Dr. George J. Klima has joined the faculty of State University of New York at Albany as associate professor of anthropology in the department of sociology and anthropology of which Dr. Paul Meadows is chairman.

Professor Klima comes to the Albany campus from California State College, Los Angeles, where he was assistant professor of anthropology. He holds degrees from Syracuse University and from the University of California at Los Angeles where he received his doctorate.

The new SUNYA faculty member, a specialist in the study of African native cultures, has spent two years engaged in field work among the Barabaig tribe of Tanganyika in East Africa. He is the author of two books on the Barabaig.

At the Albany university Professor Klima will be responsible for the development of an African specialization program in the department of sociology and anthropology. He also will have general responsibility for the preparation of graduate students in anthropology and the development of the program in anthropology.

Sociologists joining the department this fall include Robert F. Guerrin, and Louis Lieberman, assistant professors, and Philip L. Lord, part-time lecturer.

\*\*\*\*\*

September 5, 1968

Mr. Guerrin resides at 7 Alvina Blvd., Albany and Mr. Lieberman lives at 42 Tull Dr., Colonie.

The College of General Studies of State University of New York at Albany will offer its first radio course, "Keyboard Masters," for academic credit this month. Presented through the cooperation of Station WAMC-FM (90.3) of the Albany Medical Center, the survey of music for the stringed keyboard instruments from the English virginalists to the 1940's begins Wednesday, September 18.

The three-credit, 28-program radio course for home study is intended to be an elementary course at the level of persons having limited musical background. Additionally, there will be included material enlightening to pianists and music teachers. Especially prepared records, study guides and texts will supplement the bi-weekly broadcasts.

Pianist-lecturer for the course is Findlay Cockrell, assistant professor of music at the university. Mr. Cockrell was educated at Harvard College and at the Juilliard School of Music where he received a master's degree. As a recitalist, he has appeared on the West Coast and in the greater New York City area numerous times, as well as in other metropolitan areas. His concert performances in the Albany area consistently have received enthusiastic reviews by music critics. Mr. Cockrell heads piano studies in the university's music department.

Dr. Daniel M. Nimetz, assistant professor of music at SUNYA, wrote the syllabus for the course. He is a graduate of Alfred University and of the Eastman  
(more)

State University of New York at Albany - 2  
General Studies Radio Course

School of Music where he received his doctorate in musicology. Additionally, he has studied at the University of Vienna.

The course will be aired each Wednesday and Thursday from 1 to 2 p. m. with a repeat in the evenings from 7:30-8:30. The course schedule will adhere closely to the university's academic calendar. Students taking the course for academic credit will be required to complete both mid-semester and final examinations on the Albany campus, probably on Saturdays to be designated by Professor Cockrell. The instructor also may require several seminar sessions on campus as well as written assignments based upon the written texts, study guides, and records.

Those interested may register now with the College of General Studies located in the Administration Building on the university's uptown campus or on Saturday morning, September 14, or at anytime during the day on Monday, September 16, in the gymnasium at the physical education building. The fee, at \$14.35 a credit hour, is \$43.05.

Preparations for the course have been underway for over a year. Dr. Irving A. Verschoor, dean of the College of General Studies, describes the new offering as an extension of what the college has been undertaking for some time in making courses available to a large number of persons located away from the campus. He remarked, "We have been working with television as one medium, with independent study courses, and now radio which has so many advantages for teaching. Among them are the ease of student participation and the large area throughout which the course can be received."

Professor James W. Corbett, who has joined the physics department of State University of New York at Albany, will present an invited paper at the International Conference on Vacancies and Interstitials in Metals to be held September 23-28 at the Nuclear Research Center, Julich, West Germany. On the trip Professor Corbett also will visit several laboratories in England and Switzerland to discuss current work on defects in metals and semiconductors, a subject on which he is a noted authority.

Professor Corbett also is active in the study and documentation of the role of technology in industrial development, of the true essence of the challenge of American technology and industry to European industry, and of the problems of the academic - industrial interface. For that reason he will confer on the trip with Dr. Alan H. Cottrell, Deputy Chief Scientific Adviser to Her Majesty's Government, in London, with Cathal Loughney, director of the Irish Industrial Development Authority, in Dublin, and with the managers of the new Research Center of the Brown-Boveri Co., in Baden, Switzerland.

Professor Corbett's undergraduate preparation consisted of one year at the Kansas City Junior College and two years at the University of Missouri where he graduated with distinction in physics. The next year he received his Master of Arts from Missouri and three years, later, his doctoral degree from Yale University. Aside from a summer spent in the chemistry department at Yale, his professional career has been spent at the General Electric Research

and Development Center in Schenectady. He also has served for the past four years as an adjunct professor at Rensselaer Polytechnic Institute.

The SUNYA physicist is a member of the Phi Beta Kappa, Sigma Xi, and Pi Mu Epsilon, honorary fraternities. He received the O. M. Stewart Prize, the O. M. Stewart Scholarship, the O. M. Stewart Fellowship and the General Electric Coffin Fellowship. Additionally, he is a Fellow of the American Physical Society and a member of the American Association of Physics Teachers. He served on the organizing committee of the IEEE Experiment in Continuing Education and on the organizing committee of the 1967 International Conference on Radiation Damage in Semiconductors.

Professor Corbett and his wife, Joyce, will continue to live in Niskayuna with their two sons, Lee and Ross.

Soon to return for the fall semester at State University of New York at Albany is Dr. Ernest R. Ranucci, professor of mathematics education at the university. Dr. Ranucci spent the summer months in Colombia and Ecuador conducting short courses with secondary school teachers, professors of mathematics education and mathematics professors in general.

The mathematician-educator's lecture tour was under the auspices of the Fulbright-Hayes Act. His major topic of concentration was "Imagination and Intuition in the Teaching of Geometry on the Medium Level." Dr. Ranucci visited 10 universities in Colombia and one in Ecuador during his tour.

Prior to joining the Albany faculty in 1965, Dr. Ranucci was chairman of the Mathematics department at Newark State Teachers College, Union, N. J. He has traveled in Scotland, and Brazil on Fulbright program grants and also has visited Uruguay, Argentina, Chile, Peru, Bolivia, and Paraguay. He has authored more than 30 articles on mathematics in various journals and periodicals.

Dr. Ranucci received his bachelor of arts and master of arts from Montclair State College and his doctorate in mathematics from Columbia University.

John R. Fonseca, formerly associate professor of business law at Utica College of Syracuse University, has joined the faculty in the department of finance and law of the School of Business, State University of New York at Albany.

Mr. Fonseca, who has the rank of full professor, has been admitted to the New York and Massachusetts bar. He is editor-in-chief of The Uniform Commercial Code Law Journal and legal editor of The Banking Law Journal published in Boston. Additionally, he is a licensed insurance broker in New York State and an examiner for the New York Stock Exchange, American Stock Exchange, and National Association of Securities Dealers examinations.

The new SUNYA faculty member is the author of numerous published works and additional writings are being readied for publication. He has degrees from Harvard College and from Harvard Law School.

Also joining the department this year as lecturer in law is Charles O. Milham of Milham Realty, Inc. Albany. An attorney and real estate broker, Mr. Milham specializes in the areas of real estate and contracts.

The Albany lawyer previously taught law courses at Russell Sage College. He has served as a consultant for revision and editing of various textbooks. Mr. Milham completed graduate and undergraduate studies at SUNYA and holds bachelor of laws and doctor of jurisprudence degrees from Albany

For Release: Wednesday Noon,  
September 11, 1968

Members of the administrative and nursing staffs of hospitals and health agencies in the Capital District were guests of honor at a luncheon given at Campus Center of State University of New York at Albany today (Sept. 11) by President Evan R. Collins and the faculty of the School of Nursing.

Invited guests included representatives of other organizations which have been instrumental in the establishment of the new baccalaureate nursing program at the university. President Collins expressed appreciation for the generous cooperation and assistance which the university has received from members of the group and the staffs of their agencies.

The purpose of the meeting was to provide an opportunity for members of the university staff to become acquainted with personnel in the various agencies in which nursing students will receive clinical experience. Dean Dorothy M. Major gave a brief overview of the curriculum of the School of Nursing which admitted its first class last year. Students in the class will begin assignments in community agencies during the current semester. The second class, of approximately 40 students, will begin freshman work this fall.

Invited guests included Robert E. Ward, executive director, Dr. Stewart C. Wagoner, chief of pediatrics, Mrs. Elinor M. Vitelli, director of nursing, and Mrs. Norma J. Hudson, director, rehabilitation nursing, Sunnyview Hospital and Rehabilitation Center; Mrs. Edna Murphy, regional consultant

The Art Gallery at State University of New York at Albany will begin the 1968-69 season with four concurrent exhibitions. One-man exhibitions by the painters Rafael Villamil and Donald Ogier will open on September 19 along with a selection of photographs entitled "Guggenheim Fellows in Photography." The fourth exhibition, prints from the collection of the Museum of Modern Art, is called "The Artist As His Subject."

The work of Rafael Villamil has been exhibited in his native Puerto Rico and in one-man shows at the Pennsylvania Academy of Fine Arts and at the Pan-American Union. While contemporary in its use of irregularly shaped canvas, found objects, and electric light bulbs, it is spiritually related to indigenous Latin religious folk art. Mr. Villamil now lives and works in Philadelphia.

Donald Ogier, who is presently a teaching assistant at the University of Massachusetts at Amherst, has exhibited widely in the United States and in Europe where he worked as a Fulbright Fellow in 1962. Mr. Ogier calls his current work "three dimensional painting." It combines found objects, collage, and acrylic paints on canvas and wood.

"Guggenheim Fellows in Photography" represents the work of 29 recipients of John Simon Guggenheim Foundation fellowships in photography. The foundation's first award was given in 1937 to Edward Weston. The exhibition includes such other well known names as Ansel Adams, Bruce Davidson, Robert Frank, Dorothea Lange, and G.E. Kidder Smith.

(more)

State University of New York at Albany - 2  
Art Gallery Exhibitions

Artists' self portraits and their interpretations of fellow artists are the materials for "The Artist As His Subject." The prints are the work of fifty artists from eleven countries. The early works include a sensitive portrayal of Odilon Redon by Edouard Vuillard (1900) and Charles Maurius' "Henri de Toulouse-Lautrec" (1890). The most recent prints are those of Jim Dine, Jasper Johns, R. B. Kitjac and Robert Rauschenberg.

William S. Lieberman of the Museum of Modern Art, who selected the prints, says of the exhibition, "None of the works were commissioned, and some are more like the artist than he actually appeared." The prints are accompanied by photographs of the subjects which are related in pose and period to the work of art insofar as possible. The photographs afford comparison with graphic interpretations.

An opening reception for all four exhibitions will be held in the gallery Thursday evening, September 19, from 7:30 to 10:00 p. m. The general public is invited.

The first general faculty meeting of the new academic year at State University of New York at Albany will be held Thursday morning, September 12, in the ballroom of the Campus Center with the faculty now about numbering /700 expected to be in attendance, an increase of nearly 80 over the total a year ago.

President Evan R. Collins will speak at the session, set for 10 o'clock. Preceding the event, an informal coffee hour will be held in the main lounge beginning at 9.

Following the general meeting, meetings of faculties of the College of Arts and Sciences, School of Business, School of Education, and the School of Library Science will be held at 11. In the afternoon, beginning at 2, the Graduate School of Public Affairs faculty meeting will take place.

On Friday morning an orientation program for new faculty and professional staff has been scheduled. There will be an informal coffee hour beginning at 9:30 in the main lounge of the library. The formal orientation program will follow at 10 and a conducted tour of the campus will begin at 11.

Well over 10,000 students will enroll this month, including more than 530 new transfer students and 1670 freshmen. The 125th opening convocation will take place at 8:15 on Monday, September 16 on the Campus Center Mall where Professor Robert Rienow, of the Graduate School of Public Affairs, will give the principal address.

Muhammed Khan, a graduate student in educational administration at State University of New York at Albany, has been awarded a renewal grant for an academic year fellowship under the Training Opportunities for Youth Leadership Program. Mr. Khan, formerly an educator of Pakistan, is continuing graduate studies leading to the Doctor of Education degree.

Administered under the auspices of the Institute of International Education and the Agency for International Development, the Training Opportunities for Youth Leadership Program assists self-sponsored foreign students from developing countries in completing their collegiate study in the United States. Awards are made in favor of those students who possess leadership potential and are majoring in fields of study that can be utilized in the development of their home countries.

Twelve paintings by Donald Ogier will comprise one of the exhibitions that will open the 1968-69 season at the Art Gallery of State University of New York at Albany. Ogier's work will be on display from Monday, September 16 through October 13. Ogier who was born in St. Louis, Mo., in 1933, is a teaching assistant at the University of Massachusetts in Amherst. He received his B.F. A. at Washington University, St. Louis, and studied in West Germany. In 1962 he was awarded a Fulbright Fellowship in painting. He has lived and traveled extensively in Europe.

The artist has participated in numerous group shows in the Midwest, New York, Massachusetts, and West Germany, including the 12th annual National Drawing and Sculpture Show, Muncie, Ind., where he received the Purchase Award in 1966. In addition, Ogier has held four one-man shows including one in Caracas, Venezuela, and one at the University of Massachusetts, where he will complete requirements for an M.F. A. in June, 1969. His portraits, paintings, drawings, and prints are part of various private collections in both America and Europe.

The current show consists of recent examples of Ogier's "three-dimensional paintings"--a combination of found objects, collage, and acrylics on canvas and wood. A reception, to which the general public is invited, will be held Thursday evening, September 19, from 7:30 to 10 p.m.

Frank G. Krivo, director of admissions, State University of New York at Albany, represented State University of New York in his capacity as director of the university's Admissions Assistance Center at a Pentagon conference on "Developing College Opportunities For Men Leaving Military Service" just concluded in Washington.

The center, a function of central State University administration, operates from the university at Albany. It has expanded recently its responsibilities in order to aid returning veterans in finding a place in the State University system.

The center began in the spring of 1967 with a program to aid unsuccessful junior college applicants in finding a college place. In its two years of operation it referred 97% of those asking for assistance to an opening in the State University or in a limited number of participating private colleges.

This year the center hopes to expand its services to aid veterans and special groups of students who may need assistance.

The SUNYA campus was represented by Dr. Paul M. Miwa, assistant vice president for academic affairs.

A new center, the Two-Year College Student Development Center, has been established at State University of New York at Albany. Dr. Arthur A. Hitchcock, professor of education at the university, will serve as director.

Formed to help meet a critical need for the improvement of counseling and related student personnel services in the two-year colleges of the state, the center will emphasize programs of research, development and distribution of materials, and preparation of personnel. Particular stress will be placed on in-service programs such as workshops, seminars, institutes, and consulting clinics.

The center comes into being as the result of an intensive study of counseling services in the two-year colleges and the best means to meet immediate and long-term needs made during the past year by a joint planning group, formally called the Joint Planning Group for Two-Year College Counseling Programs and representing wide and varied interests. In the group were private and public university counselor-educators, two-year college student personnel deans, and two-year college counselors, as well as representatives of the State University of New York and the State Education Department. The project was sponsored by the Bureau of Two-Year College Programs in the Division of Higher Education of the State Education Department with the aid of a federal grant as arranged by the department. Dr. Hitchcock served as project director, and Dr. S. V. Martorana, vice-chancellor for two-year colleges, State University of New York, as project supervisor.

(more)

Coupled with the activities of the joint planning group was a simultaneous commissioned study conducted by Cornell University jointly with the Bureau of Two-Year Programs. In a final report the joint planning group proposed the creation of a center with the recommendation that State University of New York at Albany be invited to undertake its establishment. In addition to Dr. Hitchcock, William A. Robbins, as associate director, and P. Alistair MacKinnon, as administrator, have been named to the center's staff.

A goal of the center is to develop regional programs throughout the state, using the resources of the various universities, both private and public, to provide help to students in dealing with educational, vocational, and personal concerns. In addition, long-range plans include the center's working closely with degree-granting institutions throughout the state sharing an equal concern about the quality of professional counseling in the two-year colleges.

Prior to joining the SUNYA faculty two years ago, Dr. Hitchcock served as executive director of the American Personnel and Guidance Association for 11 years. He is a graduate of Wesleyan University, and obtained his doctorate from Yale University. Dr. Hitchcock has been involved in a wide range of national professional and governmental activities, including Vice President Hubert H. Humphrey's Task Force on the Dropout, the Commission on the College Student of the American Council on Education, and a U. S. Office of Education project in Puerto Rico where he served as educational consultant.

Mr. Robbins had been dean of students at Mohawk Valley Community College since 1961, after having taught in the social science program at the College. He is

a graduate of Drew University where he received a Bachelor of Arts in history, magna cum laude. He also has a Master of Arts from Teachers College, Columbia University, and a Bachelor of Divinity from Union Theological Seminary. During the past year Mr. Robbins served as consultant for two-year colleges under a program of the U.S. Office of Education and the American Association of Junior Colleges.

Mr. MacKinnon comes to the newly-established center after serving for more than five years as consultant to the Secretary of Education of the Commonwealth of Puerto Rico under an exchange program with the U.S. Office of Education and as educational specialist in the U.S. Office of Education. From 1960-63 he was chief of the Bureau of Research and Statistics in Maine's Department of Education.

Mr. MacKinnon completed his undergraduate and graduate study at the University of Arizona where he received his Bachelor of Science and Master of Business Administration. He is a specialist in educational financing and management of resources.

Dr. Evan R. Collins, president of State University of New York at Albany, has indicated the university's belief in the "importance of the unique role of the community college in public higher education" and agreement with the Joint Planning Group's conclusions about the central place of the guidance and counseling function. "We are," he added, "happy to accept the invitation to establish here the Center, and to begin promptly to implement the report of the Joint Planning Group."

In order to help establish the center and its program during the first year, the State Education Department approved a grant fund of \$100,000 under the Vocational Education Act and the National Defense Education Act. In speaking of the

grant, Lawrence E. Gray, chief of the Bureau of Two-Year College Programs, said that the center should be able to provide immediate and specific steps to improve "what many consider to be the hub, so to speak, of the two-year college movement; namely, the guidance and counseling function."

When the 125th opening convocation takes place Monday evening (Sept. 15) at State University of New York at Albany, flags of various nations throughout the world will be displayed from the roof of the Physical Education Building located to the south of the campus center mall, site of the ceremony. Principal speaker at the convocation will be Dr. Robert Rienow, professor of political science and chairman of the faculty of the Graduate School of Public Affairs.

The 15 flags to be displayed represent but a portion of the 36 home nations of the 136 international students enrolled for the new academic year. Included among those countries whose flags will be shown are Argentina, Botswana, Brazil, Republic of China, Ethiopia, Greece, Iran, Jordan, Republic of Korea, Lebanon, Nigeria, Pakistan, Rhodesia, Singapore, and Turkey.

The convocation program will begin at 8:15 with the traditional candle-lighting ceremony. The academic procession will follow, prior to the call to order by Dr. Webb S. Fiser, grand marshal. President Evan R. Collins then will address the assemblage. Following the invocation by the Rev. Frank P. Snow, Frank G. Krivo, director of admissions, will present the Class of 1972 to President Collins.

A welcoming address by Duncan A. Nixon, president of the Class of 1969, will precede the principal address by Dr. Rienow. The program will close with the singing of the alma mater, a benediction by the Rev. Paul R. Smith, and the recessional.

More than 10,000 students will enroll in the university this semester, including in excess of 530 new transfer students and 1670 freshmen.

Dr. H. Peter Krosby has been appointed professor of history and chairman of the department of history at State University of New York at Albany. He comes to Albany from the University of Wisconsin, where earlier he was named chairman of the department of Scandinavian studies, a post he resigned to accept his new position.

Born in Norway, Dr. Krosby attended elementary and secondary schools in his homeland and served in the Norwegian Army in 1948-49. He emigrated to Canada in 1952, worked as a logger for a year, and entered the University of British Columbia in 1953. There, he earned degrees in international studies and Slavonic studies. He became a Canadian citizen in 1958. Winner of a Ford Foundation Foreign Area Training Fellowship, he attended Columbia University in 1958-59 and received a doctorate in modern European history.

Following three years on the faculty of Fairleigh-Dickinson University, Rutherford, N. J., he moved to the University of Wisconsin in 1962. Dr. Krosby's main professional interests are 20th Century European diplomatic history, the history of World War II, and Scandinavian foreign relations. He has written numerous articles and reviews in scholarly journals in the United States, Canada, Germany, Sweden, and Finland and has published three books, with four more in process, two of which will appear next year. His most recently published work is "Finland, Germany, and the Soviet Union, 1940-1941: The Petsamo Dispute" published by the University of Wisconsin Press.

Dr. Krosby is an elected member of the executive committee of the Society for

State University of New York at Albany has received a \$25,000 grant from the New York State Science and Technology Foundation for the purpose of strengthening the graduate work of the university's Atmospheric Sciences Research Center.

The grant, approved by Governor Rockefeller, is one of eight such grants totaling \$222,700. The foundation, which was organized to promote excellence of science and engineering in the state, has awarded more than \$3.5 million since 1965.

The research center plans to use the grant to help finance a program which will bring distinguished visiting scientists in the field to the university. Dr. Vincent J. Schaefer, director of ASRC, has indicated that leading scientists will be invited to the university as Distinguished Research Fellows for periods up to a year. They will be available for seminars, conferences, discussion sessions, lectures, and related activities for both faculty and students.

The College of General Studies, State University of New York at Albany, is offering six non-credit courses this fall in its continuing education program. The program provides educational services for adults in addition to those offered in degree programs.

The courses being offered include reading improvement, technical writing, American folklore and American music, French for reading competency, practical politics, and Law for Laymen. In addition, tours of the university art gallery, at no charge, are scheduled September 25, November 6, and December 11.

Registration in each course is limited. Persons interested in enrolling are advised to register by September 18 at the Office of General Studies, room 239 of the administration building on the university campus, 1400 Washington avenue.

Dr. Jai Soo Kim, professor of atmospheric science, State University of New York at Albany, has been awarded a \$71,000 National Science Foundation research grant for his work entitled "A Study of Aurora and Related Phenomena." The award is for a two year period.

The experimental program of the project consists primarily in observing the mid-latitude monochromatic auroral arc at 6300 A at Whiteface Mountain, New York, and Green Bank, West Virginia. The theoretical effort seeks further refinements and extension to the theory of dissociative recombination by using one-center wave functions in the scattering calculations.

Dr. Kim, who joined the Albany faculty last fall, formerly was professor of physics at the University of Idaho. Born in Korea, he received his Bachelor of Science from Seoul National University. He later earned master and doctoral degrees from the University of Saskatchewan, Canada. Dr. Kim also taught at Clarkson College, Potsdam, before his position in Iowa.

Capital Area School Development Association (CASDA), State University of New York at Albany, will sponsor three meetings of area organizations in the next three weeks. All will be held in Brubacher Hall on the downtown campus.

On Thursday (September 19), the first 1968-69 meeting of the Capital Area School Business Management Officials Study Group is scheduled. The program, which will run from 10 a. m. to noon, will relate to the formation and operation of a new data processing system known as the New York State Educational Information System (NYSEIS). The statewide coordinator of NYSEIS, Richard Lesser, will present the program, together with two members of the New York State Education Department, Dr. Herbert Johnson, associate commissioner for educational finance and management services; and Dr. Morris L. Shapiro, division of educational management services.

The first meeting of the Capital Area Superintendents of Buildings and Grounds Study Group for the new school year is scheduled October 3. The 90-minute program, "The Use of Data Processing in a Maintenance Program," will begin at 10 a. m. Richard Shands, Guilderland Central Schools, will make the presentation.

The Capital Area Supervisors of Transportation Study Group will hold its first meeting October 10. Watson I. Goodrich, assistant superintendent, Onteora Central Schools, will speak on "Evaluation of Transportation Program-Onteora." The program will be presented from 10 a. m. to noon.

Professor of political science Fred J. Tickner, dean, Graduate School of Public Affairs, State University of New York at Albany, has returned to the campus from a United Nations inter-regional seminar on the Development of Senior Administrators in the Public Services of Developing Countries held in Geneva, Switzerland. Professor Tickner, whose appointment as dean of GSPA which was announced recently, had been serving as acting dean for the past year.

The seminar, which included representatives from 37 countries, was the first coordinated international meeting on the particular subject. A report on the discussions will be issued as a United Nations document.

Professor Tickner holds a Bachelor of Arts, Master of Arts, and Bachelor of Literature from Balliol College, Oxford University. He was director of training for the British Civil Service three years and deputy director of the Division for Public Administration at the United Nations from 1952 to 1962, prior to joining the Albany faculty. His work at the U.N. involved travel to Turkey, Burma, Uruguay, as well as to South African nations.

The educator is the author of two books, "Technical Cooperation" and "Administration in the New Nation." A year ago, Professor Tickner was invited by the U.N. Institute for Training and Research to take part in the First Asian Foreign Service Course, held in the Philippines.

Dr. Irving M. Bonawitz, recently has been named chairman of the department of accounting in the School of Business at State University of New York at Albany, The announcement was made at the first faculty meeting of the new academic year.

Dr. Bonawitz, a certified public accountant, came to Albany from Temple University, Philadelphia last February. He holds undergraduate degrees from Bowling Green State University, a Master of Business Administration from Northwestern University, and a doctoral degree in business administration from Michigan State University. While at Temple, Dr. Bonawitz introduced a new master's degree in accounting.

The educator currently is pursuing research in accounting information systems with emphasis on quantitative techniques and behavioral science applications. He is a member of the American Accounting Association; the American Institute of C.P.A.'s, Financial Executive Institute; and the Institute of Management Science.

From: State University Theatre  
Sara Ormond, Company Manager (457-8327)

"America Hurrah," Jean-Claude van Itallie's much acclaimed evening of three one-act plays, comes to Albany for one performance only on Saturday evening, October 12, at Page Hall. The performance by a national touring company is being sponsored by the Dramatics Council, State University of New York at Albany.

Throughout the three plays entitled, "Interview," "Motel," and "T.V.," which make up "America Hurrah," author van Itallie satirizes contemporary American society with remarkable perception, imagination and humor.

The offering is one of the longest running off-Broadway productions for a non-musical play in theatrical history. It played New York's Pocket Theatre for eighteen months and in London for eight weeks. The often controversial satirical plays have met with unanimous plaudits from professional critics on both sides of the Atlantic. Irving Wardle of the London Times called "America Hurrah," "The finest product of American theatre since 'West Side Story'." Boston critic, Kevin Kelly describes the production as "a Hurricane of Horrors. It satirizes contemporary society, American style, with the force of a whirlwind vision."

Mr. van Itallie, a Harvard graduate, perhaps best describes his own attitude of the theatre in general by saying, "the whole structure that man in the twentieth century world has devised for himself to live in seems to me, and to others, to be sitting on a foundation which is out of whack, tilted, inadequate for human beings, alienated from a sane idea of being alive. Most of the theatre, that major portion of which is rightly called 'the industry' serves the system as a handmaiden. It feeds back to those who can afford it the facile illusions that they need to perpetuate their idea of the world."

Ticket sales begin October 2 at the State University Theater box office at the Campus Center. All seats are \$1.50.

Dr. Frederick J. Beharriell, formerly of Indiana University, has been appointed visiting professor in the department of German and Slavic languages and literature, State University of New York at Albany. Dr. Beharriell's particular field is 19th and 20th century German literature. His appointment is for the 1968-69 academic year.

Recipient of B. A. and M. A. degrees from the University of Toronto, Dr. Beharriell achieved his Ph. D. from the University of Wisconsin. In 1965-66, he was both a Fellow of the Guggenheim Foundation and a Senior Fulbright Research Fellow in Austria. The linguist served as first vice president of the Association of American Teachers of German (AATG), 1964-65, and was president of the Indiana Chapter of AATG in 1958-59.

Dr. Beharriell has published a number of articles, bibliographies, and reviews, nearly all of which deal with German language and literature. Among the publications to which he has contributed are The Germanic Review, The German Quarterly, Books Abroad, and Literatur and Kritik.

Donald F. Favreau, assistant professor of education and associate director, Center for Executive Development, State University of New York at Albany, will be a guest speaker at two upcoming meetings. He will address the Chief Officers' Seminar of the Fire Service Training Program, Department of Education, State of Maine, on September 25 at Augusta, Me., and on October 4, in Rochester, he will speak at the Fire Service Recognition Luncheon of the Rochester Chamber of Commerce Safety Council.

Mr. Favreau is the executive director of the International Fire Administration Institute. He has been in the field of industrial relations, manpower utilization, personnel development and training for more than 20 years.

The work of the International Fire Administration Institute, which is part of SUNYA's Center for Executive Development, is to engage in research and otherwise obtain material for the preparation of courses in fire administration in related services and to make the material available to educational institutions, particularly at the college level in the United States and in foreign countries. The institute also assists educational institutions in the development of material.

Dr. Robert T. Duquet recently was named associate professor of computer science at State University of New York at Albany. The educator formerly was an associate professor of computer science and meteorology at Pennsylvania State University.

The Albany university is instituting a master of science degree program in computer science this fall and Dr. Duquet is expected to bolster that program. Students in the master's program may register, with their adviser's approval, for appropriate courses in computer science and related fields at Rensselaer Polytechnic Institute, Troy.

Dr. Duquet received his Bachelor of Arts in physics from Loyola College. He later earned a Master of Arts from the University of Toronto and a doctoral degree from New York University, both in meteorology. Dr. Duquet has published a number of papers and articles on meteorology. He is particularly interested in applying electronic data processing techniques to meteorology. In addition to teaching, research, and student counseling at Penn State, he participated in a daily televised weather forecast program.

Dr. Duquet is a member of the Association for Computing Machinery, the American Meteorological Society, the Royal Meteorological Society, the American Geophysical Union, and Sigma Xi. At Penn State he was a member of the Computer Advisory Committee.

Original graphics by Picasso, Chagall, Renoir, Cézanne, Dali, Miro, and Vasarely are among 400 works of art that will be on exhibition Tuesday and Wednesday, September ~~23~~<sup>24</sup> and ~~24~~<sup>25</sup>, in the Art Gallery lounge, State University of New York at Albany. Viewing hours will be 10 a. m. to 7 p. m. for the collection, which is on a tour of college and university campuses. London Grafica Arts, which is affiliated with major galleries in London, New York, and Detroit, is presenting the exhibition.

Eugene Ivan Schuster, director of London Grafica arts and art historian, and visiting lecturer at Wayne State University, Detroit, has assembled the collection.

All works are on sale at prices ranging from \$10 to \$3,000. The collection includes lithographs, etchings, woodcuts, drypoints, aquatints, silkscreens, and posters by more than 75 modern masters and younger contemporaries.

Mr. Schuster believes "it is necessary to understand what is meant by the rather unsatisfactory term of 'an original print.' The normal practice is to make... between 25 and 125 numbered and signed copies of any one work before destroying the plate from which it has been printed. Thus, although a print is not as unique an item as a painting, it nevertheless has a degree of exclusiveness."

The graphics of great artists may be purchased at a more reasonable sum than may their oils because they are multiple originals; however, the graphics possess the aesthetic qualities of a fine oil.

The College of General Studies, State University of New York at Albany, is offering a non-credit course in practical politics on Tuesday evenings from 7:30 to 9:30. The course begins on October 8 and concludes November 19.

The purpose of the course is to provide a better understanding of the American political scene and give insights into the political processes of national, state, and local government. Instructor for the course will be Robert S. Herman, visiting lecturer in the university's department of economics, and director of Higher Education of the Joint Legislative Committee to Revise and Simplify the Education Law of the State of New York.

Mr. Herman previously taught at Hunter College and Syracuse University and was executive director of the Constitutional Commission and an executive assistant to the New York State Senate. He has served as an International Consultant to 10 foreign nations and has authored numerous articles and reports.

Tuition for the course is \$20. Further information may be obtained from the College of General Studies, SUNYA, 1400 Washington Ave. (457-4937).

Nine School of Education faculty at State University of New York at Albany will participate in the annual meetings of the Eastern Zone, New York State Teachers Association, to be held in Albany and Schenectady on September 27, September 28, and October 4.

They include Vito M. Gioia, assistant professor, department of educational psychology, who will be a panelist in a discussion of sex education; Alfred J. Cali, professor, educational administration, who will react to a presentation on research and multi-disciplinary approach to teaching; John A. Ether, director of projects on education of the disadvantaged, who will serve as a consultant on inherent problems of the disadvantaged; and Francis Femminella, professor, department of education, who will serve as a consultant on sociologists in education.

Also, John Rosenbach, department of educational psychology, consultant for the subject of psychologists in education; Wilma W. Bidwell, assistant professor, curriculum and instruction, consultant on research in education; James L. Keuthe, and Richard Clark, professors, educational psychology, who will speak on the theme of conceptual learning; and Donald J. Pruden, assistant professor, who will chair a panel discussion of alcoholism.

Professor Wolfgang Monath of the University of Wurzburg, Germany, has been appointed visiting professor of German at State University of New York at Albany for the 1968-69 academic year. He will take the place of Dr. Erna M. Moore, associate professor of German at SUNYA, who will fill a similar position at Wurzburg this year.

Professor Monath held a lectureship at the University of Natal, Union of South Africa from 1957 to 1959. He is the author of several articles on German literature and served as editor of the Neue Deutsche Biographie, published by the Bayerische Akademie der Wissenschaften, for five years.

The professor's appointment is part of a regular exchange of students and faculty between Albany and Wurzburg where the Albany institution conducts a study abroad program.

Dr. Winifred Bell has joined the faculty of the School of Social Welfare, State University of New York at Albany. Her previous position was at the University of Maryland where she was a professor in the School of Social Work.

Dr. Bell, whose field is social policy and social services, is a graduate of the University of Michigan where she received her Bachelor of Arts and Master of Social Work. She subsequently earned her Doctor of Social Work degree at Columbia University. The educator just completed a consultantship to Mayor Richard Hatcher of Gary, Indiana, in which she was responsible for planning a family allowance experiment in conjunction with the Model City Program in Gary. Dr. Bell is also a member of the United States Health, Education, and Welfare (HEW) Task Force on the Reorganization of the Social Services and is a consultant to HEW.

The School of Social Welfare at SUNYA has increased its student and faculty body from 40 and 10 last year to 65 and 14 this fall. Courses combine classroom studies with field experience in clinics, social agencies, courts, and other outside institutions.

Dwight T. Wallace, associate professor of anthropology, is one of the new faculty members at State University of New York at Albany this fall. According to Paul Meadows, newly appointed chairman of the department of sociology and anthropology, Mr. Wallace's particular field of interest is Peruvian archaeology.

A graduate of the University of California at Berkeley, where he also earned his doctorate, Mr. Wallace comes to Albany from the University of Oregon. Previously, he taught at the University of North Carolina and at the University of Georgia.

The anthropologist is editor of "Abstracts of New World Archaeology," a publication of the Society for American Archaeology. He has traveled in Peru, Mexico, and the western United States conducting archaeological research. Mr. Wallace has been a Research Fellow of the Fulbright Commission in Peru and a Fulbright lecturer in Chile.

An executive development seminar for the Young Men's Christian Association took place this week at State University of New York at Albany with twenty-eight YM secretaries from throughout the state in attendance. The program was conducted by the university's Center for Executive Development under the sponsorship of the administration section of the New York State Association of Secretaries.

At the opening session the principal speaker was Professor Malcolm S. Knowles, of the School of Education, Boston University, whose keynote address was on "Social Concerns and the YMCA Director". The first full-day session featured talks by Professor Donald Favreau, associate director of CED, who spoke about "Management Vitality"; President Marvin A. Rapp, Onondaga Community College, "Recruiting, Training, and Development of YMCA Lay Leadership"; Professor Knowles, "Social Concerns and the YMCA Director"; Professor Joseph Leese, director of CED, "Organization Practice, Climate and Planning"; and Dr. Thomas Paolucci, director of training, New York State Department of Labor, "Developing Broad Gauged Managerial Personnel."

Tuesday afternoon the seminar participants heard talks on "Decision Making-Problems and Procedures", Professor Robert Kelley, CED; "Sources and Techniques of Securing Special Funds", Bernard McGivern, attorney; and "Public Relations - How? Why?", Francois L. Steats, director of public relations, YMCA of Greater New York.

At the concluding session on Wednesday morning, Professor John Ether, director, Projects on Education of the Disadvantaged, spoke to the group about

Three new members of the State University of New York at Albany music department faculty will perform in the first faculty concert of the current academic year. The program of vocal and instrumental music will take place at 8:30 in Page Hall on Tuesday evening, October 8.

The new members are Irvin Gilman, flute; Stephen Adelstein, oboe; and Dennis Helmrich, piano. Also featured will be Marjory Fuller, voice, of the music faculty. On the program will be compositions by Telemann, Quantz, Bloch, and J.S. Bach.

Mr. Gilman was a member of the Detroit Symphony Orchestra for 12 years, performing many times as flute soloist. He is a graduate of the Oberlin Conservatory of Music and the Manhattan School of Music. The flutist has taught on the faculty of Wayne State University, the University of Michigan, and the Manhattan School of Music.

Mr. Adelstein holds degrees from Oberlin College and the Yale University School of Music. He has taught at Ithaca College, Dartmouth Congregation of the Arts, and the North Carolina School of Performing Arts. Mr. Adelstein has performed as oboist with many groups, including the Metropolitan Opera Orchestra, the Esterhazy Orchestra, and the Marlboro Festival Orchestra. He has toured throughout Europe and the United States and has recorded for several companies.

When the new physics building at State University of New York is dedicated Friday afternoon, October 4, it will mark the first time an academic building on the university's new campus will be named for a person. The Joseph Henry Physics Building honors the noted 19th Century physicist, an Albany native and early experimenter in electromagnetism.

Henry, born in Albany in 1797, taught at the Albany Academy for Boys before going to Princeton University in 1832 to continue his experiments. In 1847 he moved to Washington, D. C., where he served as the first secretary of the Smithsonian Institution during the Lincoln Administration. He died in 1878 at the age of 81.

The public dedication of the Joseph Henry Physics Building, with its 14 research rooms and 12 laboratories and classrooms for instruction purposes, will begin at 4:30 at the western end of the building at the podium level. The building is located to the east of Campus Center on the southern side of the academic podium.

Participating in the ceremonies will be Truman Cameron, chairman of the University Dedication Committee and formerly a member of the University Council, who will make the presentation; President Evan R. Collins, who will acknowledge the presentation; C. Luther Andrews, chairman of the

department of physics, who will describe the use of the building; and John A. Wheeler, Joseph Henry Professor of Physics, Princeton University, who will make a brief address and unveil the building plaque. A tour of the building will follow the dedication and refreshments will be served in the Student Commons, room 129.

Professor Wheeler is internationally known for his contribution to the atomic and nuclear theory, scattering theory, fission, chain reactors, relativity, and geometrodynamics. He served as staff member or consultant on several phases of the Manhattan Project and later for the Atomic Energy Commission. He is a past president and Fellow of the American Physical Society.

The dedication will be held during the two-day fall meeting of the New York State section of the American Physical Society Friday and Saturday. A number of noted physicists will be on hand for the sessions to be held in Campus Center.

The department of physics at State University of New York at Albany offers a wide range of opportunities for experimentation and theoretical research leading to the doctor of philosophy with research programs now being carried on in nine areas of theoretical and experimental physics. The graduate program is designed primarily for those interested in a doctoral degree but it is possible for students to become candidates for a master's degree.

Currently there are 60 undergraduates with majors in physics and 44 graduate students in the physics program. In the latter group are 18 doctoral students. Two of them are expected to receive their degrees in June 1959.

Research programs in the department are being conducted in nuclear structure, nuclear magnetic resonance, x-ray crystallography, and x-ray spectrometry. Additionally, there are now two new fields of concentration. One is in solid state physics and one dealing with high energy particles. The solid state defect research makes use of accelerators at the university, Rensselaer Polytechnic Institute and at General Electric Company. The high energy particle studies employ high voltage accelerators at Brookhaven National Laboratory, Upton, (N.Y.), and at Princeton University. Additional research facilities in mass spectrometry and microwave optics used by the department are located on the downtown campus. The Dynamitron accelerator is in storage awaiting completion of an underground building near the northeast corner of the academic podium.

x x x x x

Note to the editor: Enclosed in this mailing about the dedication of the Joseph Henry Physics Building is background information about Joseph Henry, a detailed description of the building and its facilities, and a listing of the physics department faculty.

September 30, 1968

STATE UNIVERSITY OF NEW YORK AT ALBANY

The following faculty and staff occupied the Joseph Henry Physics Building at the time of its dedication.

Faculty, institutions from which they earned their highest degrees and their research interests:

1. Andrews, C. Luther; Cornell University; Microwave Optics

STATE UNIVERSITY OF NEW YORK AT ALBANY

The following information about Joseph Henry has been taken from an article written by Professor C. Luther Andrews, chairman of the physics department, State University of New York at Albany, which appeared in the January 1965 issue of The Physics Teacher, published by the American Association of Physics Teachers.

The first American to receive world recognition for a connected series of original experiments in physics was a teacher of mathematics and science to boys of ages 12 to 18. Joseph Henry won such reputation as a lecturer and investigator in six years 1826-1832 at the Albany Academy. Silliman, the editor of the American Journal of Science, in a recommendation to Princeton University wrote, "Henry has no superior among the scientific men of America." Professor Renwick of Columbia University added, "He has no equal."

Henry was born in Albany, New York, in 1797. At the age of seven, he went to live with his grandmother at Galway, Saratoga County. When ten years old he went to the village to work in a store and attend common school in the afternoon. Henry's employer permitted him to make a community center of the store for the other boys of the town.

At the age of sixteen he worked for a watchmaker in Albany, but his money and interests were spent on the theater. To this country lad, who previously had seen but one play, the stage was his calling. First begging permission to help work the levers and produce the stage illusions, he was soon invited to join the Theatrical association, The Rostrum. Distinguishing himself as a dramatist, he was made president of the society.

Fortunately for the world of science, his interests suddenly turned from the amusing of men to the studying of nature. While at home recovering from an accident, he read a book, Lectures On Experimental Philosophy, which one of his mother's boarders had left on the table. Seeing Henry's interest

in the book the owner presented it to him. Henry wrote on the flyleaf of the book, "---It fixed my attention on the study of nature and caused me to resolve at the time of reading it that I would immediately commence to devote my life to the acquisition of knowledge."

Acting immediately, Henry joined a night school and prepared for the Albany Academy. While attending the Academy he taught in a district school to earn his way until he was promoted to an assistant in the Academy. Upon graduating he accepted a position as private tutor in the family of General Stephen Van Rensselaer.

In 1825 the New York State government hired Henry to conduct a survey for a road to be built from Kingston on the Hudson to Lake Erie, later known as the Catskill Turnpike. So well had Henry done his work and written his report that a bill was introduced in the State legislature to provide a permanent state engineering corps with Henry as its captain, but the bill fell through and Henry accepted a vacant chair in the Albany Academy.

General Stephen Van Rensselaer, "The Last of the Patroons," gave support to two institutes, The Rensselaer Polytechnic Institute on the east side of the Hudson River in Troy, and the Albany Institute on the west side. The Albany Institute existed solely to subscribe to the journals in the sciences, to conduct regular meetings for discussion of the journals, and to publish its own journal, The Transactions of the Albany Institute. So complete was the set of journals that men from Harvard, Yale and Columbia University belonged to the Institute that they might have access to the journals. Institute meetings were held fortnightly, alternately in the Albany Academy and in the State Capitol.

Joseph Henry was librarian of the Institute and divided his time between care of the journals upstairs and teaching the boys downstairs in the Academy. He read the journals and gave his own reports before the institute in

the form of carefully developed demonstrations. Later he was attracted to the study of electricity.

Henry read of the classroom discovery by Hans Christian Oersted of the magnetic field around a currentbearing wire and demonstrated it before his own class. In his first journal article he deplored the failure of our higher institutions of learning to teach and demonstrate the new subject of electro-magnetism.

Henry with the help of a friend Dr. Philip Ten Eyck, had set up the first telegraph system operating over a mile of wire extended back and forth across the classroom. <sup>is</sup> There/a church window of the First Presbyterian Church of Albany,\* depicting that classroom event of September 1830 when Henry was preparing the class for the closing of the switch that would cause an armature to hit a bell at the other end of the mile of wire.

Henry had solved by a series of cut-and-try experiments the communications problem of matching the load to the source. He had not heard of Ohm's law or the concepts of electromotive force, resistance of wires, internal resistance of batteries or electrical power. In 1831 Henry published an article describing the first electric motor.

Henry discovered self induction or inertia in electrical circuits. For this discovery and the years of study of electrical induction that followed, the International Congress of Electricians in 1893 designated the henry as the unit of inductance.

With promises of more time and space for research The College of New Jersey, now Princeton University, lured Henry from Albany. In the first year his teaching load was heavier than it had been in Albany. Besides filling his own chair, he filled the chair of chemistry, and took over the courses in mineralogy and geology for a professor who was traveling in Europe. However, he did find

\* (located at the corner of Willett and State Streets)

time to build a telegraph line between his office and his home with the ground as half of the transmission line. More important, he built a much larger electromagnet with which to continue his studies of electrical induction.

In 1837 the trustees of the college gave Professor Henry leave to visit Europe for a year. It was in 1837 that Wheatstone and Cooke, after thirteen years of trial, concluded the impossibility of the electromagnetic telegraph. That same year their attentions were called to Henry's intensity magnet and telegraph. When Henry arrived in England, Wheatstone and Cooke obtained from Henry a complete description of his instrument, and two months later secured a patent on the telegraph. That same year they built a commercial line between Paddington and West Dayton but in America the telegraph had to await the development of railroads before it would be commercially profitable.

James Smithson, an Englishman, had given the United States \$540,000 for the increase and diffusion of knowledge. Through the advice of scientific friends of Smithson in Europe, the Board of Regents of The Smithsonian Institution asked Henry in 1846 to become the secretary of the institution, although he predicted to a friend, that in going he would exchange permanent fame for transient reputation.

Having studied meteorology in Albany, Henry foresaw a fruitful field for research. In two years he established six hundred observation stations throughout the country, and by means of the telegraph, daily plotted the atmospheric conditions on a map of the United States, and again by telegraph forecast the weather to the nation.

Henry continued direction of the Smithsonian Institution and of the committee of experiments of the Lighthouse Board almost until the day of his death in 1878. In the year before his death he held nine offices of honor including the presidency of the National Academy of Sciences.

Facilities and Use of the Joseph Henry Physics Building

Offices for 26 faculty members and 44 graduate students, 14 research rooms, 12 class and laboratory rooms for teaching, machine shops for six instrument makers.

Basement

- (a) Machine shops for six instrument makers
- (b) X-ray diffraction laboratory for study of vibrations of crystalline alloys under wide ranges of temperature and pressure. From these studies physical properties of alloys are deduced.

National Institute of Dental Research of the National Institute of Health. This modern automated laboratory has attracted physicists to work from 6 to 18 months, two from Czechoslovakia, one from Germany, one from Australia and one from Japan.

Podium Level (First Floor)

Measurements of magnetic resonances of billions of cycles per second are used to study the environments of nuclei in crystalline and glassy materials. A time-averaging computer records data 24 hours per day and by an averaging process separates smooth graphs of resonances from the background noise of atoms and amplifying instruments so that new resonances are being discovered that could not be recognized. Automatic data taking frees the scientist from "data poisoning" and gives him time for design and interpretation of experiments.

Third Floor

An electron microprobe scans micrometeorites collected from balloons, rockets and satellites by Dudley Observatory and projects pictures of this submicroscopic dust on a television screen. Just as objects look different under different colored lights, they also appear different by radiation of different wavelengths of X-rays. By knowledge of X-ray spectrometry, the observed may recognize the elements that make up the particles of space dust (micrometeorites).

High Energy Particle Physics

Projected pictures which have been taken at the accelerator at the Brookhaven National Laboratories and Princeton-Penn laboratories and scanned and measured for unusual events produced when subatomic, fundamental particles collide. One in one million pictures may reveal a deviation from some of the fundamental

conservation laws. Princeton University has loaned State University of New York at Albany scanning equipment until its own arrives. Princeton University has a cooperative program of research with the university.

IMMEDIATE

A twenty-year administration will come to an end next June when Dr. Evan R. Collins, president of State University of New York at Albany, leaves that position at the end of the current academic year. President Collins announced his decision to leave this afternoon at regularly scheduled meetings with students and faculty. The University Council had been told over the weekend.

In his letter to the State University chancellor President Collins stated he felt that twenty years was long enough to hold the kind of responsibility which is his, adding that he would prefer to leave while he was happy with the work he was doing and with the progress made. While he has no immediate plans, President Collins said he expects to continue serving in the field of education.

President Collins' career at Albany has spanned the life of the State University of New York established in 1948. He was appointed by the Board of Regents and took office under the newly-formed State University of New York. He has served under all of the State University's presidents and the present chancellor, a service longer than that of any of the current presidents of the State University institutions.

When President Collins began his presidency in 1949 at the age of 37 he was among the youngest college presidents of the day. The earlier State College for Teachers was located in the buildings on what is now called the

(more)

downtown campus in Albany. Total enrollment, faculty, and staff, did not equal the size of the freshman class entering the university this year. Enrollment this semester totals about 10,350, a figure roughly ten times that of 20 years ago when faculty and students combined totaled 1100, with a projected figure of 21,300 by 1975. Full and part-time faculty now number 995.

During the intervening years the institution has grown also in the breadth and depth of academic programs. In successive steps the name of the institution, has been changed, beginning in 1959 when it became State University College of Education at Albany and then State University College, an institution of arts and sciences. It was named one of the four university centers of State University of New York in 1962 and empowered to grant doctoral degrees. In that year the first doctoral degree, in education, was conferred. The university now offers doctoral programs in ten fields for the degree in philosophy, five, for the education degree; and one in the field of public administration.

Now, as the first phase of the university's large building program is nearing completion, arrangements are underway to take the next steps to develop further the university, reflecting the leadership needs necessary in higher education today. Housing new academic and research programs being developed continually will fill the additional buildings now in the planning stage.

President Collins has had a distinguished career in education. He is a former president of the Association of American Colleges for Teacher Education and a member of its executive committee. He served on the board of directors of the American Council and on its commission on international education. The prominent educator is chairman of the coordinating board of the National Council for the

(more)

Accreditation of Teacher Education and a member of the executive council of the Harvard Graduate School of Education Association and of the school and college relations committee of the Educational Records Bureau. He has served on numerous advisory groups named by the Board of Regents and the State Education Department.

In 1967 President Collins was honored by the French Government when he was awarded the insignia of Officer of the Academic Palms in recognition of his contribution, as an academician, to the development of further understanding between the United States and France. In that same year he received an honorary doctorate from the Albany Medical College of Union University. President Collins was cited by the Albany Chamber of Commerce when he received a Distinguished Service Award. He also received the Page One Award given by The Newspaper Guild of Albany.

President Collins holds degrees from Dartmouth College and from Harvard University. Prior to coming to Albany he was dean of the College of Education, Ohio University, Athens, Ohio. During World War II he served in a civilian capacity as chief, operations analysis, Second Air Force. He is, or has been, a director of the New York State Council on Economic Education, Northeastern New York Speech, and Association for Crippled Children and Adults of New York State, and a trustee of Dudley Observatory and Rensselaerville Institute on Man and Science. His past presidencies include those of Albany Rotary Club, Albany Young Men's Christian Association, and Family and Children's Service of Albany. President Collins is a director of State Bank of Albany and a vestryman of St. Peter's Church, Episcopal, of Albany.

(more)

Many innovations at the Albany institution have come about during President Collins' administration. In 1966 he began weekly informal information hours with students which continue. Regulations concerning student matters were liberalized, particularly in the areas of hours and housing, after long study by administration, faculty, and student representatives. Additionally, this month the faculty voted to have students represented on all Faculty Senate councils.

Last year President Collins established a faculty review committee on investigations involving human objects with recommendations to be reported to the office of the vice president for research. In that same year he named a University Athletics Council to coordinate participation of all groups within the university in the development of collegiate athletic policy.

The institution, under President Collins, gained increased national prominence in 1962 when a cover article in the Saturday Review, written by David Boroff, noted author-critic, stated that, "As liberal arts colleges go, it (SUCA) is a good one. As teachers colleges go, it is superb." In his report, Dr. Boroff pointed out that "Among state-supported teachers colleges in the United States, Albany ranks first in the number of graduates who later earned doctorates in English, foreign languages, philosophy, chemistry, political science, and psychology. Among colleges of its size in New York, only Vassar surpasses it in the number of graduates who achieved doctorates." In a subsequent interview, President Collins stressed that the institution had never been a teachers college, but rather a college for the preparation of

(more)

high school teachers which has awarded bachelor of arts degrees since 1905.

During the past year 208 new courses were approved by the Graduate Academic Council. In the master of arts program there are 24 fields of specialization and 20 in the master of science program, including 10 within the education program. Other master's degrees are in business administration, library science, public administration, and social welfare.

At the undergraduate level there are 57 major fields in the general program and in the education program leading to bachelor degrees in arts and sciences.

The university now has a College of Arts and Sciences, School of Business, School of Criminal Justice, School of Education, School of Library Science, School of Nursing, School of Social Welfare, and the Graduate School of Public Affairs. Research and service centers, supporting the academic effort, are the nationally known Atmospheric Science Research Center and Dudley Observatory, and the Centers for Field Research and Services, Inter-American Studies, Executive Development, Economic Education, Educational Communication, Theatre Services, Learning Disabilities, Speech Therapy, and Computing Services.

The composition of the student body has changed noticeably during the past five years. An increasing number of students come from every county throughout New York State, from communities out of the state, and, at the present time, there are on the Albany campus 134 international students from 36 countries and from Puerto Rico. As part of the regular curriculum, there is a Study Abroad Program for American students which is conducted by arrangement with the University of Guadalajara, the University of Wurzburg, and the University of Nice.
