

GE women workers want to finish the job begun by UE. We want to see all our jobs rated solely on the basis of our duties. We want to see our piece work prices figured on the same basis as all piece work prices. Once the present disruption by IUE-CIO is out of the way, we shall again be fighting for the UE program, through UE.

Above all, we want to work with the whole plant in winning shorter hours, higher pay, adequate pensions, and the whole UE program which will help make our homes secure and our country a happier land.

ELECTRICAL UNION NEWS

THE VOICE OF LOCAL 301 - - - U. E. R. & M. W. A.

SCHENECTADY, N. Y.

May 15, 1950

STATEMENT BY THE EXECUTIVE BOARD of UE Local 301 on the Steamfitters' Strike

The Executive Board of UE Local 301, acting on behalf of the main body of production and maintenance workers in this plant, urges Local 128 of the Steamfitters Union to reconsider their Executive Board's strike order, return to work, and accept UE's standing offer for joint negotiations after May 25 on our common just demands.

In the meantime, we recommend that the rest of the plant workers stay at work. Of course, our members will continue to do only their normal duties.

There is no question about the justice of the steamfitters' demand upon GE. They are entitled to correction of their rates. In fact, the correction of craft rates is one of the major demands in the bargaining program which UE will press upon the company May 26.

The question today is not the merit of Local 128's wage demand, but the fitness of striking at this time.

We say now, as we said a year ago, that a strike by less than one-fortieth of the people working here, affecting seriously the welfare of 16,000 workers without their having a say on it, can serve only to tear down what has been built in 14 years of united action by GE workers.

Local 128 was established for long years, but was able to negotiate effectively only after the whole plant was organized in UE. Even today, Local 128 could not even think of a strike if it were not for the fact that the whole plant is organized.

For 12 years UE was glad to bargain for Local 128 free of charge while Local 128 maintained a separate existence and kept its own dues check-off. When Local 128 decided to split away from the bargaining unit, we offered no objection. But everything that has happened since has shown that separate craft action is wrong and that we should all work together.

The last time that the steamfitters won a raise in their rate was when the whole plant membership joined to enforce the War Labor Board decision in favor of the steamfitters and electricians.

The strike action by Local 128 means that 350 workers may cause unemployment for thousands. It may seriously interfere with many workers in casting their rightful votes in the NLRB election to choose their bargaining representative. It will make it more difficult to unite all groups behind the over-all bargaining program of the 16,000 workers in the plant, including the demands directly covering the craft rates over which the steamfitters are striking.

It is tragic that the steamfitters should take such action when we are less than two weeks away from entering negotiations on all the points in which the steamfitters are and should be interested. They are still welcome to join with us in these negotiations and yet maintain their separate and autonomous existence.

The strike today is contrary to the interests of all the workers in the plant, and quite specifically it is contrary to the interests of the steamfitters themselves. It can serve only the long range aim of GE to return its employees to the disorganized conditions and the disunity which prevailed before 1935.

We again urge the steamfitters to reconsider.

EXECUTIVE BOARD UE LOCAL 301

Ever Get Hurt in the Shop?

The signers of this leaflet are some of the 1350 men and women in this plant who suffered injury or illness on our jobs, and have had our cases handled through the Workmen's Compensation service established by UE Local 301 two years ago.

Some of us had minor injuries, and some were so badly hurt that our awards ran up into many thousands of dollars.

In all, we collected more than \$850,000 in disability awards and medical fees. About one-third of these claims of ours were contested in some manner by the GE. And 220 of our cases involved old injuries or re-opening old claims of ours in which we were denied our full rights until UE gave us legal services to get what was coming to us.

Yes, we all received the finest kind of help.

And all this did not cost any of us one penny.

Do you know of any other union which gives its members that kind of free service — on dues of \$1.50, the lowest you've heard of in the labor movement?

A Union By and For the Members

Of course not. It's our union, the UE, alone which does this, and it can do so because it is a union which really exists and is run by and for the membership.

We who have had compensation cases know how ridiculous are the foul lies, the "Communist domination" and "foreign agent" stuff which is peddled by those who hate what this union has done for GE workers. We know that a union which gives the kind of protection we get on dues of \$1.50 has time and money only for service to its membership.

UE's handling of our compensation cases has not brought us money alone. It has helped protect our job and seniority rights at GE. It has helped the union's steady drive to remove health and safety hazards in the shop.

Think of what such compensation cases as those involving silicosis, mercury poisoning, and paint hazards have meant to all GE workers on that type of work — not just those already hurt.

GE Forced to Act on Health Hazards

Our compensation service has put powerful pressure upon the GE to clear up the hazards. That is why GE has been forced to take real steps to clear up the dust dangers in Porcelain, just to mention one example. As long as UE is here, we know that we are going to make steady progress in removing all these hazards.

Our experience in Workmen's Compensation Court has shown that the law has all kinds of serious holes in it. And UE, almost alone, has been campaigning in Albany to get the law corrected, to raise the weekly maximum, to make our job rights enforceable by law, to cover silicosis cases — in general to plug all the loopholes which GE now uses to their advantage.

While UE has been trying to get the law improved — the CIO in the state has preferred to block our efforts, rather than help get a better law. Let's hope the day will come when the average workingman in CIO unions forces his leadership to stop fighting good unions and join instead in getting better laws for the working people.

UE Will Do a Lot More

Yes, our union has meant an awful lot to us who suffered from illness or injury. It already has helped us to get the best available medical service instead of being sent to GE doctors. And that gives us hope that when IUE-CIO and other anti-labor people are swept away, our union will pioneer even further in medical help to all the members.

We're not asking for free doctor's care. But we know that a union like ours can go a long way in setting up panels of specialists who can give us advice on our illnesses, free from company influence. We know it can arrange for independent medical surveys of health hazards in the shop. It might even arrange for dental checks. It might provide for a medical service to fit in with our contract proposals for company-paid insurance and hospitalization. We say it will, after the present troubles are cleared up.

That is why we say to our fellow workers at GE, out of our personal experiences:—

Let's build our union, the strong union that does the best for us, in law as well as in negotiations and grievances.

VOTE UE — Right Hand Side of the Ballot.

GOVERNMENT CONTRACTS IN UE PLANTS SINCE JANUARY 1950

One of the phoniest of the company union-IUE smears at the UE is left to the very last minute, just because it won't stand inspection in the light of day.

That is the company union argument that the United States Government does not place orders with UE plants.

It is the company union-IUE hope that in bringing this scare up at the last minute — confusion and fear can be created long enough for IUE-CIO to steal a few votes.

The IUE-CIO fraud is easily shown up by the following facts:

1. UE members, now as in the past, do many times as much government work as do the steel workers.

In the 14 years of UE's existence before, during and after World War II, there has not been a single instance of a UE Steward, Local, District or National officer even being charged with suspicion of violating security regulations.

2. Government orders of all sorts continue now — as in the past — to flow into UE plants. (A fact easily verifiable from weekly reports of the Department of Labor listing all contracts with government agencies and made openly available to the general public.)

Out of a total of almost \$1,300,000,000 of government aircraft contracts between January 1, 1947 and June 17, 1949, General Electric and Westinghouse received \$106,079,260 or about 15% of the total.

G.E. and Westinghouse, under UE contracts, together are producing about 45% of all aircraft engines for the government.

The following is a list of government contracts awarded UE plants since January 1950, openly available in the public reports of government purchases:

We'll Get a Secure Pension Plan

Now UE has pioneered again, with the Westinghouse Airbrake pension and company-paid insurance plan. We know that after GE workers come through with a big UE majority vote, we shall win a really secure pension plan here too, one that will pay us higher pensions as Social Security benefits are improved.

For those who have come to work since UE was established, it is hardly possible to realize fully the change that has come over this plant — in working conditions, in freedom, in the self-respect of the workers and their ability to deal with their bosses as equal American citizens.

We are proud of the record of our union. We want to preserve that record and that union in the General Electric plants as part of the American heritage — for present needs and future progress.

VOTE UE — the right side of the ballot.
