I'd better. All I had with me were my keys.

"No. I have my keys though."

"It's a little cold to be walking around with no coat on, isn't it?"

It was. But the cold didn't bother me. I was going to explain to him that I had wanted to get used to walking in the cold, and that if you look at the stars and wear really comfortable moceasins, you can forget about the cold. He wouldn't have understood. So I just shrugged, and answered, "Yeah,"

"You don't have any ID with you?" He seemed sympathetic, a sort of sarcastic sympathy though. The kind the bank robber gives to the teller as he says that he's sorry he has to do this, and then shoots the teller!

"I'll take you back to the room if you like, it's right-"!

"That won't be necessary," he interrupted as he reached toward his waist. Christ, he's gonna shoot first, ask questions later! But the weapon he extracted was one you speak into. "I'd like a check on an on-campus listing." Then to me, "What's your name?"

"Mermelstein." To anybody else I would have given the human response of, "Richard Mermelstein."

"How do you spell it?"

I told him, and he repeated it to the guy on the other end of his weapon.

"They'll check it," he said.

Christ, what if someone made a mistake and my name wasn't on the list . . .

"We see a lot of people walking around at night and more often than not, they're not supposed to be here and they end up starting trouble."

I hadn't even asked. He was waiting for the check on my name. He put the walkie talkie back in his belt. "Sure is cold out." he said.

I don't believe it. He's trying to make small talk!! was going to look for my constellation.

"Why are-" he continued. I knew what was coming.
"I just felt like taking a walk." Jesus, Rich, you couldn't have been more trite. Yon see, I'm going to spend a lot of time here and I want to get used to the cold, and I figure if I learn to associate cold with the nice things, like the stars, and comfortable moccasins, maybe I can learn to accept it." He nodded and he smiled. He was a young guy, and I felt bad that he didn't seem to be enjoying what he was doing.

"Well, you've got every right in the world to take a walk if that's what you want to do, and I've got every right in the world to stop and ask you what you've doing." I didn't tell him that I could make a stronger argument for my right. "I'm just doing my job." he continued.

Again, I hadn't even asked. I went on about how wanted to learn to love the one thing that really bother me most. Again, he nodded and smiled. Probably thought I was stoned.

"And I'm not even stoned."

"Really?" He seemed surprised.

His weapon rung with static. "What residence hall?" the voice asked.

"What do you live?" he asked me, as if I needed the question to be phrased in simpler words.

"105-2 Fulton Hall, State Quad."

He relayed the information, and put the weapon back in his holster. Why did he have to repeat everything? Couldn't he have let my words suffice? Probably part of his job.

We waited.

"Jesus Christ," he said. I guess he felt it was about time he said that.

"O.K.," he said for my ears and for the other gave and started to walk away. Without a good-byc of anything, My turn.

"Can you find out for me on that thing what I got on my Political Science test today?"

"Sorry, can't help ya."

Finally, I had asked him something, and he was useless. It wasn't a snotty question. It was funny. He laughed. As I walked back, I laughed. It was funny.

"Take care," I shouted. The car sped away.
I re-found my constellation easily. In two minutes I
was in front of my dorm. I started to go in. My nose
was cold. I hate that feeling.

WAIT A MINUTE! I slapped my hand against my thigh. What am I doing? I'm not done enjoying the sky and my moccasins and walking like I want to walk sky and my moccasins and walking like I want to walk I wasn't done learning how to co-exist with the cold But it seemed like the thing to do was to go back. After a cop stops you suspiciously, you're supposed to go back to your room. (I had admitted to the cop that I realized I was conspisious; I meant suspicious or conspicuous but my tongue tripped and he must have thought I was stoned.)

I started to walk again. I looked for my constellation, buy I couldn't find it. It was no good. It was cold out. Very cold.

I Ran for SA President
... and Lived!

or, Winning isn't Everything, It's the Only Thing

By MATT KAUFMAN

Just over a month ago, it would all have seemed absurd, why would anybody want to run for Student Association President?

"Do you think you can handle it? That's why I'm running for Vice-President. I don't think I could handle it," Bryant Monroe, a politically oriented friend

The SA President is the person of the entire Student Association. That person is required to enforce SA's policies, prepare the budget, plus engaging in numerous other roles specified in the SA Constitution.

At the start, it really didn't seem plausible that a person from a non-political bacground could win. A simple idea that originated in a not-too-serious conversation ultimately mushroomed into a legimate and serious campaign involving a staff of over twenty supporters and two campaign managers.

"Well, you could do what Pat Curran [a former SA President, 74-75] did," Ira Birnbaum, his Vice-President noted. "Pat knew I knew more about certain legislative aspects than he did. We sort of shared the job, as co-presidents instead of President and Vice-President."

The nomination forms had already been handed in and the candidates committed to run. There appeared to be no easy way to back down. Sure you can decide to have your name taken off the actual ballot, but why? Eventually, though, two candidates did withdraw from the race due to personal reasons. One was running for president, the other Vice-President.

To get a name on the ballot for SA President, or for SA Vice-President, involves the time consuming process of acquiring 100 student signatures (minimum) on a self-nomination form.

To effectively get the petitions filled out by the deadline date generally involves the use of more than one copy of the form by the candidates. These forms are then carried by fellow supporters for acquiring signatures and are latter attached to hand in.

Though the signing of the petitions appears to be a waste of time, it serves as a tool for both the candidates and SA.

"For SA, by having each potential candidate get 100 signatures discourages those persons who would just run for fun," one candidate noted.

"You don't want to be SA President, do you?" an SA office worker and close friend told one candidate while signing his petition. "You're too nice a person to be SA President."

Congruently, the process of getting the petitions filled out gives the candidate a little more time to decide if he really wants to run. At the same time, while the forms are being signed by the students, the candidate is advertising his name to the voters.

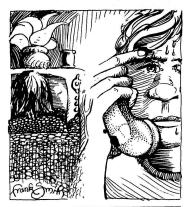

"The only way you could win," said Bob O'Brian, supporter of an opposition candidate "is if half the school doesn't vote, and the other half is stoned." Obviously, I was the definite underdog in the race.

Between the handing in of the petitions and the actual elections exists an interim of two plus weeks, one of which is a vacation. After school resumes, there will be only one week to campaign before the three day elections start. During the vacation period, the candidates have generally agreed that it will be used to plan strategies.

"You're really serious about this aren't you?" quipped former Editor-in-Chief of the school's newspaper, Stephen Dzinanka, after a lengthy discussion with this acknowledged underdog.

Stephen Shadegg's title for his book on the 1968 US Presidential race puts everything quite well into perspective—Winning's a Lot More Fun.

Editors Note: Matt Kaufman was a presidential candidate in the SA elections of '75-'76.

The only way you could win is if half the school doesn't vote and the other half is stoned.

When election time rolls around, a new market awakens, filled with candidates trying to sell their views.

Each candidate during election time has a product to sell on this newly awakened market; that is, himself.

The sell-nomination forms have served the candidates as a preliminary basis for the candidates to identify themselves to the media and voting public.

Any student stopping into the Albany State Campus Center after returning from the one week vacation would have seen various posters and banners proclaiming that they should vote for this candidate for that reason.

"The only way to win is to get your name known," Andy Dolan, a veteran politician on campus explained, "and that is done by plastering this whole school with it."

A lot of advertising will be provided to the candidates free of charge through coverage by the campus news media. At Albany State, the ASP and WSUA are the prime sources of news media coverage on campus.

Activity of any kind that a candidate performs during the election will invariably be picked-up by the media and dealt with.

An innovative candidate will also utilize the media to his advantage. This could be done by writing letters to the ASP by placing ads in the ASP and on WSUA, and even possibly by writing a front page story or two for the ASP.

To better inform the students on this campus of the candidates various stands on issues facing the students last year, WSUA and the ASP, working in tandem, presented a live forum over the radio. Excerpts were later used by the ASP for their pre-election issue.

"The thing is," Stephen Dzinanka, former Editor-in-Chief of the ASP pointed out, "is that you have to be able to make snap decisions. You are being scrutinized while we merely scrutinize."

After the ASP-WSUA forum, the candidates for both President and Vice-President met extensively

with a seven member endorsement panel from the ASP. Afterwards, in the ensuing endorsement editorial, the panel presented its opinion in an editoria comprising nearly two thirds of a page and over 15 hours of work.

"In addition to stating preferences," that editorial commented, "it is necessary to explain how they were arrived at."

One candidate the acknowledged underdog, who characterized his campaign by being as brief as possible, was dealt with very briefly (35 words to be exact). Another candidate who was noted for setting agendas afire was analogized as being able to start a fire ". . . that nobody could put out."
"The only way to win," SA President Andy Bauman

"The only way to win," SA President Andy Bauman snapped, "is not to get the ASP's endorsement the year he ran.

Since the joint forum by the ASP and WSUA, there have been several other forums sponsored by groups and the residential Quad boards. A few of the forums were scheduled at the same time, and nearly all of them were poorly advertised. Many observers at the meetings noted that no candidate made a good showing at the forums.

The final forum, on Indian Quad proved to be quite different from all the previous ones. Fro the first time, the candidates and their campaign workers held a distinct minority out of the total mass of students present at the meeting. Instead of associates to the candidates asking the other candidates questions; interested-non-aligned students were asking the questions.

One candidate, advocating an end to boring government, rambled on, talking for over half an hour (10-15 minutes was the suggested length for each candidate).

A second candidate, whi didn't ramble, was pounced upon for his voting record on CENTRAL Council, which was deemed not beneficial to that quad.

The other two candidates were generally passed over due to their non-antagonastic stance in relation to Indian Quad. These two candidates were generally in the sams situation priviously, one of which was the present underdog of the election,

"After listening to the candidates, I think I'm seriously going to consider voting for you for President." the President of Indian Quad Board told the underdog candidate. "You know, before I became Quad Board President, I really had no experience with the quad board. It was a little difficult for the first few months, but it all evens out in the end."

A Poetic Garden

Aesop's Garden

A book of poems by Don Byrd North Atlantic Press; 126 pages; \$4.00

By STEPHEN ALMASI

"Earth has always been without there revolves a mesh of mysteries, each of tension examining the author's relationship to his

of interest to his work by the use of local The Classical Forum imagery, contrasting the hilly Mohawk-Hudson river valleys to the "High Plains" of his native Midwest. His attitude owards local geography grows crystal-vanted to kick in/the face of the

This sense of entrapment comes up whether physical or linguistic, is spawned by a faith in false knowledge. Escape is accomplished through the rediscovery of nnocence, the struggle to maintain clear thinking in a confused, self-absorbed age.

The six sections of Aesop's Garden form a single narrative, combining a hierarchy of metaphors in a variety of dream-like encounters. The search for hose prelinguistic symbols which lie at he roots of language reveals itself in the imple acts of counting, of measuring one's own steps as music, of seeing oneself reflected in, and even replaced by, one's ecking after knowledge, bypass sometimes considered male, sometimes

so delicious just by itself

SOUTHERN T-SHIRT

A real 100-proof bargain ... only \$2.50 each.

SIZE Quantity \$ Total
Medium

A musical quality plays through his patterns of thought. The separate pieces which make up this expansive self-poem might be seen as symphonic movements, with themes and counter-themes meaning and always will be," states Don combining in a sometimes abstract Byrd in his book of poems, titled Aesop's fashion. His concluding phrases act as Garden. "That is not a mystery, it is a codas in a classical sonata format, fact." Around this forthright statement bringing the issues of the poem to a peak

Since each main section runs for many language and to the world he inhabits. pages and involves much interweaving of An associate English professor at metaphors, it is impractical to excerpt

St. Louis Cardinals' drive for a pennant. Atlantic Books, is available at the SUNYA, Mr. Byrd adds a special touch snatches of the work for quotation here.

Order reigns peacefully throughout the SUNYA Bookstore.

am a hive/of myself/moving as bees". Though his extended metaphors can be formidably involved at first reading, the language retains a coherency which is rare in much of modern poetry The final section of the work, titled

The Last Days", comes near to despair: "we are damned/to talk non-sense/for the most part/faced with the brute silence." His infant daughter, however, leads him to a renewed innocence: "Anne There are kernels of humor side by side contailly purrs/in her sleep". Though with tragedy. In his account of the fall of silence, Byrd exhorts us in the meantime Vietnam, Byrd compares the tension in to find "new stories/to tell the children."

The Birthday of Rome

I just baked a cake, a huge birthday Helderbergs/for no more reason/than to cake, covered with candles. To celebrate what? Rome's birthday, of course. On April 21, 753 B.C., according to Roman again and again in his poetry. The web, calculations, Romulus saw the augury of the twelve vultures, designating the Palatine Hill as the site for the future city of Rome, and on that very day founded his city upon that hill. For an ordinary birthday celebration the Romans did not use our type of large birthday cake, but they did have family observances, including offerings of small cakes and unmixed wine to the Genius ("Spirit" or perhaps "Guardian Angel") of the one whose birthday was being celebrated and

prayers for his good fortune. The birthday of Rome, however, called for no ordinary celebration. It coincided environment. Cities both real and (was it only chance?) with an old Italic ntangible appear as links to an festival, the Parilia, held in honor of the npersonal geography. Encyclopedias deity Pales, (A linguistic change has lend false security to those who, in substituted an r for an l.) Pales,

female, presided over flocks and shepherds

The Parilia, originally a country festival, was brought into the city and celebrated on the Palatine Hill, both honoring the deity and commemorating the foundation of Rome. The name Palatine may be derived from Pales, the name of the divine guardian of the flocks. In the country the sheep and sheepfolds were purified, as were the countryfolk themselves. Cakes were presented to the

god, and prayers were offered. The idea of Rome's birthday being on April 21 was popular throughout much of antiquity and was even revived by the late Fiscist government of Italy. But let us observe the birthday of the Eternal City with these lines from Milton's Paradise

"The City which thou seest no other

Than great and glorious Rome, Queen

So far renowned, and with the spoil

Of nations; there the Capitol thou see: Above the rest lifting his stately head On the Tarpeian rock, her citadel Impregnable; and there Moun

Palatine The imperial palace, compass huge. and high

The structure, skill of nobles architects

With gilded battlements, conspicou

Turrets and terraces, and glittering

Many a fair edifice besides, more like Houses of gods (so well I have disposed My airy microscope) thou mayes

Carved work, the hand of famed

artificers

In cedar, marble, ivory or gold."

Recordings

By DAVID GOLDMAN

Wings Over America consists of the tire repertoire performed by Paul American tour last spring. It includes the other rockers who performed here, concert.

Although releasing an entire concert as an album seems generous of McCartney, WOA could have been much tighter as a two LP set. The entire fifth side, for instance, consisting of four songs from the most recent studio LP, "Wings At The Speed of Sound", seems superfluous, since the versions here aren't very different from the originals. Also, Denny Laine's rendition of Paul Simon's "Richard Cory" is hardly up to the high quality of the rest of the album, with Laine taking Simon's moving ballad and treating it as a joke. Most of McCartney's comments to the audience have been cut, for some reason, and the cover gives no information about where and when the songs were recorded. The album itself doesn't even have the word "live" anywhere on it, and there aren't very many in-concert photos provided, either,

But this is of secondary importance to the music itself, which is first-rate. Denny McCartney and Company on their Laine sings a superb version of "Go Now", his old Moody Blues hit, and McCartney's recent music as well as five McCartney performs "Lady Madonna". Beatle numbers and a few songs "Live and Let Die", "Hi Hi Hi" and other previously unrecorded by Wings. There is with style. Even the second encore, the ough material here to please every previously unreleased "Soily", which McCartney fan, and perhaps some non- sounded like a bunch of noise when I selievers as well, since this album gives heard it in concert, comes off well here. roof that, on stage, Wings is not the although why McCartney chose it as an loyingly cute ensemble some people have encore is beyond me. All in all, Wings cused them of being after hearing their Over America provides much (maybe a ecords. Anyone who felt this way is in for little too much) music for McCartney mild shock when they hear "Jet", fans and non-fans alike, and gives an 'Medicine Jar", "Beware My Love" and accurate aural presentation of Wings in

Just a Story From America RCA

By PETER HOFFMAN

Elliott Murphy has had three albums on two different labels but he has yet to "break". With the release of his fourth album, Just a Story From America, he has been picked up by a third label, Columbia. It is sad that with such a prestigious label he has produced such a

pretentious bore of an album.

Just a Story From America uses the same format as each of his previous albums, but this time it doesn't work Perhaps it is his new producer, Robin Cable. It could be his new band, which includes Phil Collins of Genesis and Mick Taylor, Jormerly of the Rolling Stones. Maybe it's the fact that he recorded an album in I urope for the first time. I don't believe any of these are the reasons. Murphy has decided to record a blatantly commercial album, with a few singles and not much else worthwhile

"Drive All Night", the opening sons

you get the strange feeling you've heard it somewhere before. Even the lyrics are reminiscent of Springsteen:

"Now you know what it feels like on hot Sunday night When you just can't go

things aren't quite right So we sneak into your house; but it

the wrong one Cause they all look the same; this

town's just no fun. But we finally get it daddy knew he'd kill

And we hit that highway about hundred and one

And I hear this funny noise, ma they're tryin' to spoil our fun."

The title song has a reggae-like sound with the use of steel drums. It doesn't work at all. In fact, the song sounds distorted, as if it was recorded at a slower

"Rock Ballad" is the one truly excellent song on the album. Mick Taylor's fine lead guitar playing is perfectly attuned to Murphy's vocals. The lyrics do not try to be too intellectual for the average listener: "Now let's all raise our glass, For a drink to the past, And a drink to the last chance taken. And let's drink once again to our long lost friends. No, we can't let it end the surf's breaking."

It seems that with each of his album Murphy has torsaken new musical arrangements and, instead, he has become more of an intellectual lyricist. By doing this he is alienating the fans he acquired at the beginning of his career. He is stagnating musically and he might as well release a book of lyries rather than

don't play with matches

To the Editor:

When I was two years old, I pretended my hand was a piece of Wonder Bread and stuck it a toaster. Having learned at such an mpressionable age that heat and fire could be angerous, and with three scars on my left ingers as a handy reminder, one might onder why I chose to ignore a fire alarm last emester, running the theoretical risk of oasting the whole loaf.

For this particular fire alarm, about the lenth of the semester in Stuyvesant Tower, the merry prankster chose my floor. My RA was o eager to show that his gang was not wolved that he searched each room in the ection. I was ferreted out, bundled off to Dutch Quad Judicial Board, and given my nedicine. I was appointed Fire Marshall of the section and was placed on probation for he semester. In addition, I was asked to write letter, with "the intention of submitting it to e Albany Student Press," outlining the angers inherent with fire safety violations. lere I go.

Failing to respond to a fire alarm is a olation of New York State Fire Regulations. hough these are not penal laws, you really wouldn't want a violation permanently affixed your transcript. Employers are rather leery hiring arsonists and pyrotechnists, unless ou're joining the Army.

Being a Fire Marshall is no great fun, either. unning around, knocking on doors at 4 a.m., is no way to win a popularity contest. And

who knows what responsibilities your RA may add on? As the Judicial Board chairman wrote to me, "At any time the alarm could go off and you are expected to carry out the ties assigned to you."

You may not end up as a Fire Marshall— because the Judicial Board tries to fit the punishment to the crime. As the chairman wrote, "The Board in its decision drew upon various aspects to this case alone, and its decision was based only on those parts introduced in this case."

The Dutch Quad Judicial Board feels tha "its first objective is to be educative rather than punitive." I must admit I am somewha confused by that statement, though it might be very noble. If the Board meant its firs objective to be educative, does that imply that its first objective was, in reality, something else? It's a mystery, and I suppose that only the pre-law students can interpret these things.

Anyway, the advice from this penitent is simple. Avoid hassles, go down for all fir alarms, and be nice to all university officials during alarms. Perhaps you won't have to endure reading any more letters like this in the ASP. Better yet, you won't have to write one

female power

To the Editor

Ms. Murphy raised some valid points in he letter to the editor on April 19: She said that there are too few females involved in studen activities and used the ASP and Studen Association as examples. Since I am an activ participant in both of these organizations, noticed a great deal of wrong information is

First, she failed to mention that one of the advertising managers of the ASP is a woman. This is an extremely important and timeconsuming job. She is responsible for bringing in the money that allows the ASP to independent of SA tax support. Second, she discounts the positions that

most women hold at the ASP, since they do not seem to be important on the whole. Most of the production staff is female; this includes production workers, typists, and ad production workers. All of these people are trained to use complex machinery. The reason we choose to stay in our present positions is because we are not willing to put in the incredibly long hours that the editors and managers do.

In her discussion of SA Ms Murphy is obviously talking through her hat. She completely ignores the entire judicial branch of SA, which is 28 percent female. She also ignores the female SASU delegate. The SA secretary is a woman simply because no qualified men applied for the job.

Ms. Murphy is right when she says that there isn't enough participation by women in student activities. When I became aware of this, I involved myself in two organizatons. I challenge you. Ms. Murphy, to do more than write letters to the editor, bitching about what others aren't doing. Join something! Run for something! You just have to be willing to do what most women at SUNYA refuse to doget out of the library and spend some time working. I really believe that the clubs and groups on this campus need good people Don't just complain. Do something yourself. Vicki Kurtzmar

Chief Justice, SA Supreme Court ASP Typis

The Albany Student Press welcomes letters to the editor. Letters must be typewritten triple-spaced, and signed. Names will be withheld on request. Please bring or send letters to Campus Center Room 329 by Wednesday for publication in the Friday issue and by Sunday for the Tuesday issue.

editorial

Cutting Council

Central Council has done incredibly stupid things in the past, and it will continue to do incredibly stupid things in the future. That's to be expected. But when Council begins to fade away, when its members treat it as just another line on their law school applications, then it's time to take some drastic action.

Disband Council. It would only be a formalization of an already existing situation, but it has to be done. Sub-committees presently do all the necessary work anyway. A ten-member legislative group could accomplish more in one meeting than Greg Lessne's oversized zoo has done all year

Council spends most of its time dealing with money—when it's not too busy impeaching someone, or issuing resolutions expressing its displeasure with the universe. The general rule: SA groups want more money, and Council feels that they can do with much less. Those who complain loudest and longest win.

The cornerstone of this institutionalized chaos is the Executive Budget. Each year, the outgoing President presents Council with a budget, and each year Council twists and shouts it into its final, "acceptable" form.

This year's budget is an important one. It determines the fate of SASU, cuts out several smaller groups entirely, and generally slashes all around

If Council fails to rustle up a quorum as it has failed to do for several weeks, SA President Steve DiMeo will cut SASU, take the 11 grand saved there and spread it around the rest of SA.

The President acts in the absence of Council, and if Council continues the way it's been going lately, SA is well on the way to a one man rule. One thing that can be said for a benevolent dictatorship: it's efficient. However, there's no guarantee of benevolence.

On a campus where the students have swallowed the edicts of President Fields without much more than a whimper, maybe this whole situation shouldn't be surprising. In any case, the student body and their elected representatives will most certainly get what they deserve.

QUOTE OF THE DAY

"They piss away too much money in beer."

Central Council Chairman Greg Lessne, explaining this year's budget cuts.
